**Re: Tampa Electric Company (TEC)  
Central Operations Center  
FLD 981 477 904**

Dear Ms. Knauss:

This letter is provided as a follow-up to our telephone conversation yesterday. On 2/12/01, through self-auditing, an employee at TEC's Central Operations Center (COC) discovered a 55-gallon drum of antifreeze reclamation sludge with an accumulation start date of 9/24/01. As COC is managed as a Large Quantity Generator, this hazardous waste exceeds the 90-day accumulation time limit.

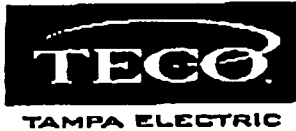

Clark Environmental – Hazardous Waste Division, scheduled this drum for pick up the week of February 18th. I will forward to you a copy of the Hazardous Waste Manifest upon receipt. Please be assured that internal practices have been reviewed and modified to prevent this type of violation from reoccurring. If you have any questions regarding the above, please contact me at (813) 641-5020.

Sincerely,

A handwritten signature in blue ink that reads "Beverly J. Morgan".
