Subject: RE: AERC | Updated Renewal Application Transmittal
Date: Tuesday, December 20, 2011 3:42:49 PM
Attachments: Transmittal Letter.pdf
Instructions.pdf

Good Afternoon,

In accordance with your instructions below, ESC has completed uploading the updated Mercury Recovery Permit Renewal Application for AERC.com, Inc.

The uploaded files include a formal transmittal letter and instructions for detailing how each of the updated documents replaces a section/document within the original application. The instructions are organized in order of each Tab Section – cross referenced to the comments as made in your First Notice of Deficiencies letter dated September 20, 2011. A copy of both of these documents is attached to this email for your immediate reference.

The data folder created on the FDEP ftp site is named: */AERC.com Updated Mercury Recovery Permit Application*. Each of the updated documents is contained within a subfolder named for the associated Tab section of the application.

As noted within the transmittal letter, a single, hard copy of the updated application documents will be sent to FDEP via courier. This mailing will be made as soon as the original hard copy of the signed P.E. certification is received by ESC. This original page will be included in the mailing to the FDEP. A scan of this page is already included within Tab 14.

If you have any questions or comments regarding this transmittal please let me know. We appreciate all of your help over the last few months, both in answering questions as well as discussing the requested modifications in order to make this submittal today.

Sincerely,

Jeff Smith

Subject: RE: AERC | Updated Renewal Application Transmittal

Jeff,

The Department has a ftp site where you can load the documents. Go to ftp://ftp.dep.state.fl.us/pub/incoming/

RCRA/ and there are directions at the top of the page for Windows Explorer users. By following the directions you open a folder on your computer. You then drag your folders into the folder and close it. Let us know if you have any problems or need any additional guidance. When you are done let us know so we can go and retrieve the files as they are purged by system administrators on a regular basis.

Anthony R. Tripp, Ph.D., P.E.

Subject: AERC | Updated Renewal Application Transmittal

Hello Bheem,

The final electronic version of the updated renewal application for the AERC mercury recovery facility located at 4317-J Fortune Place Suite J, West Melbourne, Florida, is scheduled to be transmitted to you tomorrow.

The files are too big to be sent via email, so we are intending to provide you access to a zip-file link through an internet download site. We have had success with a website by the name of *Yousendit.com* - finding it to be a safe way to transmit files that are too big for typical email transmittal.

I am contacting you in advance to determine if you could your experience with this type of data file transfer – we know that some IT systems or Internet filter settings may screen emails from such websites.

Please let me know. Have a wonderful evening.

Thanks,

Jeffery W. Smith, P.E.
