Dear Mr. Hedeia:

I see that you have notified the Department as a universal pharmaceutical waste handler and as a reverse distributor and a universal pharmaceutical waste transporter.

However, I have not found your business registered with the Florida Department of Business and Professional Regulation as a reverse distributor of pharmaceuticals, as your notification suggests. Please provide me with information regarding your authority to accept prescription pharmaceuticals. I used the search engine below to try to verify your license.

https://www.myfloridalicense.com/wl11.asp?mode=0&SID=

Regarding your request, the Department is unable to verify whether or not the spread sheet contains regulated items. As a waste broker and/or disposal contractor you will need to educate yourself regarding hazardous waste and controlled substance identification. There are a number of providers that offer hazardous waste training to generators and environmental consultants. You may search on-line for hazardous waste training providers.

Sincerely,

Elizabeth Knauss

Subject: Chemical list for removal

Good afternoon Beth,
Thank you for helping me to control this pharmaceutical items when you have a mint to look at this

list. I received this list from a pharmacy that are expired items & needed to be removed & disposed .. I want to be sure that those items are non controlled items. There's one item was marked as controlled item & will be removed from the list if there isn't any els.
