Date: Tuesday, January 15, 2013 12:13:00 PM

John,

The application is looking good. I have a few additional comments for the 10-day application that need to be addressed prior to approval:

1. Contingency Plan, page 3: The text discusses documentation provided for distribution of contingency plans. Reference is made to Appendix A. But, Appendix A is the Substantial Harm Determination section. The reference should be to Appendix I "Copies of Enclosure Letters".
2. Contingency Plan, Appendix I: No documents have been provided to demonstrate distribution of contingency plans.
3. Contingency Plan, page 5: Information for FDEP contact is for the Southeast District. Please update for Southwest District contacts.
4. Contingency Plan, page 5: Mr. Bobby LeClaire is listed as a contact. Page 6 and page 21 lists Mr. Kevin McIntyre as contact. Should Mr. LeClaire be included in this list?
5. Contact personnel for Raider: Home addresses have not been provided for emergency contacts. This information is need to determine if response can be provided in a timely manner. For example, if Mr. Obst is responding from Opa Locka, Florida his response time to assess an emergency will be a minimum of 2-hours. While he can direct resources from Opa Locka, he cannot assess or assist emergency personnel in a timely manner and another person should be specified for emergency response.
6. Contingency Plan, page 7: While it is understood that this contingency plan is being written for use in the used oil operations, specific hazardous waste conditions need to be added to address operation of the 10-day hazardous waste transfer facility. Please add training requirements for hazardous waste. Please review the rest of the document and insert hazardous waste conditions where appropriate.
7. For future reference. The person who will be reviewing the document in future applications likes to point out grammatical errors, on page 8, Safe Vehicle Operation, an extra "and are" is in the sentence.
8. Contingency Plan, page 12: As pointed out earlier, hazardous waste spills may require a different response from used oil spills. Materials used to recover hazardous waste are considered hazardous waste until demonstrated otherwise. Please add language regarding spills of hazardous waste.
9. Contingency Plan, page 15, item 11: Only non-hazardous waste may be transported to Opa-Locka for disposal.
10. Contingency Plan, page 27: When present, hazardous waste containers and impervious surface used for staging must be inspected daily.

Give me a call if you want to discuss. Or we can discuss on Friday.

Okay. Will do. It is essentially the pdf that we have. I will see you on the 18th.

John,

The powers that be took our large format scanner away and are making us require that electronic copies be submitted. Since this is a one-of-a-kind drawing, I will bring my camera in and take a photo and download it onto my computer. If you can send the rest of the document, I can combine for our records.

For your used-oil application you will need to submit an electronic copy of the facility. When you make that document, do not forget to include the area that is being set as your 10-day hazardous waste transfer area.

Tony

I don't have a pdf of the marked-up site diagram. That will be difficult. Can you scan that one? I don't have an easy way to scan 24 x 36. If you need me to do that, I can see about going to FedEx.

John,

Could you please send an electronic copy of the Raider 10-day hazardous waste transfer facility application of January 1, 2013. Thanks.
