Subject: S-K Tampa - sampling extension request

Hi Merlin, per your call with Rick today, the purpose of this message is to request an extension for the upcoming quarterly groundwater monitoring event at Safety-Kleen's Tampa facility. Specifically, we request to perform the sampling in February rather than January.

This request is related to the anticipated schedule for completion of the connection to the city sewer system. Today, S-K facility personnel estimated that flow to the onsite septic system would be discontinued in early February. If so, then sampling later in February would allow some time for groundwater equilibration per your previous request.

Thank you for your consideration of this request.
