Mr. Sween,
I'm sorry, I just found your notification for PCW transportation from 2001. Please disregard #4 in my email below. On 8700-12 submittals in the future, please check the PCW box on page 4.

Thanks.

Subject: FDEP inspection of Marine Industrial Services on 4/12/11

Mr. Sween,
Thanks again for your help during my inspection yesterday. As promised, here is a re-cap of the items that need correction as I know them right now:

1. There was one 5-gallon bucket and one black drain pan that had a little used oil in them that were not labeled "Used Oil." Please label.
2. Used oil transportation records should include the results of the halogen screening test in accordance with [40 CFR 279.44\(d\)](#). Please mark the manifests for the used oil with the results of the tests.
3. On the used oil tracking log, please include the end use code and the type code (columns E and F) for used oil transportation records.
4. I've looked through your notifications/registrations since 1991 and do not see where MIS has notified DEP that you transport Petroleum Contact Water. There is a check box on our [8700-12 FL Notification of Regulated Waste Activity](#) on the top of page 4 for Petroleum Contact Water (PCW) handler that should be checked. I know you guys just sent in an 8700-12 form a couple months ago, but if you could please send in another with that PCW box checked you'll then be in compliance with the notification requirement of [Rule 62-740.200, FAC](#).

Please let me know, in writing, how each of the above items were corrected. If you have any questions, please feel free to contact me.

Regards,
Jenna Perry
