Garfield

I received a copy of your notification to DEP that the stormwater ponds overflowed during the storm event last week. There was no mention about the Combustion Waste Storage Area pond (that is, leachate pond). Did its contents overflow its banks? If so, please describe what actions were taken.

Subject: OUC Stanton Ponds - Rain Event

Ms. Ferraro,

During this past weekend (October 8 & 9) rain event, the Stanton Energy Center received 9.5 inches of rain resulting in the lined ponds exceeding their capacities. See attachment for detail; if there are any questions, feel free to contact me.
