

**Florida Department of
Environmental Protection
Hazardous Waste Inspection Report**

FACILITY INFORMATION:

Facility Name: Flagler Construction Equipment

On-Site Inspection Start Date: 10/23/2014

On-Site Inspection End Date: 10/23/2014

ME ID#: 23248

EPA ID#: FLR000088518

Facility Street Address: 8418 Palm River Rd, Tampa, Florida 33619-4314

Contact Mailing Address: 8418 Palm River Rd, Tampa, Florida 33619-4314

County Name: Hillsborough

Contact Phone: (813) 630-0077

NOTIFIED AS:

SQG (100-1000 kg/month)

INSPECTION TYPE:

Routine Inspection for Used Oil Transporter facility

Routine Inspection for SQG (100-1000 kg/month) facility

INSPECTION PARTICIPANTS:

Principal Inspector: Shannon D. Camp, Inspector

Other Participants: Kenny Haney, Service Manager

LATITUDE / LONGITUDE: Lat 27° 56' 30.4105" / Long 82° 21' 42.5598"

SIC CODE: 7353 - Services - heavy construction equipment rental

TYPE OF OWNERSHIP: Private

Introduction:

Flagler Construction Equipment (Flagler) was inspected on October 23, 2014, to determine the facility's compliance with state and federal hazardous waste regulations. This facility notified the Department as a small quantity generator of hazardous waste in 2003. This was the Department's Hazardous Waste Program's first inspection of this facility. Flagler is currently generating hazardous waste at the conditionally exempt small quantity generator rate (less than 220 pounds per calendar month).

Process Description:

Flagler sells, leases, and services heavy construction equipment. The facility generates wastes from repairs and preventative maintenance on the equipment. The facility consists of office space and an eight bay service center. The service center generates used oil, used oil filters, spent lead acid batteries, shop rags and used antifreeze. The facility also uses two Purewash parts washers, which use a high flash (142F) petroleum distillate. No chlorinated or listed solvents were observed.

Used oil is collected in labeled dollies prior to being pumped into a 750 gallon double-walled tank. Used oil filters are stored in labeled 55-gallon drums located within the facility's wash rack. Used oil, used oil filters, and used antifreeze are recycled by FCC Environmental. Spent lead acid batteries are returned to the vendor for core credit. The facility also has a wash rack to clean the equipment. The system is a recirculating system that reuses the wash water. The wash rack is permitted through Hillsborough County Environmental Protection Commission. Solids are routinely pumped out and managed by FCC Environmental. The facility recently underwent a renovation. During the renovation, all of the old lighting was replaced by an electrician, who took all the old mercury containing lamps. Since the renovation, the facility has not generated any lamps. Proper management of mercury containing lamps was discussed during the inspection.

Flagler conducts preventative maintenance (PM) and service on equipment off site. The facility has

Inspection Date: 10/23/2014

one PM truck that is equipped with a 100 gallon used oil tank. At the time of the inspection, the facility was not registered with the Department as a Used Oil Transporter.

New Potential Violations and Areas of Concern:**Violations**

Type:	Violation
Rule:	62-710.500
Explanation:	At the time of the inspection, Flagler was transporting used oil in quantities greater than 55-gallons over public highways, without being registered with the Department. (Corrected)
Corrective Action:	Subsequent to the inspection, Flager submitted the required registration to the Department.

Conclusion:

At the time of the inspection, Linder Industrial Machinery Company was not operating in compliance with state regulations governing used oil handlers. The facility returned to compliance following the inspection.

Inspection Date: 10/23/2014

Signed:

A hazardous waste compliance inspection was conducted on this date, to determine your facility's compliance with applicable portions of Chapters 403 & 376, F.S., and Chapters 62-710, 62-730, 62-737, & 62-740 Florida Administrative Code (F.A.C.). Portions of the United States Environmental Protection Agency's Title 40 Code of Federal Regulations (C.F.R.) 260 - 279 have been adopted by reference in the state rules under Chapters 62-730 and 62-710, F.A.C. The above noted potential items of non-compliance were identified by the inspector(s).

This is not a formal enforcement action and may not be a complete listing of all items of non-compliance discovered during the inspection.
