Subject: Leachate Weep Repair at Tomoka Farms Road Landfill
Date: Thursday, October 06, 2011 1:44:23 PM

Gloria and Brad,

The purpose of this email is to notify FDEP per our Operations Plan of a leachate repair. On October 5, 2011, we started a leachate weep repair on the north side of the active class I cell. An area approximately 210 feet in length, 4 feet wide, and 6 feet deep was excavated and back filled with 4 feet of rock (112 tons) and 2 feet clean fill dirt (432 cubic yards). As the working face moves to the east we anticipate that this repair will need to move eastward also. We will update you as it is constructed.

Also, we will have pictures and more updates during our October 14, 2011 meeting . If you have any questions please let me know.

Thanks,
Jennifer Stirk
