Karen,
Following up with you regarding the inspection at Ft Myers Service Center on 12/8. Below are the items that were brought to my attention and the actions being taken to correct:

- 35 day window missed for used mineral oil pickup in October 2021 – Going forward the 35 day time clock will start the following day after oil is removed. The Vendor (TA America) driver has been notified of this change.
- Non-Hazardous Manifest had incorrect EPA ID numbers – Template has been made to cover the three areas (AOW, TBO and FMO) that have rolloffs with correct Generator's US EPA ID numbers for each area. The US EPA ID number for Okeechobee Landfill has also been corrected on template.
- ZEP Parts Cleaner – what solvent is being used – Attached is the Safety Data Sheet
- Universal Waste drum for aerosol cans label has been updated – see below picture

Please let me know if there are any other items that you require that I may have missed.

Thanks
