---

Hi Eric,
Please insert the attachment including the e-mails into OCULUS under permit application related documents.
The facility I.D: FLR 000 143 891
Subject: Solid Waste Revisions

If you have any questions, please let me know.
Thanks.
Bheem

Attached is a pdf of the corrected page with 27 tons used as the capacity. This should be consistent with the Closure Cost estimate.

Hi John,
As we discussed with you through a conference call, please review the comments below from Lee Martin and revise the solid waste processing application as appropriate and resubmit.

Thanks.
Bheem

Subject: Raider Environmental/Poa-Locka NOD response

Bheem, I've reviewed the Raider Environmental NOD response dated October 13, 2013 and received November 4, 2013 and have the following comments for the solid waste related responses:
Item 29; Drawing A-O depicts the solid waste/sludge management/drum handling area and appears to be adequate.

Item 30; Proposed calculation for solid waste on site in drums and/or 40 yd roll-off container appears reasonable, however using this calculation and the number of drums included in the Closure Cost Estimate (CCE) (120 drums of sludge/sediment and other solid wastes) the maximum amount of solid wastes stored at the site will be limited to 27 tons rather than 40 tons as indicated in the application. If they will actually be expecting 40 tons of solid wastes for processing on site as a maximum in the permit, then they will need to update the CCE again to reflect those numbers.
Item 31; Response appears adequate.
Overall, in the previous solid waste application dated 8/19/2013, received 8/21/2013, the process description for solid waste management section states "the maximum amount of solid waste stored at the facility, including treated material, will be 40 tons." Either this needs to be revised to match the 27 tons included in the CCE or the CCE needs to be revised to reflect the maximum of 40 tons (178 drums total) resulting in an increase of $6380.00.
Thanks, hope this helps, Lee
