Subject: Surface Weep at Tomoka Farms Road Landfill
Date: Friday, May 13, 2011 12:28:14 PM

Gloria and Brad,

This email is to inform the Department that Volusia County Solid Waste repaired a small leachate weep on the south slope of the active class I cell on May 11, 2011. As noted during the inspection that day, the area was excavated approximately 2 ft deeper then the previous excavated weeps to get the drainage rock in garbage. In that particular area of the side slope at 4 ft there was a heavy mixture of soil and waste from prior cover. Other than the depth of the hole the weep was repaired using the previously submitted procedures as approved in our operations plan.

If you have any questions or need additional information please let me know.

Thanks,
Jennifer
