The Florida Department of Environmental Protection has reviewed your application for registration as a transporter or handler for universal waste lamps and devices destined for recycling. Based on the information received, the facility located at **825 Highway 33, Freehold, NJ 07728** has been registered through **March 1, 2014** with the following status:

Facility ID # **NJD054126164**  
**Transporter of Universal Waste Lamps and Devices**

The registration form for the year **2014** will be sent to the contact person on your application.

Chapter 62-737, Florida Administrative Code (F.A.C.), (copy enclosed) specifies several other requirements including packaging, training and record keeping for transporters and handlers of universal waste lamps or devices destined for recycling. These requirements are simple, flexible and make good business and environmental sense (summarized on enclosed fact sheets).

This registration does not allow you to transport or handle universal waste lamps or devices which are destined for landfill or other disposal. The transportation or handling of universal waste lamps or devices destined for disposal is subject to our hazardous waste management regulations under Chapter 62-730, F.A.C.

If any of your facility's information on the Universal Waste Lamp and Device Transporter and Handler Registration Form changes, please notify by sending an updated form 8700-12FL(Florida Notification of Regulated Waste Activity) to the address on the form which can be found at <http://www.dep.state.fl.us/waste/categories/mercury/pages/registration.htm>. I can also be contacted at (850) 245-8759 or at [Laurie.Tenace@dep.state.fl.us](mailto:Laurie.Tenace@dep.state.fl.us).

# Memo

**To: Mr. Richard Neves**

**From: Jack Fitzsimmons,**

**Date: 8/16/2013**

**Re: Renewal of Used Oil Permit**

Freehold Cartage, Inc., does not accept used oil directly from used oil generators. We operate a transfer station in Bartow, FL where at this location we accept used oil from other transporters under the following conditions:

- 
1. The transporter who accepted the used oil from the generator has performed a halogen screening test on each container of used oil being offered.
  2. The results of the screening test are documented on the manifest/shipping papers.
  3. The halogen levels are under 1,000 ppm.
  4. Any used oil with an indicated halogen level greater than 1,000 PPM is refused unless the used oil has been re-classed as a hazardous waste and manifested accordingly to a permitted Treatment, Storage, Disposal Facility.

Sincerely,

Jack Fitzsimmons

### **BACKGROUND**

Freehold Cartage Inc. (FCI) is located on approximately one and one half (1½) acres within the confines of the Bartow Municipal Airport . The address is 175 Bartow Municipal Airport, Bartow, Florida. Hours of operation are 6 AM to 8 PM, Monday through Saturday. Operations at the facility consist of activities associated with truck transportation operations as well as FDEP permitted transfer and temporary storage, incidental to transportation, of containerized hazardous and non-hazardous waste materials. All hazardous wastes at the facility are stored and/or transferred on an impervious surface secondary containment pad. The site discharges stormwater runoff thus is required to develop an SPPP and file a NOI with the Florida DEP. There are four employees on-site at most times during business hours. Additionally, there are approximately 25 Over-The-Road truck drivers who occasionally come through the site to pick up, or drop off trailers.

The facility has been covered under the MSGP since January of 2007.
