Hi Justin:

Thank you for sending these photos over. They are helpful and have led me close this violation. Please keep me posted on the leachate tank inspection. I'll be looking for an update from you in October/November.

Thanks,
Alexis

Alexis,

Please see attached. I hope these photos are helpful. Just to note we have pushed our tank inspection back to October 30. Given the heavy rainfall this time of year we wanted to make sure there was ample time to drain the tank and allow the seasonal weather to change.

Thanks,
Justin

Hi Justin:

Go it. I'll keep a look out for an email from you next week.

Have a good weekend,
Alexis

Hi Alexis,

We will have something back to you next week. Area has been cleaned and compactors welded, just waiting for the rain to subside before we patch the concrete.

Thanks,
Justin

Hi John:

Thank you for sending this over. When do you anticipate you will have the requested photos mentioned below sent over?

Best regards,
Alexis

The Fire Inspection has been scheduled through the County's Fire Department and will be performed by a certified Fire Inspector. Once we receive the report we will certainly send a copy to the Department.

Subject: RE: Pasco Inspection Response

Hi Justin:

Thank you for following up with me on the items warranting responses in the inspection report for Pasco Resource Recovery. I have a request and a question about the containers and the fire safety survey, respectively.

I would like to see photos of the pavement around the containers in the Citizen Drop-off Area, including a picture of the concrete area beneath Container 6 and the areas around Containers 5 and 6. I have included a capture of the photos included in the inspection report to provide reference about what type of photos I am looking for (see highlighted photos below). Second, the fire inspection report provided in your response is a "Fire Alarm System Inspection & Test". The fire safety survey is for the waste tire facility at Pasco Resource Recovery, and it documents if the waste tire facility is compliant with fire code, etc. This survey must be performed by a Fire Inspector of a local fire protection authority and it should indicate that the survey is for the waste tire facility. Has an inspection of this kind been completed?

Also, I will be in contact with you around September 23 about the leachate tank inspection to get a status update.

Overview of Citizen Drop-off Area

Container 6 - Leaking Leachate

Container 6 - Degraded Concrete

Please feel free to contact me with your questions and concerns.

Thank you,
Alexis
