Subject: Parts Washer Ownership

10:25 am I telephoned the Boynton Beach Safety Kleen (SK) to inquire about facilities purchasing parts washers. First I spoke with Ed and he said that facilities are now given the option to purchase the parts washer. I asked if a contract is required and he said he did not know the specifics but that he would transfer my call to Scott. Scott said that SK began selling parts washers to facilities about five or six months ago. I asked if the facility is required to have a contract with SK and Scott said that there is a bill of sale for the parts washer and the facility is given the option of continuing with SK under contract or they may request service at will without a contract.
