Hello mrs Juliana due to the corona epidemic all the heppas and prefilters are on incredible back order because hospital needs which puts all gun ranges
At disadvantage because we can't purchase any mid -pre-or heppa filters to supply our customer. We will let u know with time in advance once we have our inventory
Ready to start again helping our customers with their need this situation is going to change soon
(I hope)(sorry for the inconvenience we will keep u posted as soon as we have set our next filters recycling thanks I hope u have a Wonderfull rest of the day

Good morning Jeff,

Thank you for the information.

For compliance determination please provide to the Department **by 09/30/2021.**

1. A copy of a bill of lading given to a serviced Very Small Quantity Generator (VSQG) facility for the lead contaminated filters and dust pickup.
2. A copy of hazardous waste manifest properly filled out given to the second transporter and/or designated facility.

Please contact me in case of questions or concerns.

Kind regards.

Good afternoom Mr. Lewis,

Thank you again your time at the meeting today.

As discussed, for compliance determination please provide to the Department:

- **A copy of the bill of lading given to the serviced facility, if Very Small Quantity Generator (VSQG), for the pickup of lead contaminated filters and dust.**
- **A copy of the hazardous waste manifest to the second transporter and/or designated facility properly filled out.**

As hazardous waste transfer, this facility shall not store hazardous waste for more than 10 days.

For future inspections, please advise on the Hazardous Waste Transporter and Transfer Facility requirements found on the checklist attached and in link below:
https://www.epa.gov/hw/hazardous-waste-transportation

Please provide the requested information to the Department within **30 days, by 09/03/2021.**

Please contact me in case of questions or concerns.

Kind regards.

Subject: JJ Metal Services (EPAID FLR000221192) - Informal Meeting

Good morning Mr. Lewis,

Thank you for your participation at the conference call meeting this morning.

Per our conversation, the Department needs clarification on the following:

1. Discrepancy in the Certificate of the recycling indicating West Melbourne as the final destination, and the non-hazardous waste manifest indicating Clean Earth of Alabama. The current COR is attached to match the final destination in Alabama, this is how it would look moving forward. Back a couple of years it was stated for Florida cause we did receive it here then shipped to Alabama which indicated the Florida on the COR at the time during the transiting from being bought from Clean Earth.

2. Inform the amounts of spent filters that are not being recycled, and how and where determination is conducted on the hazardous waste. The amount of filters are based on each cubic yard box received, not by weight nor any tare weight.

3. Provide a picture of the gaylord boxes to be filled with recyclable filters at you facility.

4. Please resubmit the 8700-12 FL form (attached with the instructions) to update on the status of the Opa Locka facility (EPA ID FLR000216127).

Please contact me in case of any questions and concerns.

Kind regards,
