Brad,

After discussing the current conditions with Mr. Marion, we have determine the need to remove the standing water in the area is not as time critical as originally thought. The leachate sump pumps are able to remove the water at an adequate rate in order to prepare the cell for garbage acceptance. Volusia County Solid Waste will continue to utilize the leachate pumps in removing the water from the cell. If you have any questions or need additional information please let me or Mr. Marion know.

Thanks,
Jennifer Stirk
