---

Kim:

Attached is the CQA field report for the two gas extraction wells in the closure area that required booting and capping (GW-46 and GW-56). Sorry it took a while to gather the information. Comanco completed the work during the leachate storage facility construction and we had to dig through a few files to locate the log. The Superintendent from Comanco was out of State on another job and we had to track him down. Also attached are a few photographs of the new wells taken recently and a couple during booting and capping. Let me know if you need a formal letter report from Golder Associates or if this e-mail is sufficient.

Thanks,

Mike Kaiser
