UES Violations.pdf

Thanks Bheem. I guess we'll go over the attached. So, here's my tentative agenda based on the attached:

1. White Frac Tank Storing Used Oil – Agree that it was not in containment and the words "Used Oil" were not on it. Corrected actions – tank contents were sampled and analyzed confirming a non – hazardous characterization. Tank was emptied and removed from its position in the plant area. Analysis was provided to Beth Knauss.
2. UES storage capacity / new containment area. Agree that the Department was not provided with a drawing of the "receiving area / frac tank storage". A drawing has been provided and its signed by a registered P.E. Disagree that this area was not in our original permit submittal. Several references are made of it throughout the document. Disagree that the area is not included in our Contingency Plan. Closure fees include this area as well. Discuss UES's recent Alternate Procedure submittal for use of Frac Tanks to store Used Oil.
3. Halogen screening – agree that testing was not being consistently performed. Corrected action – all employees were re-trained on Halogen Screening. All receipts of Oily Liquids are 100% halogen screened at this time.
4. Used Oil Training – as noted all employees have been properly trained regarding Used Oil Management.

Beth – if I've missed anything, then please let me know.

Regards,
Ed Kinley

Hello Ed,

Please send us, if you have any agenda of items to discuss on August 9, 2018.
I know this call is initiated by Beth Knauss. However, you may have an opportunity to use this time more efficiently and useful.
Thanks,

Bheem

Hello Bheem. As you know, we have a visit with the FDEP coming on 08/09. Can you give me a ring to discuss any other submittals that we need to complete for the attached?

Regards,
Ed Kinley
