Subject: Recycling of glass

Good morning Gentlemen,

As you all know, for the past few years we have been looking for a home for our glass. We have found a company in Newberry that is willing to try our glass in their product. They are a cement company and will be using our glass as a filler in their process. It is stated in our permit that the glass can be used as a cement filler (please see attached). We believe that this is a great thing for our company and for the environment. The information on the company is Argos Newberry Plant, 4000 NW County Rd 235 Newberry, FL 32669. We plan on making our first trial shipment to them at the end of this week. We wanted to make you aware of our intentions. Please get back with me if you have any questions. Thanks

Jason Muhlenkamp
