1943 High St
Longwood, FL 32750-3711

The Florida Department of Environmental Protection has reviewed your application for registration as a transporter or handler for universal waste lamps and devices destined for recycling. Based on the information received, the facility located at **1943 High St, Longwood, FL 32750-3711** has been registered through **March 1, 2013** with the following status:

Facility ID # **FLD984229609**
Transporter of Universal Waste Lamps and Devices
Transfer Facility for Universal Waste Lamps
Transfer Facility for Universal Waste Devices
Small Quantity Handler Facility for Universal Waste Lamps and Devices
(Less than 2,000kg of Lamps (8,000) and/or 100kg of Devices for 1 Year)

The registration form for the year **2013** will be sent to the contact person on your application.

Chapter 62-737, Florida Administrative Code (F.A.C.), (copy enclosed) specifies several other requirements including packaging, training and record keeping for transporters and handlers of and reverse distribution programs for universal waste lamps or devices destined for recycling. These requirements are simple, flexible and make good business and environmental sense (summarized on enclosed fact sheets).

This registration does not allow you to transport or handle universal waste lamps or devices which are destined for landfill or other disposal. The transportation or handling of universal waste lamps or devices destined for disposal is subject to our hazardous waste management regulations under Chapter 62-730, F.A.C.

If any of your facility's information on the Universal Waste Lamp and Device Transporter and Handler Registration Form changes, please notify me at Mail Stop 4555 at the address above. I can also be contacted at (850) 245-8759 or at Laurie.Tenace@dep.state.fl.us.

Sincerely,

RE: Volume Reduction of Hazardous Waste and
Precious Metal Recycling

Dear Mr. Ahmadi:

The Department has determined that Photographic Waste Control Inc. does not need a permit to operate a volume reduction process since they are recycling a precious metal.

Photographic Waste Control has received their EPA Transporter Number (FLD984229609), and is allowed to transport hazardous waste from generators to their facility for volume reduction and precious metal recycling. The sludge generated from the recycling process will be tested for further determination. If the sludge is not hazardous it will be disposed of as a non-regulated waste, but if it is determined to be a hazardous waste, the sludge will be manifested for proper disposal.

The wastewater generated through the reduction process will not be disposed of at the Publicly Owned Treatment Works (POTW) plant as originally planned. Since a cooling tower is utilizing this wastewater, we suggest you contact the Air Section regarding the possible need for a permit.

Please do not hesitate to contact the Hazardous Waste Section at (407) 894-7555 if you have any questions.

Sincerely,

Robert T. Snyder, P.E.
Program Manager
