Subject: "SK Ocala CCE Revised"

Hi Bheem,

Attached are the revised CCE for the SK Ocala permit renewal. I have added a section to include disposal for material with the assumption that the tanks are completely full at time of closure. Specifically disposal of 885,500 gal. of used oil at 0.20 per gallon, 120,000 gal. of industrial wastewater at 0.22 per gallon, 28,500 gal. of fuel oil at 0.20 per gallon, and 20,000 gal. of antifreeze at 0.50 per gallon. The revised total CCE is now $673,548.81. I feel this number represents a true value for closure of the facility should that come to pass and is in line with our discussions yesterday. Thank you for your assistance and let me know your thoughts.

Thanks,

Jeff Curtis
