RE: WORLD PETROLEUM CORP ON-SITE INSPECTION DATE 11/08/2011

Dear Ms. Gierczak,

As discussed during your inspections, it is World Petroleum Corporation policy and procedure to remove the lids from each drum and process them as a batch into the roll-off. At the end of the shift the drums and roll-offs are covered and secured in the containment area.

World Petroleum Corporation agrees with the FDEP reminder, all roll-off should be covered when not in use. Please find enclosed pictures of closed drums and Roll-Off as proof of compliance.

Please do not hesitate to call me at (954) 327-0724 should you have any comments or questions.

Sincerely,

Philip Pierre-Louis
Compliance Officer
World Petroleum Corporation
