Inspection Summary

Dear Mr. Paquette:

A hazardous waste compliance inspection was conducted at your facility on March 27, 2003. The inspection was conducted under the authority of Section 403.091, Florida Statutes, and Chapter 403, Part IV, Florida Statutes, and is designed to determine the compliance status of your facility with Title 40 Code of Federal Regulations Parts 260 through 268 and 279, as adopted in Florida Administrative Code (F.A.C.) Chapters 62-710 and 62-730. Attached is a copy the Inspection Report, which summarizes the inspection and corrective actions,

Based on the amount of hazardous waste generated and having reviewed the operations and records at the facility, the facility appears to be a Transporter of hazardous waste. If you have any questions, please contact me at (407) 893-3323.

Sincerely,

Janine Kraemer

Inspection

On March 27, 2003, Janine Kraemer and Bruce Rutherford, Florida Department of Environmental Protection, accompanied by Alan Paquette, President of A.R. Paquette, inspected A.R. Paquette & Co. Inc. The company has been issued EPA ID number FLD982105884. The facility is a hazardous waste transporter and operates 34 trucks.

The facility had an emergency incident March 17, 2003 (Figure 1) in which a trailer parked at A. R. Paquette & Co. was destroyed. Waste peroxide paste picked up from a facility had caused an explosion and fire. The local fire department responded and was able to control the fire. The contents of the drum were later determined to be old and probably unstable.

The facility conducts routine maintenance on their vehicles. Used oil is stored in a 200-gallon tank, labeled "used oil." Waste antifreeze is stored in a 55-gallon drum and reused in the trucks. Used oil filters are stored in two 55-gallon drums, labeled "used oil filters." Employees maintain a SystemOne parts washer. A high flash mineral spirit is used in the parts washer. Sludge from the parts washer is disposed of with used oil. Unifirst launders the shop towels.

Records

Review of the hazardous waste manifests maintained by the facility found no violations. Used oil filters are disposed of with Perma Fix. Used oil is disposed of with Central Florida Used Oil Service. AAA Battery is recycling batteries for the facility.

Training records were in order for the drivers. The facility had notified the proper authorities of the incident on March 17, 2003. A transporter contingency plan was also available at the time of the inspection.

The issue of the use of "CESQG" in place of an EPA identification number on the hazardous waste manifest was also discussed. Mr. Paquette was informed that Department inspectors had noted instances involving hazardous waste transporters, where hazardous waste was transported from sites that do not appear to be CESQGs.

CONCLUSION:

At the time of this inspection, A.R. Paquette was operating as a hazardous waste transporter and was in compliance.
