Brad

Per our telephone conversation yesterday, and loading out two more trailers going out to Empire Tire today, the remaining scrap in the building is approximately 6000 scrap tires yet to be removed and approximately 2000 used tires plus around 300 semi scrap tires. The total is 8300 tires. This puts me slightly under my bonded 9000 tires and as of today we will be in compliance. We will continue to remove all scrap and remain in business as a wholesale used tire distributor. Once again I am grateful for your patience for allowing me to work out a difficult problem. I will always keep you informed if any thing in the future changes.

Best Regards,

Dennis
