Environmental Services

STATEMENT OF QUALIFICATIONS

Statement of Qualifications

As we begin the 21st Century, we do so realizing we are stewards of our environment. CBI will serve its clients honestly and economically, knowing we are leaders in the industry. Our strength comes from behaving together; we can make a difference.

Oil Spill Excavation, Port Everglades

Ciff Berry Inc., a national leader in Environmental Services, was incorporated over 30 years ago to provide expert emergency response services and a myriad of environmental solutions to South Florida and beyond. Based in Fort Lauderdale, Florida, CBI has facilities located in Ft. Pierce, Miami, Tampa and Fort Lauderdale, Jacksonville and Cape Canaveral, Florida as well as a facility in Norfolk, VA. From these facilities, we provide services in the areas of environmental response, waste disposal, water treatment, and used oil collection and industrial maintenance. The company's commitment to the environment, decades of experience and a genuine care and concern for their customers is what makes CBI's service unparalleled.

CBI is comprised of over 175 full time employees. Field personnel are 40 hour OSHA certified, confined space trained and receive extensive training in use and maintenance of equipment associated with large-scale environmental response, site remediation work or industrial maintenance.

The management team is rich with experience and interwoven with the finest personnel in the industry. The U.S. Coast Guard or other major environmental service corporations previously employed several of our management team members. Our reputation for quality service and effective work methods stems directly from the daily performance of our employees. It is the personnel who make up "Team CBI" that sets us apart.

Growth and Expansion

Cliff Berry, Inc. has experienced exceptional growth in the environmental industry by providing cost effective environmental services to clients in the Southeastern United States. As a result, our service area has been extended beyond South Florida to encompass the entire United States as well as the Caribbean basin. The company opened five, fully staffed and equipped offices outside of its Fort Lauderdale headquarters over the last five years. CBI has capitalized on its geographic location as the gateway to the Caribbean, offering customers in these areas rapid response to any environmental situation.

CBI will continue to penetrate the marketplace in the Southeastern United States by responding to the environmental, maintenance and emergency response needs of our customer base. As the government continues to determine the need for stricter regulation, CBI will develop programs to meet those needs of current and future customers.

Wastewater and Petroleum Processing

CBI's state of the art water treatment facility located on the Miami River in Miami, Florida has 1.3 million gallons of storage capacity and the capability to treat several types of industrial waste products. Treatment services include oily wastewater and petroleum contact water (PCW), as well as waste oil, oil filters and oily sorbents/rags. Railroad access enables CBI to efficiently perform bulk inter-model transfers for trucks, rail cars and ISO containers. The facility is fully permitted by the State of Florida and Dade County environmental authorities. Oil collected and processed is sold to industrial burners

At present, CBI provides waste treatment to a variety of customers including the oil companies, utility companies, government agencies and major cruise lines. As the Ports of Miami, Port Everglades, Tampa, Jacksonville and Cape Canaveral continue to expand the number of cruise ships sailing from the area, CBI will continue to meet its customer's needs for water treatment services, oily water disposal and hazardous/non-hazardous solid waste treatment.

The CBI Difference

Cliff Berry, Inc.'s strength is in its' people. The CBI team has extensive experience in effectively managing each project, ensuring maximum utilization of available resources. Our approach is customer-centered, always focusing our strengths toward providing the best solutions to our customer's needs.

CBI's solution driven approach has proven to be a benefit to our customers and has gained the respect and recognition of governmental agencies and private corporations. By combining technical expertise and problem solving skills, CBI assists customers in developing a solution that is cost effective and minimizes risk.

At Cliff Berry, Inc. we're client-centered. This approach provides more than just equipment and technical knowledge; we offer a total solution to our customer's environmental needs. CBI has earned a reputation as a leader in the environmental industry based upon a demonstrated understanding of governmental regulations and experience in managing critical projects.

Cliff Berry, Inc. has coordinated and been involved in a number of unique projects impacting our environment. A representative sample of these projects include:

- Carnival Cruise Lines MV Ecstasy, Fire Damage
- Carnival Cruise Lines MV Paradise, Wet Berth
- Delphic Lab, Lab pack over 4,000 chemicals
- Disney Cruise Lines
- Fine Air, Plane Crash
- Igloo Moon, Grounding
- Industrial Tank Cleaning, Coastal Fuels
- Industrial Tank Cleaning, FPL
- Industrial Tank Cleaning, GATX
- MV Firat, Emergency Response
- MV Hind, Grounding
- MV Julie N, Oil Spill
- Morris J. Berman, Oil Spill
- Powell Duffryn, Chemical Spill
- Three Vessel Collision, Oil Spill
- Port of Miami
- Port of Miami
- Miami, Florida
- Port Canaveral, Florida
- Miami, Florida Airport
- Key Biscayne, Florida
- South Florida, Bahamas
- South Florida
- South Florida
- Ft. Lauderdale, Florida
- Ft. Lauderdale, Florida
- Portland, Maine
- San Juan, Puerto Rico
- Savannah, Georgia
- Tampa, Florida

CBIS Services

Cliff Berry Incorporated offers the "total solution" package of environmental services, providing quality, cost effective expertise in the areas of:

- 24 hour emergency oil and chemical spill response
- Waste water collection processing
- Industrial maintenance
- Confined space entry for both shipboard as well as industrial applications
- Industrial cleaning onboard vessels of all sizes
- Transportation, disposal and recycling of used oil & oil filters, industrial wastewater bilge water and petroleum contact water (PCW)
- Site remediation
- Tank cleaning and UST removal
- Complete vacuum truck service
- Excavations, transportation and processing of contaminated soil, absorbents and sludge
- Hydro-blasting and surface coatings
- Hazardous waste minimization, transportation and disposal management

CBI Miami Wastewater Pretreatment Facility

The Cliff Berry, Inc. (CBI) Miami Wastewater Pretreatment (Miami Terminal) is South Florida's largest commercial wastewater treatment plant. CBI provides the most comprehensive wastewater treatment services to the cruise industry, utilities and major oil companies. The plant has a capacity to process in excess of 288,000 gallons of oily wastewater per day. The facility is permitted by DERM to discharge ≥ 6.3 million gallons per month of treated water to the public operated treatment works (POTW).

The treated waste is batch tested for compliance with maim-Dade Department of Environmental Resources Management (DERM) and the Environmental Protection Agency (EPA) regulated pollutant standards prior to discharge to Miami-Dade Water and Sewer Department (POTW).

Our in house "State of the Art" laboratory is centered around a Perkin Elmer Gas Chromatograph. The laboratory is supervised by a degreed chemist with more than fifteen years of experience in wastewater treatment, processing and disposal. Upon completion of treatment and discharge of the wastewater, a "Certificate of Disposal" is available to each client to certify compliance with local, state and federal regulatory agencies.

The CBI Miami Facility is efficient, clean and utilized oil/water separation, aeration and clarification techniques. This technology allows CBI to treat wastewater from a variety of industrial clients.

GENERAL FACILITY INFORMATION

Facility Name: Cliff Berry, Inc. – Miami Terminal
Address: 3033 NW North River Drive
Miami, Florida 33142
Telephone: 305-638-2030
Fax: 305-638-0610

CERTIFICATE OF REGISTRATION
FOR REGISTRATION YEAR(S) 2007-2010

Registrant:

CLIFF BERRY INC
Attn: MARK T. HOOVER
PO BOX 13079
FORT LAUDERDALE, FL 33316

This certifies that the registrant is registered with the U.S. Department of Transportation as required by 49 CFR Part 107, Subpart G.

This certificate is issued under the authority of 49 U.S.C. 5108. It is unlawful to alter or falsify this document.

Reg. No: 062607 551 007PR Issued: 06/26/2007 Expires: 06/30/2010

Record Keeping Requirements for the Registration Program

The following must be maintained at the principal place of business for a period of three years from the date of issuance of this Certificate of Registration:

- (1) A copy of the registration statement filed with PHMSA; and
- (2) This Certificate of Registration

Each person subject to the registration requirement must furnish that person's Certificate of Registration (or a copy) and all other records and information pertaining to the information contained in the registration statement to an authorized representative or special agent of the U. S. Department of Transportation upon request.

Each motor carrier (private or for-hire) and each vessel operator subject to the registration requirement must keep a copy of the current Certificate of Registration or another document bearing the registration number identified as the "U.S. DOT Hazmat Reg. No." in each truck and truck tractor or vessel (trailers and semi-trailers not included) used to transport hazardous materials subject to the registration requirement. The Certificate of Registration or document bearing the registration number must be made available, upon request, to enforcement personnel.

For information, contact the Hazardous Materials Registration Manager, PHH-62, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, 1200 New Jersey Avenue, SE, Washington, DC 20590, telephone (202) 366-4109.

RE: Renewal of Certificate for Discharge Cleanup Organization
Dear Mr. Berry:

You are currently listed as an Approved Discharge Cleanup Organization (DCO) for the State of Florida. We are extending the expiration date of your DCO Certificate to June 30, 2008. Please notify this office of any significant changes in your capabilities as a DCO, as well as, changes in addresses, phone numbers, or contacts. You may also e-mail my secretary at Sandra.T.Strickland@dep.state.fl.us with these changes.

Retain a copy of this letter with your most current DCO certificate as evidence of your certification status. If you have any questions, please call Sandra Strickland at (850) 245-2010 or contact your District Emergency Response Manager.

Sincerely,

P. Wiczynski, Chief
Bureau of Emergency Response

**LIQUID WASTE TRANSPORTERS
ANNUAL OPERATING PERMIT**

DESCRIPTION OF FACILITY/EQUIPMENT

This document, issued under the provisions of Chapter 24, Miami-Dade County Code (Dade County Environmental Protection Ordinance), shall be valid from April 01, 2007 through March 31, 2008. The above named permittee, is hereby authorized to operate as a Liquid Waste Transportation business from the above location, and with the equipment bearing the 76 identifying sticker(s) included with this permit.
This facility is subject to conditions listed below and in the following pages (if any) of this permit.

SPECIFIC CONDITIONS

1. Correctly completed monthly reporting forms and corresponding fees are required to be submitted to DERM on or before the 10th of the following month.

2. No hazardous waste shall be transported under this permit.

3. All waste transportation equipment shall be maintained in good working order at all times. Valves, hoses, tanks, etc., shall be properly maintained and shall not leak.

4. All waste oil and waste water must be sold or disposed of in accordance with all local, state and federal regulations.

5. Only waste oil, oily waste water and non-hazardous industrial waste shall be transported under this permit. Radiator fluid shall not be transported under this permit.

GENERAL CONDITIONS

6. The applicant, by acceptance of this document, agrees to operate and maintain the subject operation so as to comply with the requirements of Chapter 24 of the Code of Miami-Dade County.

7. If for any reason, the applicant does not comply with or will be unable to comply with any condition or limitation specified on this document the applicant shall immediately notify and provide the department with the following information: (a) a description of and cause of non-compliance; and (b) the period of non-compliance including exact dates and times; or, if not corrected, the anticipated time the non-compliance is expected to continue, and steps taken to reduce, eliminate, and prevent recurrence of the non-compliance. The applicant shall be responsible for any and all damages which may result and may be subject to enforcement action by the department for penalties or revocation of this document.

8. As provided in Section 24-15 of the Code of Miami-Dade County, the prior written approval of the Department of Environmental Resources Management shall be obtained for any alteration to this facility.

ANNUAL OPERATING PERMIT**

DESCRIPTION OF FACILITY/EQUIPMENT

This document, issued under the provisions of Chapter 24, Miami-Dade County Code (Dade County Environmental Protection Ordinance), shall be valid from April 01, 2007 through March 31, 2008. The above named permittee, is hereby authorized to operate as a Liquid Waste Transportation business from the above location, and with the equipment bearing the 67 identifying sticker(s) included with this permit.
This facility is subject to conditions listed below and in the following pages (if any) of this permit.

SPECIAL CONDITIONS

1. Correctly completed monthly reporting forms and corresponding fees are required to be submitted to DERM on or before the 15th of the following month.

2. All hazardous waste shall be transported only to an approved transfer station or to an approved hazardous waste disposal site. No storage or disposal of hazardous waste is permitted in Miami-Dade County unless prior approval of this department is received.

3. All hazardous waste shall be transported in D.O.T. approved containers and vehicles.

4. The Uniform Hazardous Waste Manifest Document Number shall be listed on the Liquid Waste Transporter Monthly Reporting Form for each shipment of hazardous waste transported within Miami-Dade County. In the event a manifest is not required by federal regulations, the number of the official bill of lading or invoice shall be substituted. Upon written request of DERM, a copy of the Uniform Hazardous Waste Manifest, bill of lading or invoice shall be submitted within fifteen days of receipt of the request.

5. All spills must be promptly reported to this department by the transporter at (305)372-6789. Any vehicle containing hazardous waste which is stored in Miami-Dade County overnight without prior approval must be reported to this department by the transporter at (305) 372-6820.

GENERAL CONDITIONS

6. The applicant, by acceptance of this document, agrees to operate and maintain the subject operation so as to comply with the requirements of Chapter 24 of the Code of Miami-Dade County.

7. If for any reason, the applicant does not comply with or will be unable to comply with any condition or limitation specified on this document the applicant shall immediately notify and provide the department with the following information: (a) a description of and cause of non-compliance; and (b) the period of non-compliance including exact dates and times, or, if not corrected, the anticipated time the non-compliance is expected to continue, and steps taken to reduce, eliminate, and prevent recurrence of the non-compliance. SPECIFIC CONDITIONS

1. Correctly completed monthly reporting forms and corresponding fees are required to be submitted to DERM on or before the 10th of the following month.
2. Accidental spills must be promptly reported to this department by the transporter at (305) 372-6789.
3. No material other than radiator fluid shall be transported under this permit. No hazardous waste or untreated wastewaters from radiator boil out or test tanks shall be transported under this permit.
4. All waste transportation equipment shall be maintained in good working order at all times. Valves, hoses, tanks, etc., shall be properly maintained and shall not leak.
5. All sludges resulting from the transport, handling or treatment of the radiator fluid shall be disposed of as hazardous waste. This hazardous waste shall be transported by a DERM - permitted hazardous waste transporter, and copies of a properly executed Uniform Hazardous Waste Manifest shall be submitted.
6. Only facilities with a valid Miami-Dade County Pollution Control Facility Annual Operating permit shall be serviced.
7. Samples and/or analysis of materials transported will be supplied at the request of DERM.
8. It shall be unlawful to discharge used coolant, flush out or test tank waters into septic tanks, storm drains, soakage pits, or onto ground surface.
9. All radiator fluid shall be treated as an industrial wastewater and shall not be discharged to any sewage treatment plant without prior approval from DERM.

DESCRIPTION OF FACILITY/EQUIPMENT

This document, issued under the provisions of Chapter 24, Miami-Dade County Code (Dade County Environmental Protection Ordinance), shall be valid from April 01, 2007 through March 31, 2008. The above named permittee, is hereby authorized to operate as a liquid waste transportation business from the above location, and with the equipment bearing the 43 identifying sticker(s) included with this permit.
This facility is subject to conditions listed below and in the following pages (if any) of this permit.

SPECIFIC CONDITIONS

1. Correctly completed monthly reporting forms and corresponding fees are required to be submitted to DERM on/or before the 10th of the following month.

2. No waste other than residential septic tank, restaurant grease trap and DERM approved industrial waste waters shall be transported under this permit.

3. No waste from an industrial facility or industrial holding tank shall be pumped out unless previous approval is obtained from DERM. All approved industrial waste waters transported shall be listed separately on the liquid waste transporters Monthly Report, detailing name of source, address, date, amount of waste, and location of disposal.

4. No hazardous waste shall be transported under this permit.

5. All waste transportation equipment shall be maintained in good working order at all times. Valves, hoses, tanks, etc., shall be properly maintained and shall not leak.

6. All waste material shall be deposited (dumped) at an approved disposal site. The only approved disposal sites in Miami-Dade County are: Virginia Key and Black Point sewage treatment plants.

7. No waste shall be deposited at any other site or structure in Miami-Dade County.

GENERAL CONDITIONS

8. The applicant, by acceptance of this document, agrees to operate and maintain the subject operation so as to comply with the requirements of Chapter 24 of the Code of Miami-Dade County.

9. DESCRIPTION OF FACILITY/EQUIPMENT

This document, issued under the provisions of Chapter 24, Miami-Dade County Code (Dade County Environmental Protection Ordinance), shall be valid from April 01, 2007 through March 31, 2008. The above named permittee, is hereby authorized to operate as a Liquid Waste Transportation business from the above location, and with the equipment bearing the 24 identifying sticker(s) included with this permit.

This facility is subject to conditions listed below and in the following pages (if any) of this permit.

SPECIFIC CONDITIONS

1. Correctly completed monthly reporting forms and corresponding fees are required to be submitted to DERM on or before the 10th of the following month.

2. No waste other than biohazardous waste shall be transported under this permit.

3. All containers, bags and vehicles used for the transport of biohazardous waste shall be properly maintained and operated in order to preclude any leaking, spills, etc. A satisfactory method of secondary containment shall be utilized. Any primary container which leaks shall be repackaged immediately.

4. All biohazardous waste will be incinerated or properly treated before disposal at an approved landfill.

5. Trucks shall be disinfectant on a routine basis. Upon written request of this department, plans shall be submitted describing frequency and methodology of disinfection. Said plans shall be submitted within 15 days of receipt of the written request.

6. Used needles and sharps shall be properly treated and disposed of within 10 days of collection. All other biohazardous waste shall be incinerated or properly treated within 48 hours of collection, unless alternate plans have been specifically approved by this department.

7. No biohazardous waste shall be stored in Miami-Dade County without prior approval of this Department.

8. Transporters of biohazardous waste shall provide each customer with a receipt for all material picked up. This receipt will contain the date, type and approximate weight of biohazardous waste removed.

GENERAL CONDITIONS

9. The applicant, by acceptance of this document, agrees to operate and maintain the subject operation so as to comply with the requirements of Chapter 24 of the Code of Miami-Dade County.

STORAGE TANK REGISTRATION

This placard certifies that the owner & facility named has complied with the registration requirements for petroleum &/or hazardous substance storage tanks regulated by the FL Department of Environmental Protection. The placard must be placed out of the weather and in plain view of storage tank compliance inspectors entering the facility.

SECONDARY CONTAINMENT INSTALLATION DEADLINES

12-31-2009: Single-wall USTs & UST small diameter piping in contact with the soil must have secondary containment

01-01-2010: Single-wall field erected ASTs & AST single-wall bulk product piping in contact with the soil must have secondary containment unless deferred by an API 570 Integrity Assessment.

The Department has never issued an extension to an upgrade deadline since the storage tank rules were adopted in 1984. If you have questions about these or other deadlines - or need general technical assistance - consult Rule 62-761, F.A.C., or contact a storage tank inspector from the DEP district office, or from the local storage tank program office for your county.

INDUSTRIAL WASTE PRETREATMENT ANNUAL OPERATING PERMIT

DESCRIPTION OF FACILITY/EQUIPMENT

This document, issued under the provisions of Chapter 24, Miami-Dade County Environmental Protection Ordinance, shall be valid from 01-JUN-2007 through 31-MAY-2008. The above named permittee, is hereby authorized to operate the pollution control facility at the above location which consists of the following:

A 210,040 GPD pretreatment system for a centralized waste treatment (Subpart D) facility for Metals, Oils and Organic Wastewaters with: A) SECONDARY CONTAINMENT for 1) Twenty-six AG Tanks discharging stormwater through a vertical tube coalescer to existing trench drain; 2) Pretreatment System and drums in holding area, inside building; 3) Concrete truck ramp with 9 in. curb for collection of spills in receiving tank area; 4) Roll-off storage area. B) PRETREATMENT SYSTEM with two parallel tanks, as needed: 1) a 200 gpm vertical tube coalescer unit; b. Two 350 gal Flash Mix tanks with flocculant, coagulant and pH feeds; c. A 50 gpm DAF unit, 8' diameter, with an air absorption tank; d. Sludge system with a 600 gal. sludge tank, BP plate and frame filter press. 2) a. A 2000 gal. O/W Separator with a 200 gal. Oil collection hopper; b. A 3900 gal. three stage DAF chemical conditioning tanks with pH adjustments and polymer feed from a 50 gal. polymer tank, c. A 150 gpm DAF unit with a 450 gal. pressure recycle tank; d. A 1200 gal. effluent wetwell and a 1300 gal. pH adjustment tank; e. Sludge System with a 300 gal. flotation holding tank, two 3000 gal. sludge holding tanks feeding to an Alar Rotary Drum Vacuum Filter with fly ash feed for bulking. 3) Polishing System including a. Air Stripping system (500 gpm) with a shallow Tray Air Stripper, b. A 500 gal. holding tank, injected with Chlorine Dioxide, discharging to horizontal tanks #13 & 14, and two 100 gpm Carbon Filters in series, c. Chlorine Dioxide generator system. 4) Adjustable rate flow controllers with meters to record influent and effluent rates. C) STANDBY POLISHING SYSTEM with 1) a 105 GPM oil/water separator equipped with a vertical tube coalescer, 2) Two 80 gpm carbon filters. Effluent from separator discharges to sanitary sewers or to carbon filters.

D) OIL SEPARATION/RECOVERY SYSTEM with 1) A 126,000 gallon vertical used oil storage tank (Tank #1); 2) Four 25,000 gal. horizontal oil heating tanks (Tanks #22, 23, 24, 25) 3) Oil Heater with a 10,000-gal. oil supply tank; 4) Four heat exchangers in series, an 8' diameter vapor recovery tank, a 6' diameter vapor distillation tower with a 6' diam. distillation water tank, a 6' diam. vapor clean oil tank and ancillary pumps and piping; 5) Cooling Towers (2) for distillation system. E) SAMPLING POINT at spigot before pump station, or alternatively, at the discharge to the pump station. Flow meter for discharge from pump station to public sewers. F) ANTIFREEZE RECYCLING SYSTEM with no discharges to sewers: 1) Two 1,700 gal. used antifreeze holding tanks; 2) A 200 gal. treatment and a 275 gal. oil separator tanks; 3) Filtering system with 100, 25 and 5 micron filters; 4) A 600 gal. antifreeze holding tank; 5) Secondary containment and chemical totes (3) as per approved plans. G) SING DISCHARGE CONTROL PLAN as approved by the Department.

**PRIVATE SANITARY SEWER
ANNUAL OPERATING PERMIT**

DESCRIPTION OF FACILITY/EQUIPMENT

This document, issued under the provisions of Chapter 24, Miami-Dade County Code (Dade County Pollution Control Ordinance), shall be valid from 01-OCT-2006 through 30-SEP-2007. The above named permittee is hereby authorized to operate the pollution control facility at the above location which consists of the following:

PUMP STATION(S):

Number of Stations:1
Number of Pumps:2, Submersible
Alarm System:Audio & Visual
Number of Sewer MH:N/A

COLLECTION SYSTEM:

This facility is subject to conditions listed below and in the following pages (if any) of this permit.

SPECIFIC CONDITIONS

1. The collection/transmission facility shall be operated continuously in such a manner that maximum level of efficiency is maintained at all times and in full compliance with Rule 62-604, Florida Administrative Code.
2. All privately-owned or operated sanitary sewer collection systems, which have sanitary sewer pumping stations shall provide each pump with a fully operational and working non-resettable elapsed time (ET) meter as required by Section 24-42.2(2)(a) of the Code. Monthly totalized meter readings of the total number of hours for each pump shall be recorded by the permittee on the Private Sewage Pump Station Elapsed Time Meter Form and made available to regulatory officials upon request.
3. The permittee shall obtain a Domestic Wastewater Collection/Transmission System Construction permit and notify this Department before making any modifications of the sanitary sewer collection system that may change the capacity of the system.
4. The Permittee shall provide an Operations and Maintenance Manual for this collection/transmission facility. A copy of the approved manual shall be maintained at the facility site. The manual shall be updated annually whenever the system is modified or enlarged, or as required by new regulatory actions pursuant to Chapter 24-42.2(5)(b) of the Code. The facility shall be maintained in accordance with the practices described in the approved Operations and Maintenance Manual. Logbooks required by the manual shall be maintained at the facility in a location protected from the weather.

CANAVERAL
PORT AUTHORITY

January 25, 2007

Cliff Berry, Inc.
Bill Parkes
851 Eller Drive
Box 13079
Ft. Lauderdale, FL 33316-0000

RE: PERMIT TO OPERATE

To Whom It May Concern:

Effective this date, the Canaveral Port Authority (Permitter) hereby gives its permission for Cliff Berry, Inc. to operate under the category of Waste Oil Disposal, Permit #01-60 on the lands and waters under the jurisdiction of the Canaveral Port Authority.

The Permittee agrees to indemnify and hold harmless the Canaveral Port Authority from any loss, damage or liability caused in whole or in part by the wrongful act of omission on the part of the Permittee in its activities under this Permit to Operate.

The Permittee agrees to carry public general liability insurance in coverage acceptable to the Permitter, as per the Tariff, for personal injury or property damage to others, such coverage to include protection of the Permitter as to the indemnity provision herein. And provide a certificate of insurance and a copy of the additional insured endorsement or blanket endorsement naming the Canaveral Port Authority as additionally insured. And auto insurance proof when permit requires it.

The Permittee, in consideration for the granting of this Permit, shall at all times abide by the terms of this Permit and all rules and regulations of the Canaveral Port Authority, including Tariff # 12.

The Permittee agrees to keep their account current and not past due or risk permit being revoked.

This Permit, unless otherwise revoked, shall expire on the last day of December 2007.

Very truly yours,

CANAVERAL PORT AUTHORITY

Chad Shields
Assistant Director of Operations

STORAGE TANK REGISTRATION

This placard certifies that the owner & facility named has complied with the registration requirements for petroleum &/or hazardous substance storage tanks regulated by the FL Department of Environmental Protection. The placard must be placed out of the weather and in plain view of storage tank compliance inspectors entering the facility.

SECONDARY CONTAINMENT INSTALLATION DEADLINES

12-31-2009: Single-wall USTs & UST small diameter piping in contact with the soil must have secondary containment.
01-01-2010: Single-wall field erected ASTs & AST single-wall bulk product piping in contact with the soil must have secondary containment unless deferred by an API 570 Integrity Assessment.

The Department has never issued an extension to an upgrade deadline since the storage tank rules were adopted in 1984. If you have questions about these or other deadlines - or need general technical assistance - consult Rule 62-761, F.A.C., or contact a storage tank inspector from the DEP district office, or from the local storage tank program office for your county.

PERMITTEE:

Cliff Berry, Incorporated
P.O. Box 13079
Fort Everglades Station
Fort Lauderdale, Florida 33316

Attention:
Mr. William E. Parkes

Regulatory Affairs Manager

This permit is issued under the provisions of Section 403.769 of Florida Statutes (F.S.), Chapters 62-4, 62-701, 62-710 and 62-730 of Florida Administrative Code (F.A.C.), and 40 Code of Federal Regulations (CFR) Part 279. The above named Permittee is hereby authorized to perform the work or operate the facility shown on the application and approved drawing(s), plans, and other documents attached hereto or on file with the Department and made a part hereto and specifically described as follows:

TO OPERATE: A Used Oil Processing Facility hereafter referred to as the "Facility". The Used Oil Processing Facility is located on an approximately 1.8-acre parcel of land owned by C-2 Holdings, Inc. in Hillsborough County at 5218 St. Paul Street, Tampa, Florida 33619. A diagram of the site layout is included as Attachment A.

The facility is authorized to process used oil, oily wastewater, petroleum contact water, and used oil filters under this permit.

The facility consists of two (2) 30,000 gallon tanks, six (6) 25,000 gallon tanks and two (2) 15,000 gallon tanks. All tanks are located within the secondary containment unit as shown on drawing C-5, Foundation Plan dated July 11, 2003. The area of the tank farm is 2,855 square feet. Two (2) existing 10 ft. diameter tanks, registered and used as a used oil transfer facility, are not part of the permitted facility and shall be closed as used oil tanks within 60 days after the Department authorizes use of the permitted facility.

The following documents were used in preparation of this permit:

1. Used Oil Processing Facility Permit Application dated June 12, 2003.
2. Additional information dated August 27, 2003 and December 26, 2003.
3. Minor Permit Modifications application dated March 7, 2006 and additional information dated March 24, 2006.

**2007-2008 Storage Tank Registration Placard Enclosed **

CLIFF BERRY INC
ATTN: BILL PARKES JR
PO BOX 13079
FORT LAUDERDALE FL 33316-0100
PLACARD NO: 272404
PLACARD ISSUED: 05/23/2007
REGISTRATION PAID: \$ 125

STCM ACCOUNT: 4244
TANK SYSTEMS REGISTERED: 5

STORAGE TANK FACILITY ACCOUNT OWNER, PLEASE RETAIN THE TOP STUB FOR YOUR RECORDS

This placard certifies that the owner & facility named has complied with the registration requirements for petroleum &/or hazardous substance storage tanks regulated by the FL Department of Environmental Protection. The placard must be placed out of the weather and in plain view of storage tank compliance inspectors entering the facility.

SECONDARY CONTAINMENT INSTALLATION DEADLINES
12-31-2009: Single-wall USTs & UST small diameter piping in contact with the soil must have secondary containment.
01-01-2010: Single-wall field erected ASTs & AST single-wall bulk product piping in contact with the soil must have secondary containment unless deferred by an API 570 Integrity Assessment.

The Department has never issued an extension to an upgrade deadline since the storage tank rules were adopted in 1984. If you have questions about these or other deadlines - or need general technical assistance - consult Rule 62-761, F.A.C., or contact a storage tank inspector from the DEP district office, or from the local storage tank program office for your county.

DEPARTMENT OF ENVIRONMENTAL PROTECTION IS ON THE INTERNET

The Web address for DEP is <http://www.dep.state.fl.us>
You can access the site for Storage Tank Regulation directly by using: <http://www.dep.state.fl.us/waste/categories/tanks>
Look under the HIGHLIGHTS section to find links to storage tank rules, forms, database reports and other program information.

EMAIL registration-related questions and comments to: TankRegistration@dep.state.fl.us - or telephone (850) 245-8839.
Registration staff members will assist you with your questions and will respond to you by phone or reply to your email address.

The Storage Tank Registration placard below must be posted at the facility.
It must be placed out of the weather and in plain view of inspectors entering the facility.

ANALYSIS PLAN

Cliff Berry Inc

Used Oil Analysis Plan

General:

A: This Analysis Plan is applicable to all used oil processing operations at Cliff Berry Inc (CBI) facilities. The purpose of this plan is to detail those procedures which CBI employees must follow when complying with the used oil analysis requirements contained in 40 CFR 279.53.

B: A copy of this plan must be retained at each facility processing used oil. Each facility manager is responsible to ensure this plan is adhered to. If any errors, omissions or modifications to this plan are identified, they should be reported to the Director of Petroleum Services for review and update to this plan.

Procedures:

A: Drivers of used oil collection trucks will adhere to the following procedures when collecting used oil for delivery to a CBI facility.

Prior to collecting used oil, the driver will utilize a TFFF, Halogen Leak Detector to determine if the used oil contains elevated levels of halogens. If the leak detector indicates an elevated level of halogens, the driver will perform a field test using a DEXSIL Kit (CHLOR-D-TECT) Q-4000 to verify if the level is > than or < than 1000 parts per million (PPM). The DEXSIL kit conforms to EPA SW-846 Method 9077. A record of the halogen test result must be recorded on the manifest and job ticket.

Any time a DEXSIL Kit is used on site, a representative sample of the used oil must be taken. If it is determined that a client's oil has an elevated halogen level (>1000 PPM), then the used oil must not be loaded onto the truck. The sample must be retained by the driver and returned to his manager at CBI so a rebuttable presumption may be performed on the sample.

If, after re-testing, it is determined that the source of the halogens is from an inorganic source (chlorides, salt water), the oil may be removed for disposal as a non-hazardous liquid. If it is determined that the used oil has been mixed with a halogenated hazardous waste as defined in 40 CFR Part 261, the owner or operator must be immediately contacted and advised of the situation. CBI will then manage the used oil as a hazardous waste and arrange for proper disposal.

B: Upon arrival at a CBI facility, each used oil truck will have a composite sample of its load taken prior to off-loading. The sampling procedures to be followed must be consistent with the sampling of petroleum products guidelines (based upon API/MPMS chapter 8.1) attached as Appendix A. All samples of used oil (in-bound & out-bound) are to be retained at each CBI facility for a period of 90-days.

Use a DEXSIL Kit (CHLOR-D-TECT) Q-4000 to determine the amount (PPM) of halogens in the oil sample. Follow the directions on the kit for the preparation & analysis of the sample. A copy of the DEXSIL Kit (CHLOR-D-TECT) Q-4000 directions is attached as Appendix B.

If the used oil contains greater than 1000 PPM halogens, a rebuttable presumption may be performed. See attached Appendix C for rebuttable presumption flowchart.

C: On-Specification used oil that is to be burned for energy recovery must be sampled and sent to a certified laboratory to determine if it meets the fuel specifications of 40 CFR Part 279.11 prior to processing and/or re-refining. Representative sampling will be done on batch loads of up to 75,000 gallons. Sampling will be conducted in accordance with the sampling procedures detailed in Appendix A.

The analysis of the used oil will be consistent with the appropriate analytical procedures used to determine whether a sample contains a given toxic constituent in accordance with EPA Publication SW-846, "Testing Methods for evaluating Solid Waste, Physical / Chemical Methods"

All on-specification used oil fuel must meet the following specifications:

Constituent / Property	Allowable Level
Arsenic	5 PPM Max
Cadmium	2 PPM Max
Chromium	10 PPM Max
Lead	100 PPM Max
Flash Point	100° F Minimum
Total Halogens	1000 PPM Max

Records of analysis conducted or information used to comply with the tracking requirements of 40 CFR Part 279 must be maintained for at least three years.

When tests are done to verify percent water and flash-point in the oil, they are to be conducted in accordance with the test procedures detailed in Appendix D and Appendix E respectively.
