

**Florida Department of
Environmental Protection
Hazardous Waste Inspection Report**

FACILITY INFORMATION:

Facility Name: Univar USA Inc

On-Site Inspection Start Date: 06/19/2014

On-Site Inspection End Date: 06/19/2014

ME ID#: 52299

EPA ID#: FLD020985727

Facility Street Address: 6049 Old 41A Hwy, Tampa, Florida 33619-8786

Contact Mailing Address: 6049 Old 41A Hwy, Tampa, Florida 33619

County Name: Hillsborough

Contact Phone: (615) 542-2054

NOTIFIED AS:

LQG (>1000 kg/month)

Transporter

Transfer Facility

Used Oil

INSPECTION TYPE:

Routine Inspection for LQG (>1000 kg/month) facility

Routine Inspection for Transporter facility

Routine Inspection for Transfer Facility

INSPECTION PARTICIPANTS:

Principal Inspector: Shannon D. Camp, Inspector

Other Participants: Roger Evans, Inspector; Freddie Franks, Branch Operations Manager

LATITUDE / LONGITUDE: Lat 27° 53' 16.6618" / Long 82° 23' 40.6392"

SIC CODE: 5169 - Wholesale trade - chemicals and allied products, nec

TYPE OF OWNERSHIP: Private

Introduction:

Univar USA Inc. (Univar) was inspected on June 19, 2014, to determine the facility's compliance with state and federal hazardous waste regulations. The Department's Hazardous Waste Program last inspected this facility in May 2011.

Process Description:

Univar is a warehouse and distribution operation for commercial chemicals and is a break-bulk facility for solvents and corrosive chemicals. This facility is registered with the Department as a Hazardous Waste and Used Oil Transporter and Transfer Facility and is a large quantity generator of hazardous waste. Hazardous waste is generated from line flushes or damaged/off-spec chemicals. The facility's operations have not changed significantly since the Department's previous inspection.

At the time of the inspection, the facility had three hazardous waste satellite accumulation containers: one 55-gallon container for hazardous waste PPE/rags; one 55-gallon drum of corrosive line flush; and one 55-gallon drum for flammable line flush. Univar also had one 55-gallon drum designated for non-hazardous empty sample vials. All of the containers were being properly maintained. Univar's hazardous waste generation varies each month, however disposal records verify that the facility is a large quantity generator. Hazardous waste is disposed of by Tradebe.

The 10 day hazardous waste transfer area was inspected. The area was storing 12 55-gallon drums, of which 10 were hazardous waste. All of the containers were properly managed. A

Inspection Date: 06/19/2014

separate area storing 20 55-gallon hazardous waste drums was observed. These drums were segregated as they were to be shipped out later in the day. A proper inspection of these drums was unable to be conducted as the aisle space on one side was insufficient to allow access to half the containers. Mr. Franks was instructed to ensure sufficient aisle space is maintained to properly inspect the container and for proper response to incidents.

A review of the facility's paperwork was conducted during the inspection. The facility's weekly hazardous waste inspection logs, job title/position descriptions, facility inspection logs, Contingency Plan, Hazardous Waste and Used Oil Transfer Facility log, current financial responsibility documentation, updated Closure Plan, and disposal manifests appeared in order. Univar last conducted hazardous waste training in August 2013. No discrepancies were noted.

Conclusion:

At the time of the inspection, Univar USA Inc. was operating in compliance with state and federal hazardous waste regulations.

Inspection Date: 06/19/2014

Signed:

A hazardous waste compliance inspection was conducted on this date, to determine your facility's compliance with applicable portions of Chapters 403 & 376, F.S., and Chapters 62-710, 62-730, 62-737, & 62-740 Florida Administrative Code (F.A.C.). Portions of the United States Environmental Protection Agency's Title 40 Code of Federal Regulations (C.F.R.) 260 - 279 have been adopted by reference in the state rules under Chapters 62-730 and 62-710, F.A.C. The above noted potential items of non-compliance were identified by the inspector(s).

This is not a formal enforcement action and may not be a complete listing of all items of non-compliance discovered during the inspection.
