Re: Florida Hazardous Waste Transporter Approval

Dear Michael Hirst:

Your Florida Hazardous Waste Transporter Approval Certificate is enclosed. The terms and conditions of approval are specified in Sections 62-730.170 and 62-730.171, Florida Administrative Code(FAC), a copy of which is enclosed for your reference. Please note the following.

1. You must demonstrate proof of liability coverage on an annual basis, even if your insurance policy is issued on a multi-year basis. If no changes in status or insurance coverage have occurred, you can meet this requirement by submitting a certificate of liability coverage form along with the two copies of the Hazardous Waste Transporter Status Form, copies of which are available upon request from the Department of Environmental Protection.
2. A copy of your insurance policy, together with any endorsements, must be maintained at your principal place of business.
3. Your insurer can not terminate your coverage until 30 days after filing written notice with DEP, by Certified mail, that your policy has expired or has been canceled.
4. Any changes to the information specified on your approval certificate will render it null and void. It is your responsibility to advise DEP of any changes in liability coverage or status.
5. A copy of Hazardous Waste Transporter Status Form, complete with the Department approval shall be carried in each vehicle transporting hazardous waste for the transportation company.

Michael Hirst  
September 30, 2009  
Page Two

If you intend to operate a hazardous waste transfer facility, you must submit a Transfer Facility Form [Form 62-730.900(6)]. Notification also must include a contingency and emergency plan and a facility closure plan in accordance with Rule 62-730.171(3)(a), F.A.C. The owner or operator must also demonstrate to the satisfaction of the Department that the location complies with the relevant siting requirements listed in section 403.7211(2) Florida Statutes (F.S) before the location is used as a transfer facility.

If you are currently operating an authorized transfer facility, you must maintain records of incoming and outgoing hazardous waste shipments. These records must include generator names and manifest numbers, and, unless otherwise approved by the Department, must be maintained at the transfer facility in accordance with Rule 62-730.171(6), F.A.C.

If you have any questions, please contact me at 850/245-8755.

Sincerely,

A handwritten signature in black ink that reads "Aprilia Graves". The signature is written in a cursive, flowing style.

I am sorry, just trying to get all this correct so we won't have to ask the same questions next year. I am just going to replace page 3 on your NJ# 8700-12 with a blank page since you do not transport Mercury or Used Oil under the NJ#.

Thanks again for all your help,  
Tiff

Hi Jack,

Can you clarify which EPA ID# your are transporting Used Oil, Mercury and Hazardous Waste under so we can make sure that our records are correct?

Thanks,  
Tiff

Okay, I didn't realize that. In that case, I don't need the revised 8700-12FL for the FL # so I will just disregard that therefore, I will not need you to put it in the mail either. I'll make sure our records are correct and go ahead and start processing your 8700-12fL for your NJ facility. Thanks again for all your help and cooperation.

Thanks,  
Tiff

**9. Type of Regulated Waste Activity ( Mark 'X' in all that apply):****A. Hazardous Waste Activities:****(1) Generator of Hazardous Waste**

(Choose only one of the following three categories.)

- ☐ a. Large Quantity Generator (LQG):  
Generates in any calendar month 1,000 kilograms or greater per month (kg/mo) (2,200 lbs.) of *non-acute* hazardous waste; or Greater than 1 kg (2.2 lbs) of *acute* hazardous waste
- ☒ b. Small Quantity Generator (SQG):  
Generates in any calendar month greater than 100kg/mo but less than 1,000 kg/mo (>220 to <2,200 lbs.) of *non-acute* hazardous waste and/or 1 kg (2.2 lbs) or less of *acute* hazardous waste
- ☐ c. Conditionally Exempt SQG (CESQG):  
Generates in any calendar month 100 kg/mo or less (220 lbs.) of *non-acute* hazardous waste and 1 kg (2.2 lbs) or less of *acute* hazardous waste

In addition, indicate other generator activities that apply.

- ☐ d. United States Importer of hazardous waste
- ☐ e. Mixed Waste (hazardous and radioactive) Generator

For Items 2 through 7, mark 'X' in all that apply.

**(2) Treater, Storer, or Disposer of Hazardous Waste**

(at your facility) Note: A hazardous waste permit may be required for this activity.

- ☐ a. Operating Commercial TSD
- ☐ b. Operating Non-commercial TSD
- ☐ c. Non-operating: Postclosure or Corrective Action Permit or Consent Order (HSWA, etc.)

**(3) ☐ Recycler of Hazardous Waste (at your facility)**Specify: ☐ Commercial; ☐ Non-Commercial.

A permit is required for storage prior to recycling.

**(4) ☐ Exempt Boiler and/or Industrial Furnace**

- ☐ a. Small Quantity On-site Burner Exemption
- ☐ b. Smelting, Melting, and Refining Furnace Exemption

**(5) ☐ Person Authorized to Manage Conditionally Exempt Waste Generated at Other Facilities** - Choose this management activity ONLY if you attach EITHER a copy of your application for such authorization OR the authorization you received from FDEP.**(6) ☐ Underground Injection Control** - Mark an 'X' even if the UIC well at your facility does not receive hazardous waste.

- (7) ☒ Transporter of Hazardous Waste** [ Note: A Certificate of Liability Insurance is required along with this registration.]  
Registration must be renewed annually. ☐ a. For own waste only ☒ b. For commercial purposes

**c. Hazardous Waste Transporter Insurance Information**Insurance Company ZURICK AMERICAN INSURANCE COMPANY ☒Address PO BOX 96520  
CHICAGO, ILLINOIS 60693Contact Chris Stafford Telephone 856-914-4656Policy Number TRK368118908 Expiration date 10/01/2009d. **Transportation Mode** ☐ Air ☐ Rail ☒ Highway ☐ Water ☐ Other - specify \_\_\_\_\_e. ☒ **Hazardous Waste Transfer Facility:** Storage Volume 400 DRUMS ☒☐ **Initial notification**

The following items are required to be submitted with the initial notification for a transfer facility [Rule 62-730.171(3), Florida Administrative Code (F.A.C.)]:

- ☐ Certification by a responsible corporate officer of the transporter that the proposed location satisfies the criteria of Section 403.7211(2), Florida Statutes (F.S.) [Rule 62-730.171(3)(a)1., F.A.C.]
- ☐ Evidence of the transporter's financial responsibility [Rule 62-730.171(3)(a)3., F.A.C.]
- ☐ A brief general description of the transfer facility operations [Rule 62-730.171(3)(a)4., F.A.C.]
- ☐ A copy of the facility closure plan [Rule 62-730.171(3)(a)5., F.A.C.]
- ☐ A copy of the contingency and emergency plan [Rule 62-730.171(3)(a)6., F.A.C.]
- ☐ A map or maps of the transfer facility [Rule 62-730.171(3)(a)7., F.A.C.]

☐ **Notification of changes in above items**☒ **Annual update notification**

**B. Universal Waste (UW) Activities (Mark 'X' in all that apply) ("accumulated" means at any one time):**

- ☐ Large Quantity Handler (LQH) = 5,000 kg (11,000 lb) or more of any combination of UW accumulated
- ☐ Small Quantity Handler (SQH) = always less than 5,000 kg accumulated
- ☐ Mercury-containing devices LQH = 100 kg (220 lb) or more accumulated by for-hire handler
- ☒ Mercury-containing devices SQH = less than 100 kg accumulated by for-hire handler
- ☐ Mercury-containing lamps LQH = 2,000 kg (4400 lbs/8,000 lamps) or more accumulated by for-hire handler
- ☒ Mercury-containing lamps SQH = less than 2,000 kg (8,000 lamps) accumulated by for-hire handler
- [Note: 4 lamps = 1 kg, 62-737.200(10)]
- ☐ Pharmaceuticals LQH = 5,000 kg or more of universal pharmaceutical waste (UPW) accumulated
- ☐ Pharmaceuticals LQH = more than 1 kg (2.2 lb) of acutely hazardous ("P-listed") pharmaceutical waste accumulated
- ☐ Pharmaceuticals SQH = always less than 5,000 kg of UPW and always 1 kg or less of acutely hazardous UPW accumulated

(1) For those Managing	Generate/ Accumulate	Transport (see note in instructions)	Handle at Transfer Facility	(2) Enter your estimate of the maximum amount (in pounds) of each type of UW on site or transported at any one time.

**STATE OF FLORIDA**  
**HAZARDOUS WASTE TRANSPORTER CERTIFICATE OF LIABILITY**  
**INSURANCE**

1. A. ZURICH AMERICAN INSURANCE COMPANY OF ILLINOIS B. STEADFAST INS. CO.  
(Name of Insurer)

(the "Insurer"), of PO BOX 96520, CHICAGO, IL 60693  
(Address of Insurer)

hereby certifies that it has issued liability insurance covering bodily injury and property damage including environmental restoration for sudden accidental occurrences to

FREEHOLD CARTAGE, INC.

(Name of Insured)

(the "Insured"), of 175 BARTOW MUNICIPAL AIRPORT, BARTOW, FL 33830  
(Address of Insured)

in connection with the insured's obligation to demonstrate financial responsibility under Florida Administrative Code Rule 62-730.170. The coverage applies at:

<u>EPA/DEP I.D. No.</u>	<u>Name</u>	<u>Location</u>
NJD054126164	FREEHOLD CARTAGE, INC.	BARTOW, FLORIDA 33830

(If coverage is for multiple facilities, identify each facility insured.)

A. This insurance is primary and the company shall not be liable for amounts in excess of \$ 1,000,000 for each accident, exclusive of legal defense costs. The coverage is provided under policy number TRK368118909, issued on 10-1-09.

The effective date of said policy is 10-1-09 (date) and the expiration date of said policy is 10-1-10 (date).

B. This insurance is excess and the company shall not be liable for amounts in excess of \$ 4,000,000 for each accident in excess of the underlying limit of \$ 1,000,000 for each accident, exclusive of legal defense costs. The coverage is provided under policy number SE0586048305, issued on 10-1-09 (date). The effective date of said policy is 10-1-09 (date) and the expiration date of said policy is 10-1-10 (date).

2. The Insurer further certifies the following with respect to the insurance described in Paragraph 1:

(a) Bankruptcy or insolvency of the insured shall not relieve the Insurer of its obligations under the policy.

- (b) The Insurer is liable for the payment of amounts within any deductible applicable to the policy, with a right of reimbursement by the insured for any such payment made by the Insurer.
- (c) Whenever requested by the Secretary (or designee) of the Florida Department of Environmental Protection (FDEP), the Insurer agrees to furnish to the Department a signed duplicate original of the policy and all endorsements.
- (d) Cancellation of the insurance, whether by the Insurer or the Insured and any other termination of the insurance (e.g., expiration, non-renewal), will be effective only upon written notice and only after the expiration of thirty (30) days after a copy of such written notice is received by the Secretary of the FDEP as evidenced by certified mail return receipt.
- (e) The Insurer shall not be liable for the payment of any judgment or judgments against the Insured for claims resulting from accidents which occur after the termination of the insurance described herein, but such termination shall not affect the liability of the Insurer for the payment of any such judgment or judgments resulting from accidents which occur during the time the policy is in effect.

I hereby certify that the Insurer is licensed to transact the business of insurance, or eligible to provide insurance as an excess or surplus lines insurer, in one of more States including Florida.

BY: BSHW

**To: All hazardous waste transporters who have notified of existing transfer facilities**

**Subject: Required submittal of supplemental information**

As you know, Rule 62-730.171, Florida Administrative Code (F.A.C.), requires hazardous waste transporters who operate transfer facilities to notify the Department prior to operation, and to update the notification information annually by submitting Form 62-730.900(1)(b) (also known as "8700-12FL").

Several changes to Rule 62-730.171 F.A.C., have resulted in clarification of the initial notification requirements, and additional information that is to be submitted as part of the annual re-notification. A copy of the new rule and the revised Form are attached. Please read and review for changes to your current operating procedures. Initial notification items, as summarized from rule 62-730.171(3)(a)1. through 7., are:

1. Certification that the proposed location meets the siting criteria of s. 403.7211, Florida Statutes (F.S.)
- X 2. The completed form (8700-12FL) [Form 62-730.900(1)(b)]
- X 3. Evidence of transporter financial responsibility
- X 4. A brief general description of the transfer facility operations, including certain specific details (such as maximum design capacity for storage) and engineering drawings or sketches if any. *See page 4 of spill plan*
- ✓ 5. A closure plan that meets certain standards
- ✓ 6. A contingency and emergency plan
- ✓ 7. A map or maps of the transfer facility, depicting structures and various pertinent features.
- X 8. A Hazardous Waste Transporter Status form [Form 62-730.900(5)(d)].

Your next annual update notification must include items 2 through 8. All existing transfer facilities must submit this information. Failure to submit this information could result in your loss of certification as a hazardous waste transfer facility. Items 4 and 7 are new, one-time requirements for existing transfer facilities. In the future, once items 4 and 7 have been submitted, annual notification will consist of items 2, 3 and 8. Items 4, 5, 6 and 7 need only be submitted with the annual notification when any of the information in those items changes. Item 1 is required with initial notification. An evaluation of the siting criteria will be necessary if an existing transfer facility operator proposes changes in facility operations.

If you have any questions or concerns regarding this issue please contact Anthony Tripp at [Anthony.tripp@dep.state.fl.us](mailto:Anthony.tripp@dep.state.fl.us) or 850-245-8766.

## **RECORD OF AMENDMENTS**

As set forth in 40 CFR 112.5 (b) and 264.54, this SPCC/Emergency Management Plan shall be reviewed and/or amended, if necessary, when ever:

1. Required by the Environmental Protection Agency (EPA) after review of the plan which was submitted after an incident.
2. Applicable regulations are revised.
3. The plan fails in an emergency.
4. There is a change in the design of the facility, construction, operations, or maintenance which materially affects the potential for an incident.
5. The list of Responsible Persons or Coordinators changes.
6. The list of Emergency Equipment changes.

The plan shall be reviewed at least once every 3 years and shall be amended if such review indicates more effective control and prevention technology will significantly reduce the likelihood of an incident. Future amendments to this plan shall be recorded in this section as follows:

<b>ACTION TAKEN</b>	<b>REASON</b>	<b>DATE</b>	<b>REMARKS</b>
Revised SPCC/Emergency Management	Additional Information Needed	02/13/92	
Additional Record Requirements	Change in Regulation	02/13/92	Logging Into & Off Site
Revised Pollution Control Equipment	Change in Equipment	02/13/92	
Change in Responsible Party	Retirement	04/07/94	
Changes in Responsible Party	Reorganization	01/30/95	
Add Responsible Party	Review of Plan	01/30/97	

<b>ACTION TAKEN</b>	<b>REASON</b>	<b>DATE</b>	<b>REMARKS</b>

Revised Responsible Party	Personnel Change	11/01/04	Requested After Review
Revised Secondary Contact Added 3 <sup>rd</sup> Contact	Personnel Change	11/05/04	

Revised 3 <sup>rd</sup> Contact	Personnel Change	10/30/07
Revised Emergency Contact List	Personnel Change	10/01/08
Revised Secondary Contact	Personnel Change	08/13/09

### **ENVIRONMENTAL POLICY**

The purpose of this policy statement is to reaffirm the policy of our Corporation, with regard to the protection of the environment.

It is hereby, the policy of Freehold Cartage, Inc.

To take all practical measures necessary to prevent or abate air, water, and solid waste pollution resulting from its operation.

To insure that qualified personnel, with clearly defined responsibilities and commensurate authority, are assigned to bring and keep pollution under control.

To cooperate fully with all Government Agencies in pollution abatement activities.

To conduct appropriate research and engineering investigations in air and water quality control, and to encourage such research by others outside the Company.

To contribute to the development of sound, equitable, and realistic standards, laws and ordinances.

To maintain a close liaison with organizations involved in pollution abatement, with a view toward improving the Company's environmental program and relationship with its neighbors.

To participate with other companies, organizations and the public in efforts to enhance the quality of the environment in our Community.

To inform our Employees and the Public of our Company's efforts toward environmental control.

To maintain close liaison with organizations and regulatory agencies engaged in the abatement of pollution problems, with a view toward constantly improving the Company's environmental program.

It is the obligation of every Employee of Freehold Cartage, Inc. to adhere to the spirit as well as the letter of this Environmental Control/Emergency Management procedure.

## **DESCRIPTION OF OPERATION**

Freehold Cartage, Inc. is in the business of transporting hazardous and non-hazardous waste from the generators of these wastes to regulated recovery or disposal facilities. In the process of transporting this material, Freehold Cartage, Inc., utilizes van trailers, tank trailers, roll-off trailers and straight trucks. All trucks are equipped with a spill kit where absorbent pads, sealant, shovels and other safety gear is stored.

Normal operation is for a truck to leave the site and pick up waste from one or multiple generators. In some instances, the waste may be brought to the yard. Drums may be transferred from one truck to another for shipment to the facility that has been designated by the generator to receive the waste. At no time will a drum be placed on the ground.

Freehold Cartage, Inc. has permits to pick up and transport waste hazardous materials in forty-eight states. 85% of its business is interstate. Waste transported includes:

ALL RCRA WASTE CODES  
POLYCHLORINATED BIPHENYLS  
UNIVERSAL WASTE  
USED OIL

## **II. INTRODUCTION AND INTENT OF THIS SPCC/EMERGENCY MANAGEMENT PLAN**

The purpose of this plan is to develop, document, implement, and maintain a thoroughly engineered facility designed not only to prevent hazardous substance spills, but in the event of a spill, to minimize the loss of product and subsequent damage to the environment. Contingency plans incorporated in this document will outline the response steps to be taken to minimize the impact of a spill in the environment and to facilitate cleanup.

The Freehold Cartage, Inc., facility is located within the confines of Bartow Air Base, Bartow, Florida. The site is 2.75 acres with a concrete containment parking pad, one office trailer and a storage shed. Incorporated with the containment pad is a 12 x 42 covered loading dock. The lot size is approximately 500' x 225'. The address is 175 Bartow Municipal Airport.

Hazardous and non-hazardous wastes are occasionally stored on trucks for shipment to disposal sites. Any loaded truck containing hazardous waste is parked on the containment pads while it is in this facility. No drums are placed in ground storage nor is bulk material placed in holding tank for transfer.

This maintenance and contingency plan includes programs for employee training, regularly scheduled inspections, and the incorporation of fail safe systems.

It is the intent of Freehold Cartage, Inc. to take all practical measures to prevent or abate air, water, and solid waste pollution resulting from its operation. It should further be noted that management will comply and cooperate fully with all Governmental Agencies charged with pollution control. Qualified, Trained Personnel, with clearly defined responsibilities and commensurate authority are assigned to administer this program and to prevent any environmental incidents.

### **INSPECTIONS AND RECORDS**

Inspections of the site are conducted each week by Mr. Michael Hirst or his designate according to the attached written procedures. A log of these inspections is kept in the Main Office and entries are initialed by the inspector.

Reports of environmental incidents, personnel training, regulatory agency inspections, and efforts made to enhance environmental control are also kept in the Main Office.

A log of all materials coming onto the site prior to shipment to a disposal facility will be maintained with the following information:

Generator	Date In
Manifest Number	Number of Containers
Destination	Trailer Number
Date Out	

A copy of this Contingency Plan will be located in the Drivers trailer and in the Main Office Building.

### **III. INTERNAL CALL LIST/EMERGENCY PROCEDURES**

U.S. EPA Regulations define a hazardous substance release as the discharge of any material which could create a potential human health or environmental hazard outside of the facility. This would include the discharge of an oily or hazardous material into any navigable waterways and/or the contamination of any drinking water supply by a hazardous substance. Contaminated ground water could also seep, leach or flow into navigable water.

An important facet of an effective response procedure during a substance release incident is to keep it separated from water and/or to minimize its spreading and the resulting increase in human/environmental exposure. Every effort should be made to emphasize substance containment at

the source rather than to have to resort to separation of the materials from expanded portions of the environment or downstream water.

A proper cleanup of any spill will usually involve the following procedures:

**A. DETECTION**

1. Upon the detection of a release, the PLAN environmental coordinator or his designate, shall be notified as soon as the immediate measures necessary are taken to prevent the spread of pollution to the environment.

**PRIORITIZED CALL LIST**

Michael Hirst	(863) 533-4599	Office
	(863) 287-1830	Cell Phone
John Peterson	(863) 519-5013	Office
	(863) 287-9109	Cell Phone

2. Mr. Hirst shall then notify the proper agencies listed on the external call list as deemed necessary according to the written reporting procedures. If neither the Coordinator, his designate, or person in charge of the office can be reached, the proper authorities and/or response center shall be notified by the person on the Scene according to this spill plan.

**B. STOP SPILL SOURCE**

If not already done as part of the 1<sup>st</sup> line response, assure that the source of the leak or spill is determined and additional spillage curtailed. Utilize personal protective equipment as necessary for the job.

**C. CONTAIN SPILL**

Rapid containment of the spill will hasten and simplify cleanup. Absorbent material floor dry, oil booms, shovels, dirt, etc. shall be utilized as appropriate.

**D. PICK UP POLLUTANTS**

After containment, the pollutant shall be picked up utilizing a vacuum truck if one is on site. Otherwise, portable pumps, or other appropriate means, shall be used to transfer the material to 55 gallon steel drums or other proper containers for disposal.

#### **E. CLEANUP**

After as much of the pollutant as possible has been picked up, the spill residue will be cleaned up utilizing available absorbent materials. Contaminated soils shall be removed and disposed of at an authorized disposal site, and other surfaces shall be decontaminated.

### **IV. EXTERNAL CALL LIST/REPORTING PROCEDURES**

#### **REPORTING PROCEDURES**

All possible information shall be obtained so no delay in notification will result. The following information is required:

1. Name, title, telephone number, and address of reporter.
2. Name, telephone number, and address of facility/spill.
3. Time and type of incident.
4. Amount and type of materials involved.
5. The extent of injuries/illness if known.
6. The possible hazards to human health and environment.
7. Any bodies of water involved.
8. Cause of accident/spill.
9. Action taken or proposed by facility/personnel.

#### V. POTENTIAL SPILL SOURCES

SOURCE	CAUSE	QUANTITY	DIRECTION OF FLOW	MATERIAL
Truck (Load)	Rupture/Leak Valve Damage	Less than 7,000 gallons per Truck	Containment Pad	Hazardous & Non-hazardous Wastes
Truck (Fuel)	Rupture/Leak Line Damage	Less than 200 gallons per Truck	Variable	Diesel Fuel Gasoline
Drum	Leak/Damage	less than 55 55 gallons	Truck Liner Containment Pad	Hazardous & Non-hazardous

#### VI. SPILL PROTECTION MEASURES FOR SPECIFIC SOURCES

Area 1 – Containment Pad 10,000 Gallon Capacity

Area 2 – Containment Pad 15,600 Gallon Capacity

Past Spills – None

Possible Cause of Future Spills: Leakage, Rupture

Existing Protection Measures:

1. Always 2 Personnel in Area
2. Visual Inspections of Trucks
3. Spill Control Supplies in Area
4. Emergency Warning Horn

5. Employee Training
6. 1,100 Gallon Holding Tank
7. Pumping Truck

#### **Area 2 – Truck Parking**

Past Spills – None

Possible Cause of Future Spills: Fuel Tank Rupture or Leak

Existing Control Measures:

1. Strict rules ensure loaded Hazardous Waste trucks are on pad.  
Employee Training backed with corrective discipline.

#### **Area 3 – On the Road During Pick Up/Deliveries**

Existing Control Measures:

1. Contingency Plan on all vehicles and in office In-transit contingency plan on all vehicles and in Office.

### **VII. FIRE OR EXPLOSION**

All drums collected from Generator for shipment to disposal facilities remain inside trailers. No drums at any time are removed from that unit to be placed on the ground. In the event of a fire, it should be contained in that unit.

The Standard operational procedures in the event of a fire will be as follows:

- a. Notify all personnel on site and contact the base fire department, informing them of the materials on the trailer. The Sheriff's Office will be informed for traffic control.
- b. Emergency Coordinator will make an immediate assessment of the situation and utilize available fire fighting equipment to extinguish the fire if possible.
- c. Concurrently, the coordinator will have any other trailers removed from the site using the evacuation routes as previously determined and have all nonessential personnel leave the site.
- d. The Coordinator will inform the incident Commander upon arrival of the materials in the trailer and any other information to assist in determining possible hazards to human health or the environment that may result from the incident and require evacuation of surrounding areas.
- e. Immediately after an emergency, the emergency coordinator must provide for treatment, storing or disposing of the recovered waste, contaminated soil or surface water.

- f. All emergency equipment used on the incident is cleaned and fit for its intended use.
- g. Reporting procedures will be completed as outlined on EXTERNAL CALL LIST/REPORTING PROCEDURES.

### **EVACUATION PLAN**

In the event that it is necessary to leave the facility, a warning will be given over the P.A. system to begin evacuation. Trucks will immediately leave through either the east or west gate on First Street. The Primary route will be east on First Street to Ben Durrance Road and the Secondary Route will be going west on First Street and park all vehicles on the west side of the air base.

Office Personnel will evacuate on the same routes upon the sounding of an alarm. (Pages 11, 12, 13)

### **VIII. POLLUTION CONTROL EQUIPMENT ON SITE**

<b>EQUIPMENT</b>	<b>STORAGE LOCATION</b>
Shovels and Rakes	Storage Shed and Loading Dock
Floor Dry Absorbent	Storage Shed and Loading Dock
Vacuum Truck, One Minimum 3,000 Gallons	
First Aid Kits	In All Trucks, Main Office, Loading Dock
Absorbent Pads, 24"x24"x3/4 (Sorbent-Silicate)	Storage Shed and Loading Dock
Tri-reflectors, Miscellaneous Safety Equipment	On All Trucks
Personal Protective Equipment	On All Trucks, Drivers Office, and Loading Dock
Boots	On All Trucks and Storage Shed
Fire Extinguishers 10lb. ABC	1 - Containment Pad, 1 - Drivers Office, 1 - Main Office, 1 - Loading Dock
Respirators and Filters, APR (Organic Vapors, Acid, Ammonia)	Loading Dock, All Trucks, Storage Shed
85 Gallon Steel Recovery Drums	Containment Pad and All Trailers

Safety Shower and Eyewash

Loading Dock

Person responsible for maintenance of Spill/Emergency Response Materials: Mr. Michael Hirst

**IX. SITE SECURITY**

Freehold Cartage, Inc, is located on a corner lot at the Bartow Air Base, Bartow, FL. A six foot high security fence surrounds the facility with entrance and exit gates. The fence is posted with signs that read: "DANGER: UNAUTHORIZED PERSONNEL KEEP OUT". And "HAZARDOUS MATERIALS STORAGE". Two pole lights provide adequate lighting in the evening and night time hours. A Security Guard patrols all areas of the base between the hours of 3:00 P.M. and 7:00 A.M. and the site is located within a mile of Polk County Fire District #2 Firehouse located on the air base.

**X. PERSONNEL TRAINING IN ENVIRONMENTAL PROCEDURES**

All Freehold Cartage, Inc. employees are properly trained in the following:

- a. Operation and maintenance of equipment they must use, and equipment necessary to the prevention or cleanup of environmental spills.
- b. Location of pollution abatement equipment.
- c. Content of all applicable Safety, Health, Personnel Training, and Environmental Regulations.
- d. All Safety, Health and Environmental procedures in effect at Freehold (these include emergency response procedures).
- e. Methods used to avoid environmental incidents/emergencies and the contents of the Emergency/Spill Management Plan.

NOTE: ALL GENERAL FACILITY RULES ARE STRICTLY ENFORCED, SUCH AS:

No Smoking in Operations area or around trucks  
All Drivers MUST complete pre-trip inspection before all trips  
All Employees MUST attend safety and environmental control meetings  
All trucks loaded with Hazardous Waste MUST be parked on the containment pad.  
All spills of any kind MUST be immediately attended to and reported to management  
Wearing of proper personal protective equipment for job is mandatory  
And similar rules as noted on rules poster

ALL FACILITY RULES ARE STRICTLY ENFORCED THROUGH THE USE OF DAY TO DAY SUPERVISION, GUIDANCE, AND CORRECTIVE DISCIPLINE.

## **XI. CLOSURE PLAN**

### **FREEHOLD CARTAGE, INC. FREEHOLD, NEW JERSEY 1989**

Copies of this closure plan are kept in the Freehold Cartage, Inc. Bartow Facility files, in the facility operating record and in the Freehold Cartage, Inc. Freehold, New Jersey Corporate files.

This plan identifies all steps that will be necessary to completely close the transfer facility at the end of its intended operating life. No partial closure will be affected.

Any modifications to our existing operating plans or facility design affecting the Closure Plan will result in Freehold Cartage, Inc., revising and updating the Closure Plan accordingly.

Freehold will maintain an on-site copy of the approved Closure Plan and all revisions to the plan until the Certification of Closure Completeness has been submitted to and accepted by the State of Florida DEP.

Freehold will notify the State of Florida DEP, Southwest district at least 180 days prior to the date we expect to commence closure.

Upon completion of Closure we will submit to the State of Florida DEP, Southwest District a Certification by both Freehold and a local independent registered professional engineer that the facility has been closed in accordance with the specifications in the approved closure plan.

## **I. CLOSURE PERFORMANCE STANDARD (40 CFR 265.111)**

This Closure Plan was designed to insure that the facility will not require further maintenance and controls, minimizes or eliminates threats to human health and the environment, and avoids escape of hazardous waste, hazardous waste constituents, contaminated rainfall runoff, or waste decomposition products to the ground or surface waters or to the atmosphere.

All Freehold Cartage, Inc. transfer facility activities are located within the confines of the concrete pad, so no ground /soil contamination is to be expected during transfer/storage of wastes.

- A. Any leakage/spillage of hazardous wastes/materials onto the impermeable surface would not result in any permanent contamination of that surface after spill clean up.
- B. Any accidental leakage/spillage of hazardous wastes materials onto the uncovered ground (roadways, access ways) on the property during ingress and egress to the

transfer facility impermeable pad would be dealt with immediately as a spill as outlined in the Contingency Plan. No permanent contamination would result necessitating any closure decontamination.

- C. The first containment pad is 40' x 90' and has a capacity for 10,000 gallons in the event of a spill. The second containment pad is 65' x 80' and has a capacity for 15,600 gallons in the event of a spill. The pads drain to a sump which can be pumped to a holding tank or into a vacuum tanker. A chemical analysis will determine which disposal method will be used.

## **II. CLOSURE PLAN: AMENDMENT OF PLAN (40 CFR 265.112 (c))**

In the event that Freehold wishes to amend the approved Closure Plan prior to Final Closure of the facility, we will submit a written request to the State of Florida DEP, Southwest District Office.

Considerations for amending the approved Closure Plan include:

- a. Change in facility size/capacity
- b. Changes in operating procedure
- c. Unexpected events requiring Closure Plan modification
- d. Unexpected events requiring Closure Plan modification during closure

The following amendment time schedule will be adhered to. Freehold Cartage, Inc. will submit the amended Closure Plan to the Southwest District Office:

- a. At least 60 days prior to a proposed change in facility design/operation.
- b. No later than 60 days after an unexpected closure-plan-affecting event has occurred.
- c. No later than 30 days after an unexpected closure-plan-affecting event has occurred during closure.

In the event the Southwest District Office requests a modification of the approved closure plan, Freehold will submit the modified plan:

- a. Within 60 days of the request.
- b. Within 30 days if the request is due to an unexpected event occurring during the closure.

## **III. DISPOSAL OR DECONTAMINATION OF EQUIPMENT, STRUCTURES AND SOILS (40 CFR 265.114)**

During the course of operation of the facility any spill that may occur will be cleaned up immediately under the procedures established by the Contingency Plan. No transfer of any bulk liquid into holding tanks nor placement of drums onto any ground surface area during a transfer will be permitted.

Soils adjacent to the containment pad will be tested for contamination with current test procedures at that time and under the direction of the DEP. In the event contamination is found, all soils will be removed and transported by Freehold's trucks to an approved disposal site.

#### **IV. CERTIFICATION OF CLOSURE (40 CFR 265.115)**

Within 60 days of Completion of Closure, Freehold will submit to the State of Florida DEP, Southwest District Office by registered mail, a certification that the transfer facility has been closed in accordance with the specifications in the approved Closure Plan. The certification will be signed by an authorized Company representative and be a local independent registered professional engineer. Documentation supporting the independent registered professional engineer's certification will be furnished upon request to the Southwest District Office until such time as the Office releases Freehold from any financial assurance requirement for closure. (40 CFR 265.143(h))
