Thanks Jabe - we have made a new 90-day log that we will implement immediately. The compressor line was moved inside. I will get details on the compressor to you by tomorrow.

Raymond was back today and was able to fill me in on the oil container. The oil was determined to be off-spec upon arrival and non-conforming. We were not able to send it for recycling since its moisture and halogen content was too high. We are holding it for fuel blending since we cannot recycle. It was the last tote from a tank clean-out that yielded otherwise on-spec used oil.

Thanks,
Kurt
