Miranda,

Attached are the records you requested from our systems. Please note the following:

1. 99% of the time Field Service Trucks and Preventative Maintenance Trucks leave and return to the facility they are assigned to and only under an extreme circumstance would they drop off Used Oil and Filters at another Ring Power facility.
2. Safety Kleen is under contract to collect all Used Oil and Filters from Ring Power facilities for final processing.
3. Most of the equipment that Ring Power services does not have an address since large-scale construction is preformed along roadways, mine sites, landfills, etc. so, most of the time the location is the city where the service took place. We have included the customer so their business address can be provided if needed.
4. Ring Power service trucks do not have a method to calculate the amount of Used Oil that is removed from a piece of equipment. However, based on knowledge of the equipment Ring Power can estimate the amount of Used Oil removed in relation to the following variables:
    a. New Oil Added
    b. Remaining oil trapped inside the equipment
    c. Oil that is burned up during normal usage
    d. Oil lost to minor leaks

My senior management team would still like to meet with your team to discuss our process to ensure we are meeting our regulatory requirements.

Please let me know if you have any questions.

Thanks,

Rick Vaughn

Rick

I look forward to receiving the records this week. Once reviewed we can discuss the need for a meeting. The Department can host a teleconference so there is no need to worry about meeting in person.

Thank you

Miranda Rothenberger
Environmental Consultant

Ms. Rothenberger,

I wanted to give you an update concerning the records you requested from Ring Power's Daytona facility concerning Used Oil that is collected off-site. We are in the process of pulling the information from our Preventative Maintenance and Field Services systems and should have the information to you next week.

I also wanted to extend to you and your program manager an invitation to sit down with members of Ring Power's senior management team to review our Used Oil handling process if you feel a meeting is necessary. Our team is available the last week of October and can host at our Orlando facility.

I appreciate your patience as we consolidate the records you require. Please let me know if you need additional information or have any questions.

Kind regards,

Rick Vaughn

Good afternoon Rick,

Checking on the status of these documents. If not accessible electronically, I can re-visit the facility.

Thanks

Miranda,

Thank you for the form. I will start working on pulling the information for you as soon as possible. I hope to have it to you next week.

Good afternoon Rick,

Thank you again for taking the time to speak with me this morning regarding used oil acceptance records at Ring Power Corp located at 401 N Tomoka Rd, Daytona Beach. Attached is the state provided acceptance record for reference. Please send over the last three years of acceptance records and a brief description of how the oil is brought for storage – as it seems the staff on site was not familiar with this activity.

Additionally, please send over training records for used oil related activities for the staff at 401 N Tomoka Rd.

I will check in next Wednesday, September 29, 2021, if I don't hear from you before then.

Thanks!
