

**Florida Department of  
Environmental Protection  
Hazardous Waste Inspection Report**

---

**FACILITY INFORMATION:**

**Facility Name:** American Compliance Technologies Inc  
**On-Site Inspection Start Date:** 01/10/2013      **On-Site Inspection End Date:** 01/10/2013  
**ME ID#:** 41912      **EPA ID#:** FLR000011049  
**Facility Street Address:** 1875 W Main St, Bartow, Florida 33830-7718  
**Contact Mailing Address:** 1875 W Main St, Bartow, Florida 33830-7718  
**County Name:** Polk      **Contact Phone:** (863) 533-2000

**NOTIFIED AS:**

CESQG (<100 kg/month)  
Transporter  
Used Oil

**INSPECTION TYPE:**

Routine Inspection for Used Oil Transfer Facility

**INSPECTION PARTICIPANTS:**

**Principal Inspector:** Eliazbeth Knauss, Environmental Manager  
**Other Participants:** Melissa Madden, Environmental Specialist; Steve Tafuni, Environmental Specialist;  
Kelly Winter

**LATITUDE / LONGITUDE:** Lat 27° 53' 48.1223" / Long 81° 51' 57.5606"

**SIC CODE:** 1799 - Construction - special trade contractors, nec

**TYPE OF OWNERSHIP:** Private

**Introduction:**

A joint Solid Waste and Hazardous Waste inspection was conducted at American Compliance Technologies (ACT), a registered hazardous waste transporter and used oil transfer facility. The Solid Waste Program report is being prepared under separate cover. Kelly Winter provided assistance during the inspection, and Ann Wortman provided additional information and documents during preparation of this report. Company operations have not changed significantly since the previous hazardous waste program inspection in July, 2010. The company is in the process of constructing a new office building, which will be used to provide training in association with Florida Polytechnic University.

**Process Description:**

ACT offers a variety of environmental services, including emergency response, site assessment, sampling, waste brokering as well as transportation. The facility maintains current registrations for used oil and hazardous waste transportation, but transports very little of these wastes. In most cases, the company prefers to broker used oil and hazardous waste transportation services. At the time of this inspection, two containers identified as petroleum contaminated water were the only potentially RCRA-regulated wastes within the storage warehouse. Non hazardous investigation derived and spill cleanup wastes are transported and stored under the facility's solid waste permit.

Records were reviewed and confirmed that the company has transported little used oil generated from off site within the past calendar year, and has not stored the material for more than 35 days. Acceptance and disposal records included all required information. Halogen screening on accepted oil is conducted using Chlor-d-Tect Q-1000 test kits. Training was in compliance.

The facility generates a small amount of used oil and oil filters within the maintenance shop.

Inspection Date: 01/10/2013

Containers managing these items were stored within containment. The containers were labeled and in good condition.

**Conclusion:**

Based on the results of this inspection, American Compliance Technologies was in compliance with used oil and hazardous waste management regulations.

Inspection Date: 01/10/2013

**Signed:**

A hazardous waste compliance inspection was conducted on this date, to determine your facility's compliance with applicable portions of Chapters 403 & 376, F.S., and Chapters 62-710, 62-730, 62-737, & 62-740 Florida Administrative Code (F.A.C.). Portions of the United States Environmental Protection Agency's Title 40 Code of Federal Regulations (C.F.R.) 260 - 279 have been adopted by reference in the state rules under Chapters 62-730 and 62-710, F.A.C. The above noted potential items of non-compliance were identified by the inspector(s).

This is not a formal enforcement action and may not be a complete listing of all items of non-compliance discovered during the inspection.
