

Florida Department of
Environmental Protection
Hazardous Waste Inspection Report

FACILITY INFORMATION:

Facility Name: Environmental Management Conservation

On-Site Inspection Start Date: 05/13/2010

On-Site Inspection End Date: 05/13/2010

ME ID#: 56326

EPA ID#: FLR000000166

Facility Street Address: 8470 NW 68th St, Miami, Florida 33166-2661

Contact Mailing Address: PO Box 520882, Miami, Florida 33152-0882

County Name: Miami-Dade

Contact Phone: (305) 477-7497

NOTIFIED AS:

CESQG (<100 kg/month)

Transporter

Used Oil

INSPECTION TYPE:

Routine Inspection for CESQG (<100 kg/month) facility

Routine Inspection for Used Oil Transfer Facility

Routine Inspection for Used Oil Transporter facility

Routine Inspection for Hazardous Waste Transporter facility

INSPECTION PARTICIPANTS:

Principal Inspector: Chester H. Wendell, Inspector

Other Participants: Maria Leon, President

LATITUDE / LONGITUDE: Lat 25° 50' 4.6497" / Long 80° 20' 7.5499"

SIC CODE: 4212 - Trans. & utilities - local trucking, without storage

TYPE OF OWNERSHIP: Private

Introduction:

Environmental Management Conservation (EMC) is a used oil transporter/transfer facility, hazardous waste transporter, and a Conditionally Exempt Small Quantity Generator (CESQG) of hazardous waste. EMC has been at this location since 1994 and currently employs 14 people. The facility is approximately 38,000 sq ft and is on public utilities.

Process Description:

EMC transports hazardous waste from the customer's facility directly to PermaFix in Fort Lauderdale. EMC picks up used oil, used oil filters, absorbents, and oily water from customers and brings it to their facility to transfer it into tankers and roll offs for final shipments to the receiving facilities. The used oil goes to either Noble Oil or H & J Asphalt. The absorbents are sent to PermaFix, and the used oil filters are taken to US Foundry. Oily water is taken to Cliff Berry.

EMC stores its used oil in an 8,000 gallon tank in secondary containment and in tanker transports located in the parking area.

EMC has a maintenance shop that generates used oil, used oil filters, and parts washing solvent. The parts washer uses diesel and is emptied approximately once a year in to the used oil generated by the shop.

Summary of Potential Violations and Areas of Concern:

Inspection Date: 05/13/2010

Potential Violations

No Violations

Areas of Concern

No Areas of Concern

Conclusion:

Records reviewed during the inspection included: training records for the employees, sampling of the oil picked up and sent out, manifests for the hazardous waste and used oil, proof of insurance, and a copy of their contingency plan.

No items were requested to be sent to the Department for review. EMC appeared to be in compliance at the time of the inspection.

Inspection Date: 05/13/2010

Signed:

A hazardous waste compliance inspection was conducted on this date, to determine your facility's compliance with applicable portions of Chapters 403 & 376, F.S., and Chapters 62-710, 62-730, 62-737, & 62-740 Florida Administrative Code (F.A.C.). Portions of the United States Environmental Protection Agency's Title 40 Code of Federal Regulations (C.F.R.) 260 - 279 have been adopted by reference in the state rules under Chapters 62-730 and 62-710, F.A.C. The above noted potential items of non-compliance were identified by the inspector(s).

This is not a formal enforcement action and may not be a complete listing of all items of non-compliance discovered during the inspection.
