Hazardous Waste Regulation

Dear Sir or Madam:

On behalf of Perma-Fix of Orlando, Inc., Schreiber, Yonley & Associates is submitting a hazardous waste permit renewal application. This application includes the information requested by the Florida Department of Environmental Protection in its letter dated October 25, 2002 regarding the Solid Waste Management Units. The requested information is contained in the subpart II.Q.

The permit renewal application fee in the amount of \$10,000 has been sent to the Florida Department of Environmental Protection, P.O. Box 3070, Tallahassee, FL 32315-3070.

This renewal application also includes a request to construct and operate an additional container storage area. Three additional waste codes (i.e., P042, U133, and U160) for storage are included in this renewal application.

All text and table pages are marked as revision "0" for this renewal application to better track any future revisions since page numbers are assigned unique numbers different from the previous permit application.

If you have any questions or need additional information, please contact Carl Simmons at 407-859-4441.

Sincerely,

SCHREIBER, YONLEY & ASSOCIATES
