Re: Consent Order, OGC Case No.: 08-1663
January Environmental Services, Inc.
FLD 982 162 943, Polk County

Dear Mr. January:

Enclosed within, please find the executed Short Form Consent Order #08-1663 regarding the above referenced facility. The Department of Environmental Protection has received the full penalty payment of \$1,500.00. As all provisions of the Consent Agreement have been met, this enforcement action is now closed. Thank you for your cooperation.

Sincerely yours,

William Kutash, R.G.

CERTIFIED MAIL 7007 2680 0000 5032 7054
RETURN RECEIPT REQUESTED

June 12, 2008

Mr. Cris January, President
January Environmental Services, Inc.
1920 Highway 60 West
Bartow, FL 33830

SUBJECT: Proposed Settlement of DEP v. January Environmental Services, Inc.
FLD 982 162943
OGC File No.: 08-1663

Dear Mr. January:

The purpose of this letter is to complete the resolution of the matter previously identified by the Department in the Warning Letter dated June 2, 2008, a copy of which is attached. The corrective actions required to bring your facility into compliance have been performed. The Department finds that you are in violation of the rules and statutes cited in the attached Warning Letter. In order to resolve the matters identified in the attached Warning Letter, you are assessed civil penalties in the amount of \$1,200.00 along with \$ 300.00 to reimburse the Department costs, for a total of \$1,500.00. The civil penalty in this case includes no violations of \$2,000.00 or more.

The Department acknowledges that the payment of these civil penalties by you does not constitute an admission of liability. This payment must be made payable to the Department of Environmental Protection by cashier's check or money order and shall include the OGC File Number assigned above and the notation "Ecosystems Management and Restoration Trust Fund." Payment shall be sent to the Department of Environmental Protection, 13051 N. Telecom Parkway, Temple Terrace, FL 33637, within 10 days of your signing this letter.

Your signing this letter constitutes your acceptance of the Department's offer to resolve this matter on these terms. If you elect to sign this letter, please return it to the Department at the address indicated above. The Department will then countersign the letter and file it with the Clerk of the Department. When the signed letter is filed with the Clerk, the letter shall constitute final agency action of the Department which shall be enforceable pursuant to Sections 120.69 and 403.121, Florida Statutes.

If you do not sign and return this letter to the Department at the District address by within 10 days of receipt, the Department will assume that you are not interested in settling this matter on the above described terms, and will proceed accordingly. None of your rights or substantial interests are determined by this letter unless you sign it and it is filed with the Department Clerk.

FILING AND ACKNOWLEDGMENT

FILED, on this date, pursuant to
§120.52, Florida Statutes,
With the designated Department
Clerk, receipt of which is hereby
Acknowledged.

Marcia Hanes July 21, 2008
Clerk Date

Copies furnished to: Lea Crandall, Agency Clerk Mail Station 35

NOTICE OF RIGHTS

Persons who are not parties to this Consent Order but whose substantial interests are affected by this Consent Order have a right, pursuant to Sections 120.569 and 120.57, Florida Statutes, to petition for an administrative hearing on it. The Petition must contain the information set forth below and must be filed (received) at the Department's Office of General Counsel, 3900 Commonwealth Boulevard, MS-35, Tallahassee, Florida 32399-3000, within 21 days of receipt of this notice. A copy of the Petition must also be mailed at the time of filing to the District Office named above at the address indicated. Failure to file a petition within the 21 days constitutes a waiver of any right such person has to an administrative hearing pursuant to Sections 120.569 and 120.57, Florida Statutes.

The petition shall contain the following information:

(a) the Department's Consent Order identification number and the county in which the subject matter or activity is located; (b) The name, address, and telephone number of each petitioner; the name, address, and telephone number of the petitioner's representative, if any, which shall be the address for service purposes; (c) A statement of how and when each petitioner received notice of the Consent Order; (d) A statement of how each petitioner's substantial interests are affected by the Consent Order; (e) A statement of the material facts disputed by petitioner. If there are none, the petition must so indicate; (f) A statement of facts which petitioner contends warrant reversal or modification of the Consent Order; (g) A statement of which rules or statutes petitioner contends require reversal or modification of the Consent Order; and (h) A statement of the relief sought by petitioner, stating precisely the action petitioner wants the Department to take with respect to the Consent Order.

If a petition is filed, the administrative hearing process is designed to formulate agency action. Accordingly, the Department's final action may be different from the position taken by it in this Notice. Persons whose substantial interests will be affected by any decision of the Department with regard to the subject Consent Order have the right to petition to become a party to the proceeding. The petition must conform to the requirements specified above and be filed (received) within 21 days of receipt of this notice in the Office of General Counsel at the above address of the Department. Failure to petition within the allowed time frame constitutes a waiver of any right such person has to request a hearing under Sections 120.569 and 120.57, Florida Statutes, and to participate as a party to this proceeding. Any subsequent intervention will only be at the approval of the presiding officer upon motion filed pursuant to Rule 28-106.205, Florida Administrative Code.

Mediation under Section 120.573, Florida Statutes, is not available in this proceeding.

RE: Warning Letter #312308
EPA ID# FLD982162943
Polk County

Dear Mr. January:

The purpose of this letter is to advise you of possible violations of law for which you may be responsible, and to seek your cooperation in resolving the matter. A Hazardous Waste Program field inspection conducted on April 29, 2008 indicates that violations of Florida Statutes and Rules may exist at the above referenced facility. Department of Environmental Protection personnel made observations described in the attached inspection report. Section 10 of the report lists a summary of alleged violations of Department Rules.

Sections 403.161 and 403.727, Florida Statutes (F.S.) provides that it is a violation to fail to comply with rules adopted by the Department. The activities observed during the Department's field inspection and any other activities at your facility that may be contributing to violations of Florida Statutes or Department Rules should cease.

You are requested to contact Elizabeth Knauss at (813)632-7600, extension 383, within fifteen (15) days of receipt of this Warning Letter to arrange a meeting to discuss this matter. The Department is interested in reviewing any facts you may have that will assist in determining whether any violations have occurred. You may bring anyone with you to the meeting that you feel could help resolve this matter.

Please be advised that this Warning Letter is part of an agency investigation, preliminary to agency action in accordance with Section 120.57(5), F.S. If after further investigation the Department's preliminary findings are verified, this matter may be resolved through the entry of a Consent Order, which will include a compliance schedule, an appropriate penalty, and reimbursement of the Department's costs and expenses. In accordance with

Januray Environmental Serivces, Inc.
Warning Letter #312309

the United States Environmental Protection Agency's (EPA) RCRA Civil Penalty Policy, the penalties and costs which would be assessed in this case are \$1,800.00. Department costs are a minimum of \$300.00.

If this investigation confirms that your facility is significantly out of compliance, and the case is not resolved through timely entry of a Consent Order, under the Department's agreement with the EPA, a formal referral for judicial action must be made to the Department's Office of General Counsel. We look forward to your cooperation in completing the investigation and resolution of this matter.

Sincerely yours,

Deborah A. Getzoff
District Director

9. PROCESS DESCRIPTION:

January Environmental Services, Inc. is a national used oil and oily waste transportation and recycling company. Operations have not changed significantly since the previous inspection. One pump truck with three compartments is used to transport used antifreeze and oil. A compartmented tank trailer is used to transport oily waste water. A flatbed trailer and a smaller trailer are used to transport used oil filter containers and oily waste. Currently, January employs one driver who may drive any of the vehicles on site. The driver's medical certificate and license with hazardous materials endorsement were current.

January has the capacity to store 120,000 gallons of liquid waste in its 6 20,000 gallon above ground storage tanks. January is not required to have a used oil processor permit unless oil is stored more than 35 days or more than 25,000 gallons is stored at any one time. On the day of the inspection, oil was stored in two of the tanks, but the amount in storage was less than 25,000 gallons. The tanks were labeled "used oil" and provided with secondary containment. The tanks are registered and inspected by the Polk County Health Department's delegated Tanks program earlier in the month. Four 35 gallon containers of grease were located in the secondary containment system. One was open, and the Department recommended closing the container.

No used oil or waste water processing takes place at the facility. Waste water is not held on site, but instead is trucked directly to the disposal facility. January does not market oil directly to burners, or claim that the oil meets 40 CFR 279.11 specifications.

The truck unloading area is paved, and sloped and curbed to a concrete sump. A float switch was in the sump to allow uncontaminated storm water to be discharged to a retention area. Mr. Torres said that the switch is normally disconnected, and is only activated if collected storm water is not contaminated. Contaminated storm water or truck wash water is pumped to the waste water tanker for disposal.

The facility also transports used oil filters. A flat bed trailer was loaded with oil filter bins, all closed and clearly labeled "used oil filters" as required by FAC Rule 62-710.850(5)(a).

January has provided its driver with a TIF- RX-1A freon leak detector to screen used oil prior to pumping. Chlor-D-Tect kits were not provided, and Mr. Torres said that his customers are careful not to mix inappropriate materials with their used oil. He has a sample of contaminated oil to verify that the instrument is operating properly prior to screening the oil at his customer's site. Department staff determined that the halogen content of the screening sample was approximately 1,200 ppm using a Dexsil Q-4000 kit. Mr. Torres instrument was operational.

January accepts oily waste water from a number of generators. This material is identified as "grit trap waste" on the acceptance records. January appears to rely on the generator's certification that the waste is not hazardous. The company did not maintain analytical records for this waste on site.

January does not deliver used oil to processing facilities, and instead has been having other transporters pick up the oil at this transfer facility. These other transporters appear to come only when a full load is available. Over the past year, shipments occurred 5/2/08, 3/2/08, 11/8/07, 11/1/07, 10/31/07, 8/10/07, 6/28/07, 6/29/07 and 5/3/07. January appears to have stored used oil more than 35 days on three occasions in violation of **40 CFR 279.45(a)**.

Used oil was being disposed of through Howco in 2007, and is now being disposed of through Atlantic Industrial Services in Ocala. After the previous inspection, January's former facility manager kept copies

of Howco receipts along with the January invoices to document the oil transfers. Together, the two records included all the information required under 40 CFR 279.46(b). However, in shipments after May 5, 2007, not all information has been recorded. January's waste delivery records include all the information required under 40 CFR 279.46(b). However, copies of Both Atlantic and Howco waste acceptance records left with January did not include all the information that a second transporter is required to record. Receipts did not include January's EPA ID Number for either transporter. The Howco records did not include the hand written signature of the oil provider, dated upon receipt. These are violations of 40 CFR 279.46(a)(2) and 40 CFR 279.46(5)(i). In addition, some of the Howco records do not include the results of halogen screening, even where the record contains a hand written note "must sniff oil before pumping." These issues are being addressed with the other transporters.

January's annual report for 2007 was submitted to Tallahassee, and indicated that the facility managed less than 100,000 gallons of used oil during the year.

10. SUMMARY OF ALLEGED VIOLATIONS:

40 CFR 279.45(a) On three occasions, January stored used oil for more than 35 days without complying with applicable used oil processor standards.

11. RECOMMENDED CORRECTIVE ACTIONS:

40 CFR 279.45(a) Ship used oil at least once every 35 days or obtain a used oil processor permit.

June 12, 2008

Mr. Cris January, President
January Environmental Services, Inc.
1920 Highway 60 West
Bartow, FL 33830

SUBJECT: Proposed Settlement of DEP v. January Environmental Services, Inc.
FLD 982 162943
OGC File No.: 08-1663

Dear Mr. January:

The purpose of this letter is to complete the resolution of the matter previously identified by the Department in the Warning Letter dated June 2, 2008, a copy of which is attached. The corrective actions required to bring your facility into compliance have been performed. The Department finds that you are in violation of the rules and statutes cited in the attached Warning Letter. In order to resolve the matters identified in the attached Warning Letter, you are assessed civil penalties in the amount of \$1,200.00 along with \$ 300.00 to reimburse the Department costs, for a total of \$1,500.00. The civil penalty in this case includes no violations of \$2,000.00 or more.

The Department acknowledges that the payment of these civil penalties by you does not constitute an admission of liability. This payment must be made payable to the Department of Environmental Protection by cashier's check or money order and shall include the OGC File Number assigned above and the notation "Ecosystems Management and Restoration Trust Fund." Payment shall be sent to the Department of Environmental Protection, 13051 N. Telecom Parkway, Temple Terrace, FL 33637, within 10 days of your signing this letter.

Your signing this letter constitutes your acceptance of the Department's offer to resolve this matter on these terms. If you elect to sign this letter, please return it to the Department at the address indicated above. The Department will then countersign the letter and file it with the Clerk of the Department. When the signed letter is filed with the Clerk, the letter shall constitute final agency action of the Department which shall be enforceable pursuant to Sections 120.69 and 403.121, Florida Statutes.

RE: Warning Letter #312308
EPA ID# FLD982162943
Polk County

Dear Mr. January:

The purpose of this letter is to advise you of possible violations of law for which you may be responsible, and to seek your cooperation in resolving the matter. A Hazardous Waste Program field inspection conducted on April 29, 2008 indicates that violations of Florida Statutes and Rules may exist at the above referenced facility. Department of Environmental Protection personnel made observations described in the attached inspection report. Section 10 of the report lists a summary of alleged violations of Department Rules.

Sections 403.161 and 403.727, Florida Statutes (F.S.) provides that it is a violation to fail to comply with rules adopted by the Department. The activities observed during the Department's field inspection and any other activities at your facility that may be contributing to violations of Florida Statutes or Department Rules should cease.

You are requested to contact Elizabeth Knauss at (813)632-7600, extension 383, within fifteen (15) days of receipt of this Warning Letter to arrange a meeting to discuss this matter. The Department is interested in reviewing any facts you may have that will assist in determining whether any violations have occurred. You may bring anyone with you to the meeting that you feel could help resolve this matter.

Please be advised that this Warning Letter is part of an agency investigation, preliminary to agency action in accordance with Section 120.57(5), F.S. If after further investigation the Department's preliminary findings are verified, this matter may be resolved through the entry of a Consent Order, which will include a compliance schedule, an appropriate penalty, and reimbursement of the Department's costs and expenses. In accordance with

Januray Environmental Serivces, Inc.
Warning Letter #312309

the United States Environmental Protection Agency's (EPA) RCRA Civil Penalty Policy, the penalties and costs which would be assessed in this case are \$1,800.00. Department costs are a minimum of \$300.00.

If this investigation confirms that your facility is significantly out of compliance, and the case is not resolved through timely entry of a Consent Order, under the Department's agreement with the EPA, a formal referral for judicial action must be made to the Department's Office of General Counsel. We look forward to your cooperation in completing the investigation and resolution of this matter.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "Deborah A. Getzoff", with a stylized flourish at the end.

8. **PERMIT #:** N/A **ISSUE DATE:** **EXP. DATE:**

9. PROCESS DESCRIPTION:

January Environmental Services, Inc. is a national used oil and oily waste transportation and recycling company. Operations have not changed significantly since the previous inspection. One pump truck with three compartments is used to transport used antifreeze and oil. A compartmented tank trailer is used to transport oily waste water. A flatbed trailer and a smaller trailer are used to transport used oil filter containers and oily waste. Currently, January employs one driver who may drive any of the vehicles on site. The driver's medical certificate and license with hazardous materials endorsement were current.

January has the capacity to store 120,000 gallons of liquid waste in its 6 20,000 gallon above ground storage tanks. January is not required to have a used oil processor permit unless oil is stored more than 35 days or more than 25,000 gallons is stored at any one time. On the day of the inspection, oil was stored in two of the tanks, but the amount in storage was less than 25,000 gallons. The tanks were labeled "used oil" and provided with secondary containment. The tanks are registered and inspected by the Polk County Health Department's delegated Tanks program earlier in the month. Four 35 gallon containers of grease were located in the secondary containment system. One was open, and the Department recommended closing the container.

No used oil or waste water processing takes place at the facility. Waste water is not held on site, but instead is trucked directly to the disposal facility. January does not market oil directly to burners, or claim that the oil meets 40 CFR 279.11 specifications.

The truck unloading area is paved, and sloped and curbed to a concrete sump. A float switch was in the sump to allow uncontaminated storm water to be discharged to a retention area. Mr. Torres said that the switch is normally disconnected, and is only activated if collected storm water is not contaminated. Contaminated storm water or truck wash water is pumped to the waste water tanker for disposal.

The facility also transports used oil filters. A flat bed trailer was loaded with oil filter bins, all closed and clearly labeled "used oil filters" as required by FAC Rule 62-710.850(5)(a).

January has provided its driver with a TIF- RX-1A freon leak detector to screen used oil prior to pumping. Chlor-D-Tect kits were not provided, and Mr. Torres said that his customers are careful not to mix inappropriate materials with their used oil. He has a sample of contaminated oil to verify that the instrument is operating properly prior to screening the oil at his customer's site. Department staff determined that the halogen content of the screening sample was approximately 1,200 ppm using a Dexsil Q-4000 kit. Mr. Torres instrument was operational.

January accepts oily waste water from a number of generators. This material is identified as "grit trap waste" on the acceptance records. January appears to rely on the generator's certification that the waste is not hazardous. The company did not maintain analytical records for this waste on site.

January does not deliver used oil to processing facilities, and instead has been having other transporters pick up the oil at this transfer facility. These other transporters appear to come only when a full load is available. Over the past year, shipments occurred 5/2/08, 3/2/08, 11/8/07, 11/1/07, 10/31/07, 8/10/07, 6/28/07, 6/29/07 and 5/3/07. January appears to have stored used oil more than 35 days on three occasions in violation of **40 CFR 279.45(a)**.

Used oil was being disposed of through Howco in 2007, and is now being disposed of through Atlantic Industrial Services in Ocala. After the previous inspection, January's former facility manager kept copies

of Howco receipts along with the January invoices to document the oil transfers. Together, the two records included all the information required under 40 CFR 279.46(b). However, in shipments after May 5, 2007, not all information has been recorded. January's waste delivery records include all the information required under 40 CFR 279.46(b). However, copies of Both Atlantic and Howco waste acceptance records left with January did not include all the information that a second transporter is required to record. Receipts did not include January's EPA ID Number for either transporter. The Howco records did not include the hand written signature of the oil provider, dated upon receipt. These are violations of 40 CFR 279.46(a)(2) and 40 CFR 279.46(5)(i). In addition, some of the Howco records do not include the results of halogen screening, even where the record contains a hand written note "must sniff oil before pumping." These issues are being addressed with the other transporters.

January's annual report for 2007 was submitted to Tallahassee, and indicated that the facility managed less than 100,000 gallons of used oil during the year.

10. SUMMARY OF ALLEGED VIOLATIONS:

40 CFR 279.45(a) On three occasions, January stored used oil for more than 35 days without complying with applicable used oil processor standards.

11. RECOMMENDED CORRECTIVE ACTIONS:

40 CFR 279.45(a) Ship used oil at least once every 35 days or obtain a used oil processor permit.

9. PROCESS DESCRIPTION:

January Environmental Services, Inc. is a national used oil and oily waste transportation and recycling company. Operations have not changed significantly since the previous inspection. One pump truck with three compartments is used to transport used antifreeze and oil. A compartmented tank trailer is used to transport oily waste water. A flatbed trailer and a smaller trailer are used to transport used oil filter containers and oily waste. Currently, January employs one driver who may drive any of the vehicles on site. The driver's medical certificate and license with hazardous materials endorsement were current.

January has the capacity to store 120,000 gallons of liquid waste in its 6 20,000 gallon above ground storage tanks. January is not required to have a used oil processor permit unless oil is stored more than 35 days or more than 25,000 gallons is stored at any one time. On the day of the inspection, oil was stored in two of the tanks, but the amount in storage was less than 25,000 gallons. The tanks were labeled "used oil" and provided with secondary containment. The tanks are registered and inspected by the Polk County Health Department's delegated Tanks program earlier in the month. Four 35 gallon containers of grease were located in the secondary containment system. One was open, and the Department recommended closing the container.

No used oil or waste water processing takes place at the facility. Waste water is not held on site, but instead is trucked directly to the disposal facility. January does not market oil directly to burners, or claim that the oil meets 40 CFR 279.11 specifications.

The truck unloading area is paved, and sloped and curbed to a concrete sump. A float switch was in the sump to allow uncontaminated storm water to be discharged to a retention area. Mr. Torres said that the switch is normally disconnected, and is only activated if collected storm water is not contaminated. Contaminated storm water or truck wash water is pumped to the waste water tanker for disposal.

The facility also transports used oil filters. A flat bed trailer was loaded with oil filter bins, all closed and clearly labeled "used oil filters" as required by FAC Rule 62-710.850(5)(a).

January has provided its driver with a TIF- RX-1A freon leak detector to screen used oil prior to pumping. Chlor-D-Tect kits were not provided, and Mr. Torres said that his customers are careful not to mix inappropriate materials with their used oil. He has a sample of contaminated oil to verify that the instrument is operating properly prior to screening the oil at his customer's site. Department staff determined that the halogen content of the screening sample was approximately 1,200 ppm using a Dexsil Q-4000 kit. Mr. Torres instrument was operational.

January accepts oily waste water from a number of generators. This material is identified as "grit trap waste" on the acceptance records. January appears to rely on the generator's certification that the waste is not hazardous. The company did not maintain analytical records for this waste on site.

January does not deliver used oil to processing facilities, and instead has been having other transporters pick up the oil at this transfer facility. These other transporters appear to come only when a full load is available. Over the past year, shipments occurred 5/2/08, 3/2/08, 11/8/07, 11/1/07, 10/31/07, 8/10/07, 6/28/07, 6/29/07 and 5/3/07. January appears to have stored used oil more than 35 days on three occasions in violation of **40 CFR 279.45(a)**.

Used oil was being disposed of through Howco in 2007, and is now being disposed of through Atlantic Industrial Services in Ocala. After the previous inspection, January's former facility manager kept copies

of Howco receipts along with the January invoices to document the oil transfers. Together, the two records included all the information required under 40 CFR 279.46(b). However, in shipments after May 5, 2007, not all information has been recorded. January's waste delivery records include all the information required under 40 CFR 279.46(b). However, copies of Both Atlantic and Howco waste acceptance records left with January did not include all the information that a second transporter is required to record. Receipts did not include January's EPA ID Number for either transporter. The Howco records did not include the hand written signature of the oil provider, dated upon receipt. These are violations of 40 CFR 279.46(a)(2) and 40 CFR 279.46(5)(i). In addition, some of the Howco records do not include the results of halogen screening, even where the record contains a hand written note "must sniff oil before pumping." These issues are being addressed with the other transporters.

January's annual report for 2007 was submitted to Tallahassee, and indicated that the facility managed less than 100,000 gallons of used oil during the year.

10. SUMMARY OF ALLEGED VIOLATIONS:

40 CFR 279.45(a) On three occasions, January stored used oil for more than 35 days without complying with applicable used oil processor standards.

11. RECOMMENDED CORRECTIVE ACTIONS:

40 CFR 279.45(a) Ship used oil at least once every 35 days or obtain a used oil processor permit.

Subject: Oil Storage

Dear Ms. Elizabeth Knass,

In response to your previous email request regarding 35 days limits on oil storage. Our company does such a small volume of collecting, we do not collect enough for purchasers to peruse. Are there any previsions regarding our situation until we can grow the business to meet 35 day requirements?

Your assistance is greatly appreciated.

Thanks for the documents Loren. I had not seen the 3/2/08 receipt from Atlantic.

However, it looks like January has not been shipping oil at least once every 35 days. Used oil transfer facilities may not hold used oil more than 35 days without complying with the used oil processor standards. In Florida, this requires having a permit.

Can you let me know how you intend to come back into compliance? You can either ship more frequently, or obtain a processor permit.

Thanks

Subject: Florida Facility inspection

As a follow up to my inspection earlier this month, can I get copies of your used oil disposal records for the past year?

This should include shipments on

5/2/08 - Atlantic

11/8/07 - Howco

11/1/07

10/31/07

8/10/07 (2 pickups)

6/29/07

6/28/07

5/3/07 – this should include a copy of both the Howco shipping paper and the January invoice

Also – can you explain why it appears no oil was shipped between 11/8/07 and 5/2/08? Were other shipping papers not on file, or was oil shipped to a different facility?

And one last item – do you have any records for disposal of waste antifreeze? How is that being managed?

Thanks

Beth Knauss

Comments:

1920 Highway 60 West Bartow, FL 33830

Dear Ms. Elizabeth Knauss,

In response to your email January Environmental sold oil twice between the dates of 11-08-2007 thru 5-2-2008. Oil was sold to Howco on the dates of 11-13-2007 and 3-2-2008. The question inquiring about antifreeze disposal I am currently researching and will return an answer shortly. Attached to this fax is also the information the previous email has requested. If any question should arise do not hesitate to call or email.

Sincerely,

Loren January
