Smelter Battery Acceptance.pdf

Good afternoon Jared, Hope you are well.

I have attached the original email you sent to us but am replying via this email because this is our main email address.

We have been working on what you've requested and will attach what we have so far:

- Full description of facility operation and business model. (Attached)
- Examples of Acceptance and delivery records for used batteries. (I have attached work flows from our smelter to show acceptance of batteries and delivery tickets which show examples of our driver picking up batteries at different locations)
- Certificate of recycling. (Secondhand dealer for both locations attached).
- Full contingency plan with the date of last revision. (Attached with supporting documentation attached).

I appreciate your time and help.

Regards,
Gustavo Perez
