Merlin,

I spoke to the engineer in charge of this project and he said that his is currently getting some revised construction pricing from the contractor. Additional items were required by the City/County after the bid set was issued. The items are not insignificant in price so he needs to go back and request additional funding for the project. As soon as that is approved construction will begin.

Merlin,

Attached is the approved permit for the Tampa facility to hook up to city water/ sewer. As I said during our conversation surveyors were out at the site last week and I am waiting on an updated schedule from the engineer managing this project. I will forward that information to you when it is received.

Thanks,
