Attachments: Closure Cost Estimate 1.29.13.pdf
Raider Tanks 1.28.13.pdf

Hi Eric,
Please insert the attachments and the e-mails into OCULUS under the permit application related documents.
The facility I.D. for these documents is : FLR 000 143 891

If you have any questions, please let me know.
Thanks.
Bheem

John,
Yes, we are proceeding with review of the used oil processing permit application. We can understand that the solid waste portion of permit application may need two more weeks to prepare and submit to DEP. However, we suggest to you to keep the committed due date which is (Two Weeks) from today and that is on or February 12, 2013, so that we start reviewing the solid waste application process right away.

Bheem

Raider will prepare those documents for the Solid Waste permit at Mulberry. In the meantime, will FDEP proceed with review of the Used Oil Processor application? It will take at least two weeks to prepare the Solid Waste portion.

Also, attached to this e-mail are the revised Tank Log for Opa-Locka (including Process Tanks in volume calculation) and the revised Closure Cost estimate. The Closure cost reflects the switch in business mix from water to oil.

Hello John,
Please submit the following information to consider as combined permit for Mulberry facility.

1. DEP Form 62-701.900(4), F.A.C. It is four (4) page application, short version.
2. Solid Waste Processing Facility Description, including type of solid wastes stored on site, and quantities of solid wastes stored at any given time.
3. Identify storage location on a site map. Revise the site map and re-submit.
4. Revised closure cost estimates to include to dispose the solid waste during the closure. Please submit the revised version of closure cost estimate including the solid waste disposal.
5. Solid Waste Permit Application Fee of $2,000.00 for the first time and there after $1,000.00
6. Financial Assurance submittal (documents) upon approval of the closure cost estimates. The combined permit (UO and SW) will not be issued until the FA is approved and in compliance.

If you have any other questions, please let me know or contact Lee Martin (Solid Waste Section) at 850-245-8734 or E-mail: lee.martin@dep.state.fl.us in Tallahassee.

Yes, I have spoken with Steve and he does want to store solid waste at the Mulberry facility. Please let me know what modifications are needed to the application and financial assurance calculations.

The revised closure cost estimate for Mulberry Used Oil Processor permit is included with the package I sent yesterday. It will of course change with the Solid Waste addition. Do you want another submission, or would it be best just to include comments in the review of the permit? I anticipate you will have comments on the application.

Regarding the Opa Locka facility, I will forward the revised Closure Cost estimate by the end of the day. I have printed a full-scale drawing of the revised facility drawing A-0 with the changes we discussed in your office. I will FedEx it for delivery by Friday, 2/1/13.

Attached to this e-mail are the secondary containment calculations for Opa Locka based on the current tank arrangement.

Hello John,
Thank you very much for the electronic version of submittal of used oil permit application for Mulberry facility.

John have you had a chance to talk to Steve Obst about solid waste activities (solid waste permit application) at Mulberry facility.

It is just a reminder and follow-up as we discussed during our meeting on January 18, 2013 in Tallahassee.

John,
Please make a note and it is just reminder. I am still waiting for the revised closure cost estimates and the secondary containment calculations for Raider Environmental Services, Inc., OPA-LOCKA facility, Major Modifications.
Also, the tanks were installed in 2011, please submit as-built drawings with signed and sealed(Florida P.E.) for our records.
Thank you.

Bheem

Please take a few minutes to share your comments on the service you received from the department by clicking on this link DEP Customer Survey.
