Good Morning Bruce,

I am attaching a letter that was sent to Steve Berman in 2010 that outlines the procedures for tank close out and restart. As the note states, this is a minor mod so it will not require a public notice. Feel free to contact Tony or me if you have any questions on the process.

Also, before you start using the tank system, we will want a short installation report including the as-builts. If you have any questions on that particular issue, I suggest talking directly with Tony.

Subject: Tank, T-106 Added back into Permit

Merlin,

I hope all is well with you.

We are in the process of replacing Tank, T-106 that we had to have constructed. It is the same design and capacity as the previous tank. The engineer is asking if we can submit a letter modification or do we need to do the more formal permit form application?

Page 2 of 45 of current permit states, “Currently, T-106 has been removed and is planned to be replaced.”
Page 28 of 45 Section 15.b. “Ensure that the replacement tank’s construction details and capacity remain the same as former T-106”
Page 44 of 45 Attachment D continued, Depicts T-106 with asterisk . “T-106 physically removed. To be replaced with DEP approval.”

Please let us know so we can get this moving forward.

Sincerely,

Bruce Riffel
