Subject: Permit modifications

Sandra,

I know we just talked about this but I thought I'd memorialize my point (and expand upon a few points), and you can pass this on to others who might become involved.

When we talked a short time ago, you mentioned that there might be some operational modifications (along with permit mods) you'd like to do sometime in the future. If and when you decide to make these changes, give me a call and we can informally discuss your proposed changes and decide whether the changes will constitute major modifications requiring public notice or if they are minor (not requiring a PN).

As I mentioned, at some point we'll need a revised Part B that changes all of the text from PermaFix to Triumverate. Also, the figures will need to reflect the change. We can decide later whether to revise the Part B along with your mods or do it when the permit is renewed.
