

State law requires we notify immediately the state warning point 1-800-320-0519 of any spill of a petroleum product over 24 gallons. Ismael Vargas will handle that, or Joaquin Canamero.

Any unplanned or uncontrolled release or discharge of any hazardous or regulated material into the air, water or soil must be reported immediately to Ismael Vargas at 786-402-4073. If a release cannot adequately be controlled or contained or if it poses an immediate danger to life, health or environment, the following steps must be followed.

Determine the nature and extent of the spill

Chemical(s) involved

Amount released

Any injured people involved

Source and cause of the release

Area of population affected

Other special considerations (weather, fire etc.)

The Emergency Coordinator will contact the fire department when the situation is serious. He will file a report with the Southeast District of the Florida Department of Environmental Protection in West Palm Beach at 561-681-6722.

In the event of fire, explosion, or other release that could threaten human health outside the facility, or if you know the spill has reached surface water: Call the National Response Center at (800) 424-8802.

End

This training reviewed with the appropriate personnel at least once each year.
