RE: Hazardous Waste Inspection Exit Interview Summary for Safety-Kleen, 8755 NW 95th St., Medley, FL 33178. EPA ID# FLD984171694.

Dear Ms. Winston:

I am in receipt of the above referenced inspection report from 4/10/08 at Safety-Kleen's Medley branch service center. Please accept this letter in response to items requested by the inspector.

The first item requested on page 2 of 2 was #2, regarding creation of an Operating Log for Transfer Facility that meets requirements of Chapter 62-730.171(2)(e)FAC. As we discussed at our meeting on 4/18/08 I have put in a request to our IT department to have the current operating log print out the required information and will provide a copy once the system has been changed.

The second item requested on page 2 of 2 was #3, regarding the Used Oil Acceptance and Delivery Records. As we discussed at our meeting on 4/18/08 Safety-Kleen's acceptance records are found on the facility operating log in storage location "OILTANK". When a used oil pick up is done at a customer site the oil is pumped into the truck and a document is created with an associated container number for that pick up. All of the days used oil picked up is then brought back to the branch and stored in the Used Oil Tank. A tanker truck comes to the branch daily to pick up loads of used oil from the tank and deliver it to Transflo in Ft. Lauderdale where it is then shipped to Safety-Kleen's East Chicago, IL re-refinery. At this time a Used Oil Tracking document is created by the Medley branch for this shipment to Transflo.
