Beth –

These were both drums that came to us through the Safety Kleen branch in Medley on different shipments. We notify the Safety-Kleen account managers of the OFFC findings and request resolution. They then go to the generator and provide them with our findings and work with them to resolve the OFFC, which in many cases takes a good bit of time.

Two in one week? Can you let me know why the first report involves waste received 10/4 and the second for waste received 11/8?
