Subject: Onyx follow-up - AERC Retort Facility

Tim,

The powder and devices go to a AERC.COM, Inc. facility in Allentown, Pa. They use a retort but do not give any further detail. The independent lab is Benchmark Analytics in Center Valley, Pa.

Thanks for the update. Do the log sheets indicate what out-of-state facility is being used and what method or enhancements they are using to reach the 99% criteria.

Tim,

The other facility is AERC.COM, Inc. When they submitted their permit renewal application, they included a report dated May 31, 2001, which was current at the time. The normal procedure is for the facility to receive a semi-annual report (as required by the rule) and maintain it in a file at the facility. The District does not have copies in their files. The file at the facility is verified by the DEP inspector. I talked to the facility and they sent two summery log pages that show compliance going back to 11/2000.

Bill P.

Bheem and Bill,

Please check with the District on the other lamp processing facility that was mentioned in our meeting with Onyx to see if they have evaluated that facility and their out-of-state reclamation facility for compliance with the 99% removal criteria.

Bheem and Bill Parker need to go. The Tallahassee facility cannot always meet the mercury removal standard in the rule. They're done some improvements, are closer to meeting the standard but need a variance. A permit mod may be needed.

Doug O and/or Bheem. Doug looked at the original request. Bheem has looked at the recent documents and is interested in the case.

Do you know who from HWR should be involved in this discussion?

Just an informal FYI on distiller results with metal rods added.
Run 868 - 1/21/04 - Before 400mg/kg - After 3.3mg/kg = 99.2%
(duplicated after sample - 2.9mg/kg = 99.3%)
Run 872 - 2/04/04 - Before 420mg/kg - After 5.5mg/kg = 98.7%

When you were here last month, we talked about getting together to discuss the variance. How does March 16th sound? Phill will be down here then. We can meet in either Tallahassee or Pensacola. Let me know if this works.
Looking forward to hearing from you,
