Tom,

We are handling it until the CO is closed. We will let you know when that happens. We are anticipating that we will modify the landfill LTC permit to include additional monitoring (a "monitoring only" endpoint) in order to close the CO. If you like, we can set up an internal call to discuss the details. Let me or John Morris know if you want to discuss.

If you have any questions, please call or email (email is better).

TO: John Morris

We have assumed that SWD was managing this monitoring until the consent order is closed. Scott Cottrell told me he thought the groundwater monitoring should be done soon.

If CD is supposed to take responsibility for the Consent Order let me know. Tell me the CO number too.

Tom

Tom,

Attached please find the Quarter II 2013 monitoring report for Sumter County's closed Class I landfill (WACS #53008) near Sumterville, Florida.

You may notice that the report presents additional information not normally part of the quarterly monitoring report. Additional information is provided at the request of the Southwest District staff for use in evaluating landfill conditions in the context of a Model Consent Order issued for the landfill in 2004.

Sumter County continues to work with the Southwest District in resolution of the Consent Order-related issues and this EDD submittal is therefore also directed to John Morris, P.G. in the Department's Tampa office. A bound paper copy of the report will be sent to the Southwest District by U.S. Mail.

Due to a large file size, the laboratory report pdf prepared by Advanced

Environmental Laboratories, Inc. will be posted to the Central District's folder on the FDEP's FTP site later today.

Please let me know if you have any questions concerning the EDD or if you have trouble receiving and retrieving all parts.

Regards,

Richard L. Potts, Jr. PG
