INSPECTION DATE: 9/14/00

USED OIL PROCESSOR CHECKLIST

Facility Name: Cliff Berry - Miami Date: 9/20/00 (Checklist completed on this date)

Facility Representative: Kyle Boudreaux Facility ID: FLD058360699

Inspector: Jim Ayers / Jeff Smith Registration #: —

40 CFR 279 Subpart F -- Processor Standards

1. Is the facility exempt under any of the following? (279.50(a)) Y____ N✓

   Transporter or burner processing incidental to normal course of operations? Y____ N____

   Processors who also generate, transport, market, dispose or burn used oil must comply with the applicable Subparts of Part 279.

2. Does the processor have an EPA ID Number? (279.51(a)) Y✓ N____

3. Is the processor Registered? (62-710.500(1)(b)) Y✓ N____

4. Does the processor have a general permit? 62-710.800(1)) Y✓ N____

5. For new facilities, was the notification of intent to use the general permit submitted 30 days prior to beginning operation? For existing facilities, was " the notification for renewal submitted 30 days prior to expiration of the general permit?(62-710.800(2)) Y✓ N____

Oil Filter Processing Standards-- 62-710.850 F.A.C.

1. Does the facility process used oil filters by removing oil, draining, crushing or element separation? Describe in narrative. Generators who process their own filters are not regulated provided the filters are not disposed of in a landfill but are managed by a registered processor. Y✓ N____

   Is the facility a registered used oil filter processor? (62-710.850) Y✓ N____

2. Are the filters stored in above ground containers which are: (62-710.850(6))

   In good condition? Y✓ N____

   Closed or otherwise protected from weather? Y✓ N____

   Labeled "Used Oil Filters"? Y✓ N____

   Stored on an oil impervious surface? Y✓ N____

3. Are records maintained on DEP Form 62-710.900(2) or equivalent that include: (62-710.850(5)(a))

   Destination or end use of the processed filters? Y✓ N____

   Name and street address of each destination or end user? Y✓ N____

   Are copies kept at the facility's street address for 3 years? (62-710.850(5)(b)) Y✓ N____

4. Is an Annual Report submitted by March 1 for the previous calendar year summarizing the above records? (62-710.850(5)(c)) Y✓ N____

Facility: [redacted] BI - Miami
Date: 9/20/00

8. Is there adequate aisle space to allow unobstructed movement of facility personnel and emergency equipment to any area of the facility where needed? (279.52(a)(5i)) Y ✓ N

9. Has the facility made emergency response arrangements with the following: (279.52(a)(6))
   - Fire Department: Y ✓ N
   - Police: Y ✓ N
   - Hospital: Y ✓ N
   - Emergency Response Contractor: SELF Y ✓ N

10. If not, has the facility attempted to do so and is the refusal documented? Y N N/A

Contingency Plans and Emergency Response -- 279.52(b)

1. Does the facility have a contingency plan? Y ✓ N
2. Is it at the facility and easily available? Y ✓ N
3. Does the plan include:
   - Fire Response Procedure: (compare to 279.52(b)(6)) N/A Y ✓ N
   - Spill Response Procedures: " N/A Y ✓ N
   - Explosion Response Procedures: " N/A Y ✓ N
   - Instructions for handling contaminated materials & residues Y N
   - A description of arrangements with local authorities: N/A Y ✓ N
   - Emergency Coordinators: (Name) KYLE BOUDREAUX Y ✓ N
   - Addresses and telephone numbers of Emergency Coordinators: Y ✓ N
   - Emergency equipment list: Y ✓ N
   - Specifications and capabilities of emergency equipment: Y ✓ N
   - Locations of emergency equipment: Y ✓ N
   - An evacuation plan and routes: Y ✓ N
   - Evacuation/alarm signals: Y ✓ N
   - External reporting procedures: Y ✓ N
   - Internal recordkeeping requirements: Y ✓ N
4. Is the plan up to date, with no changes to the list of emergency equipment, list of emergency coordinators, applicable regulations or contingency plan failures since the last revision? (279.52(b)(4)) Y N ✓ SEE EXIT INTERVIEW
5. Has the plan been distributed to the local police, fire department, ERT and hospital? Circle omitted authorities. (279.52(b)(3)) Y ✓ N
6. Is the emergency coordinator authorized to commit funds for incident response? Y N
7. Has the processor noted in the operating record any incidents requiring implementation of the contingency plan? (279.52(b)(6)(ix)) Y N ✓
9. Were written reports made within 15 days to the DEP? (279.52(b)(6)(ix)) Y N

Facility: [redacted] B.E. - Miami
Date: 7/20/00

Rebuttable Presumption and Analysis Plan – 279.53, 279.55

1. Does the processor have a written analysis plan to determine whether used oil stored at the facility has a total halogen content above or below 1,000 ppm and whether the facility's used oil fuel meets the used oil specification? (279.55)(a)) Y ✓ N

2. Is the 1,000 ppm halogen determination made by testing? Y ✓ N

   If so, does the analysis plan cover: (279.55(a)(2))

   Sampling methods? Y ✓ N

   Frequency of sampling? Y ✓ N

   Analytical Methods? Y ✓ N

   Is the 1,000 ppm halogen determination made by process knowledge? Y N ✓

   If so, is the type of information that will be used to determine the halogen content stated in the analysis plan? (279.55(a)(3)) Y N N/A

3. Have any analyses showed exceedances of the 1,000 ppm level? Y N ✓

   If so, was the oil managed as hazardous waste? Y N N/A

   If not, was the oil exempt? Describe basis for presumption rebuttal in narrative. (ex. analysis, refrigerant oil, etc.) N/A ✓ Y N

4. Is the used oil fuel specification determination made by testing?

   If so, does the analysis plan cover: (279.55(b)(2))

   Sampling methods? Y ✓ N

   Whether the oil will be tested before or after processing? Y ✓ N

   Frequency of sampling? Y ✓ N

   Analytical Methods? Y ✓ N

   Is the used oil fuel specification determination made by process knowledge? Y N ✓

   If so, is the type of information that will be used to determine the halogen content stated in the analysis plan? (279.55(b)(3)) Y N N/A

5. Are all oil processing residues managed as used oil, reclaimed, or used as asphalt manufacture feedstock? (279.59) N/A Y ✓ N

   If not, has the processor conducted a hazardous waste determination? (279.10(e)) N/A ✓ Y N

6. Are test records or copies of records providing basis for determinations kept for 3 years? N/A Y ✓ N

Facility : [redacted] SI - MIAMI
Date: 9/20/00

Recordkeeping and Reporting -- 279.57, 62-710.510-520 F.A.C.

1. Do used oil acceptance records include: (279.56(a))

Name & address of the generator or off site source of the used oil?	Y ✓	N
EPA ID # of oil provider (if applicable)?	Y ✓	N
Name & Address of the transporter delivering the oil to the facility?	Y ✓	N
EPA ID # of the transporter delivering the oil	Y ✓	N
Quantity of oil shipped?	Y ✓	N
Type of oil received (62-710.510(1)(c))	Y ✓	N
Date of shipment?	Y ✓	N

2. Do used oil delivery records include: (279.56(b), also check marketer requirements)

Name & Address of receiving facility? (burner, processor or disposal site)	Y ✓	N
EPA ID # of receiving facility?	Y ✓	N
Name & Address of transporter delivering the oil?	Y ✓	N
EPA ID # of transporter?	Y ✓	N
Quantity of oil delivered?	Y ✓	N
End Use of the oil? (62-710.510(1)(e))	Y ✓	N
Date of delivery?	Y ✓	N

3. Does the facility keep records on DEP Form 62-710.900(2) or equivalent? (62-710.501(1)) Y ✓ N

4. Does the facility submit an annual report by March 1 summarizing the on site records for the previous calendar year? (62-710.520) Y ✓ N

   If not, is the facility an electric utility processing only self generated used oil for recycling, which is exempt from state registration and reporting requirements? (62-710.530)? ~~Y~~ N N/A

5. Does the transporter keep copies of the record and reports for three years at the street address of the facility? (62-710.510(2)) Y ✓ N

Closure -- 62-710.800(3) F.A.C. and 279.54(h)

1. Has the facility submitted a written closure plan? (62-710.800(3)(a)) Y ✓ N

2. Does the plan include procedures for removing containers of oil and residues? Y ✓ N

Cleaning and decontaminating tanks and ancillary equipment?	Y ✓	N
Removing contaminated soils?	Y ✓	N
Eliminating the need for further maintenance?	Y ✓	N

If the facility operated tank systems, and not all contaminated soils can be practicably removed, the owner or operator must close the facility as a hazardous waste landfill.

HAZARDOUS WASTE INSPECTION EXIT INTERVIEW SUMMARY – Page 1 of 2

FACILITY NAME		TYPE OF INSPECTION:

EPA ID NUMBER	DATE OF INSPECTION		PAGE	OF	
FLD058560699	9/14/00		1	2	
FOLLOW UP CAV INSPECTION WITHIN 120 DAYS:	☐ YES	☑ NO			

A hazardous waste/used oil compliance inspection was made this date, under the authority of Section 403.091, Florida Statutes (F.S.), to determine your facility's compliance with Chapter 403, F.S. and Chapters 62-710, 62-730, 62-737, and 62-740, Florida Administrative Code (F.A.C.). Provisions of Title 40 Code of Federal Regulations (C.F.R.) Parts 260 through 268 and 279, which are cited on this form, have been adopted by reference as the state hazardous waste and used oil rules in Chapter 62-710, 62-730, 62-737 and 62-740, F.A.C. The following potential items of non-compliance were identified by the inspector(s). ***This is not a formal enforcement action and may not be a complete listing of all items of non-compliance which exist at the time of this inspection. You are advised to immediately begin correcting these potential violations noted below:***

GENERAL REQUIREMENTS:

- ☐ Failure to ensure delivery of HW to proper HW facility § 261.5
- ☐ Failure to provide hazardous waste determination § 262.11
- ☐ Failure to notify as generator § 262.12
- ☐ Failure to use a manifest or reclamation agreement § 262.20
- ☐ Failure to provide personnel training § 265.16, 262.34
- ☐ Evidence of release(s) of waste § 265.31
- ☐ Facility exceeds 90/180 day time limit § 262.34

USED OIL VIOLATIONS:

- ☐ Failure to label containers § 279.22
- ☐ Failure to respond to releases § 279.22
- ☐ Failure to document used oil disposal § 279.10

CONTAINER MANAGEMENT:

- ☐ Unlabeled containers § 262.34
- ☐ Undated containers § 262.34
- ☐ Leaking or bulging containers § 262.34
- ☐ Open containers § 265.173
- ☐ Inadequate aisle space § 62-730.160

RECORDKEEPING REQUIREMENTS:

- ☐ Manifests § 262.40, § 262.44
- ☐ Training records § 262.34
- ☐ Contingency Plan § 262.34
- ☐ Weekly Inspection records § 62-730.160
- ☐ Information not posted by phone § 262.34
- ☐ Authorities not notified § 262.37

MATERIALS PROVIDED to assist in accomplishing corrective actions

- ☐ DEP Small Quantity Generator Handbook
- ☐ EPA *Understanding the Hazardous Waste Rules*
- ☐ EPA *Notification of Regulated Waste Activity*
- ☐ Florida Automotive Recyclers Handbook
- ☐ EPA *Managing Used Oil*

HAZARDOUS WASTE INSPECTION EXIT INTERVIEW SUMMARY – Page 2 of 2

OTHER: Please provide the following w/. 10 days. 1) Updated training spread sheet, 2) Update Contingency Plan (State Warning Point), 3) Copy of manifest for DCA pickup. 4) Profile (analysis) for manifest # 27402 Dated 4/25/00 + # 32167 dated 7/5/00, 5) Profile (analysis) for Non-Haz Drums: CCL Sensation CCL Ecstasy + Ted Jurasic Two (+ Die. 6) Need to review Ch. 62-737, FAC for Mercury lamp management.

ITEMS REQUESTED BY INSPECTOR:

OWNER/OPERATOR COMMENTS:

The owner/operator is hereby requested to submit in writing, within __ days of this inspection, 1) a description of all corrective actions taken, 2) a schedule for completion of corrective actions to be taken and 3) a description of efforts to prevent recurrence of the above items to the person signing as *"INSPECTOR"*, Florida Department of Environmental Protection, P.O. Box 15425, West Palm Beach, FL 33416. The actions taken within __ days of this notice will be considered in determining whether enforcement, including the assessment of penalties, should be initiated.

IF YOU HAVE QUESTIONS, contact: Jim Ayers *at (561) 681-6600.*

INSPECTOR (signature): James R. Ayers Date: 9/14/00

The undersigned person hereby acknowledges that he/she received a copy of this notice and has read and understands same.

RE: Potential Violations; Cliff Berry, Inc. – Miami (CBI)

Dear Mr. Doyle:

After review of your submittals, while CBI has not been able to explicitly demonstrate truck movement during the timeframes identified in the Department's February 7, 2000 letter, the Department has not been able to conclusively substantiate that the trucks were not moving. Therefore, the Department will eliminate the following potential violations identified in the Warning Letter dated December 20, 1999:

1. Chapter 62-730.171, F.A.C. – Transfer Facility Notification

2. Chapter 62-730.171(e), F.A.C. – Transfer Facility Logs

Additionally, the Department has reviewed potential violation 40 CFR 262.11, Hazardous Waste Determination. It is within CBI's daily practice to manage both hazardous and non-hazardous wastes. CBI should implement the necessary procedures to ensure wastes that are received by CBI for soil thermal treatment pursuant to Chapter 62-713, Florida Administrative Code (F.A.C.) are non-hazardous. These wastes should be properly profiled by the generator in accordance with 40 CFR 262.11, which may include Toxicity Characteristic Leaching Procedure (TCLP) for metals pursuant to 40 CFR 261.24. While soil thermal treatment of such wastes does require total metals analysis, this does not substitute for TCLP analysis and the generator's responsibility to perform a proper hazardous waste determination.

In this case, the Department has decided to eliminate this potential violation. The calculated penalty will also be eliminated as there are no further potential violations associated with the July 28, 1999 compliance evaluation inspection.

This will conclude the Department's investigation into this matter. However, please be advised that CBI will have continued responsibility for ensuring acceptance of only non-hazardous wastes not qualifying as used oil, as detailed in Specific Condition #20(b) of CBI's used oil treatment facility permit, permit number HO13-308165, issued October 28, 1999.

If you have any questions regarding the inspection or any other compliance issues, please contact Mr. John Harris of this office at 561/681-6719. Thank you for your cooperation.

Sincerely,

Jeffrey A. Smith
Environmental Manager
Hazardous Waste Compliance/Enforcement Section

cc: DEP Files, West Palm Beach

Florida Department of Environmental Protection

Memorandum

TO: File

THROUGH: Jeffrey Smith, Environmental Manager, Hazardous Waste Section

FROM: John Harris, Environmental Specialist II, Hazardous Waste Section

DATE: June 8, 2000

RE: Cliff Berry, Inc. – Miami Facility (CBI)

In the Department's February 7, 2000 letter, information was requested from CBI regarding the possibility of CBI storing hazardous waste on-site during transportation for greater then 24 hours. The storage of hazardous waste on-site for greater then 24 hours would subject CBI's facility to Rule 62-730.171, F.A.C. standards. After review of all submittals, it has not been conclusively evidenced that CBI's trucks used in shipments of hazardous waste were not moving during the timeframes identified in the Department's February 7, 2000 letter, neither has CBI been able to demonstrate that these trucks were in use during these timeframes. Continued pursuit of such evidence may be fruitless and would prove to burden the Department's time and resources to such an extent as to unjustly hinder other Department compliance and enforcement issues. The potential violations will therefore be eliminated in CHAZ and CBI will be identified as a secondary violator achieving compliance within 180 days. The adjustment will also be reflected in the penalty calculation.

DEPARTMENT OF ENVIRONMENTAL PROTECTION
ENFORCEMENT TELEPHONE LOG

CASE NAME: Cliff Berry, Inc. - Miami

DATE: May 22, 2000 TIME: 10:00 am

CONTACT: Mr. Larry Doyle OF: Cliff Berry, Inc.

WAS CALLED. PHONE #: 954/763-3390

DISCUSSION:

I returned Mr. Doyle's voicemail. He stated that CBI used 3-4 drivers for pickups of hazardous waste and that one driver usually drives the same truck. He stated that CBI prefers to use box trucks for shipments of hazardous waste and that some of these have been equipped with "totes" for bulk shipment of liquid wastes, particularly PCW. Mr. Doyle also stated that he could and would make attestations to the fact that the trucks were in movement during the timeframes in question.

RE: Response dated March 15, 2000

Dear Mr. Doyle:

The Department has received and reviewed your response dated March 15, 2000 and offers the following comments:

1. There are time periods in question that the response fails to cover. Specifically, the response fails to account for truck movement between 5/21/99 to 5/26/99 and 3/21/98 to 3/22/98. Also, documentation regarding manifest #08956 (8/28/98 to 9/02/98) was not included as stated in your letter.

2. The documentation that was provided was able to demonstrate that a truck picked up waste on certain dates, but was unable to show if it was *the* truck used for waste shipped on the manifests in question. Demonstration that the trucks used to ship the waste listed on the manifests are the same trucks used in supporting documentation should be submitted.

Please respond within 20 days of receipt of this letter. If you have any questions please contact Mr. John Harris at 561/681-6719. Thank you for your cooperation.

Sincerely,

Jeffrey A. Smith

Re: Letter of Transmittal for Hazardous Waste Transfer Facility Notification

Dear Mr. Harris:

Cliff Berry, Inc. (CBI) would like to notify the Florida Department of Environmental Protection that our Miami Facility will be operating as a Hazardous Waste Transfer Facility in accordance with (62-730.171).

Please find the following attached notification package.

1. Transfer Facility Notification Form
2. Cliff Berry, Inc. - Miami Facility SPCC Plan Revised March 2000
3. Cliff Berry, Inc. - Miami Facility Closure Plan March 1994

If you have any questions please call me (954) 763-5455.

Sincerely,

William E. Parkes, Jr.

TRANSFER FACILITY NOTIFICATION FORM

This form must be completed as required in Florida Administrative Code Rule 62-730.171(3) by transfer facilities storing hazardous waste in accordance with Florida Administrative Code Rule 62-730.171. All information must be typed or printed clearly.

1. Transporters identification:

Company Name Cliff Berry, Inc. (CBI)

E.P.A.ID No. FLD 058560699

Company Mailing Address P.O. Box 13079

Ft. Lauderdale, FL 33316

Principal Contact William E. Parkes, Jr.

Phone Number (800) 899 - 7745

II. Transfer Facility Identification:

Name of Facility Cliff Berry, Inc. - Miami Facility

Street Address 3033 NW North River Drive

Miami, Florida 33142

Latitude 25° 47' 48" North Longitude 80° 14' 42" West

County Miami-Dade Storage Volume 300 Drums

III. Certification:

I certify under penalty of law that the above information is accurate and complete. As the owner or operator of the above-referenced hazardous waste transfer facility, I am aware that this facility must comply with the requirements of Florida Administrative Code Rule 62-730.171.

Hazardous Waste Transfer Facility (62-730.171)

Cliff Berry, Inc. operates a Hazardous Waste Transfer Facility at 3033 NW North River Dr., Miami Florida (FLD058560699). Containers of hazardous waste are held in transit at the facility for at least 24 hours but no longer than 10 days.

Containers of hazardous waste will be stored in two locations on the facility grounds. Drums will be stored in secondary containment in the section labeled as *Secured Hazmat Storage* on the attached facility diagram. Incompatible wastes will be segregated in accordance to 40CFR265.177(c). Additionally drums will be stored in trucks loaded in accordance with DOT regulations {40CFR263.10}.

All hazardous waste entering the Hazardous Waste Transfer Facility section will be recorded in a log maintained at the facility. The log will contain the following information: generators name, address, EPA Identification Number, manifest number, date received, and date shipped off site (see attached log).

All containers of hazardous waste received at the facility will be inspected daily during hours of operation. If a container is found to be defective or leaking the contents will be transferred or overpacked into a new container. All spill cleanup material will be collected and disposed of in accordance to all local, state, and federal regulations.

Cliff Berry, Inc
Miami Transfer Station Closure Plan
March 31, 1994

Introduction:

Cliff Berry, Inc. (CBI) operates a waste oil transfer station which receives waste oil, oily water and contaminated soil which are generated by retail gasoline stations, automobile dealerships, airports and marine interests. All product is delivered to the CBI plant by over the road transport vehicles. The facility has a capacity of storing approximately 1,245,700 gallons of off specification fuels and oily waste water.

The facility operates under licenses issued by the Broward County Office of Natural Resource Protection (BC-ONRP), Dade County Department of Environmental Resources Management (DERM) and the State of Florida Department of Environmental Protection (DEP). Company owned transport vehicles are also licensed by BC-ONRP and DERM. All oily liquids and contaminated soils are transferred and stored within containment areas which have been designed to meet rules and regulations current at the time of installation. All oily liquids and contaminated soils delivered to the facility are handled under manifests issued by the generators.

General provisions:

As required by the Florida Administrative Code (F.A. C.) Rule 17-730.171 (2) (b) and Environmental Protection Agency (EPA) Interim Status Standards for owners and operators of hazardous waste facilities, chapters 40CFR 265.111, 40CFR 265.112C, 40CFR 265.114 and 40CFR 265.115 and by reference chapters 40CFR 265.228, 40CFR 265.258 and 40CFR 265.280, CBI has adopted this document to be used as required, during the closure of the facility.

At closure, CBI will institute the following steps:

1. Remove all standing liquids, waste and waste residues from the facility. All stored liquids will be tested, if POTW standards are met, discharge will be made to the sewer systems. All liquids which do not meet POTW standards will be transferred to a suitable transfer station.

2. Current plans require that the closure event will result in the complete cessation of all operations at the CBI Transfer Station. Management does not contemplate partial operation of the facility.

RECEIVED
MAR 31 2000
DEPT OF ENV PROTECTION
WEST PALM BEACH

3. All on site monitoring wells will be sampled in accordance with an approved Quality Assurance Plan and analyzed for US EPA approved mixed product analytical group parameters - Volatile Halocarbons (601), volatile aromatics in water (602), Total Volatile Aromatics (VOA), Poly-nuclear Aromatic Hydrocarbons (610), 1,2 dibromomethane (EDB), Methyl tert-butyl ether (MTBE) and lead.

4. A split spoon coring device will be used for the extraction of composite soil samples (taken from the surface to groundwater). Soil samples will be taken from areas immediately adjacent to where trucks are stored. Visual inspection of soils adjacent to the containment area will determine the location of soil sampling. An OVA/FID instrument will be used for the detection of organic contamination at levels greater than 50 parts per million. The samples identified as being most contaminated will be submitted to an approved laboratory for analysis and identification of individual constituents. Should contamination be found, CBI will submit, a Contamination Assessment Plan (CAP). After the approval and implementation of the CAP, a Contamination Assessment Report (CAR) and a Remedial Action Plan (RAP) will be developed.

5. Tanks, pumps, piping and other materials and structures will be emptied and decontaminated as necessary. Filter sand, sludge and treatment process residues will be tested for hazardous characteristics; disposal of these items will be consistent with the results of the analysis. Contaminated surfaces will be washed with appropriate detergents. The effectiveness of all decontamination steps will be assessed by using swab samples of the formerly contaminated surfaces. Decontamination will be confirmed through the analysis of final rinsate liquids.

All assessment and remedial work will be done in accordance with the Florida Administrative Code (F.A.C.) Rules 17-770 and 17-730.

Should material or contaminated soils be encountered during the closure, steps will be taken to control mitigation of hazardous waste and hazardous waste constituents from the affected area into ground or surface water.

These steps will include:

1. Contaminated material will be containerized and sealed prior to their proper disposal to prevent runoff due to rainfall.

2. Isolation of contaminated areas and materials from contact with personnel. Closed, covered containers will be utilized for soils.

3. Separation of decontaminated material from non-contaminated materials.

4. Containment of all wash water and decontamination materials. Such will be handled as appropriate, either as a hazardous waste through a manifest or will be discharged to a POTW. Approval from the POTW will be obtained prior to release.

During the execution of the above steps, the following factors will provide the basis of action:

1. Should disposal of closure generated materials require land treatment, the type and amount of hazardous waste and hazardous waste constituents along with the mobility and expected rate of migration of the material will be evaluated prior to implementing a remedial plan.

2. Factors such as location, topography, surrounding land use, climate (frequency) and Ph of precipitation and biological characteristics of potential disposal sites will be performed.

3. Site specific studies involving unsaturated zone monitoring, type, concentration and depth of migration of hazardous waste constituents in the soil as compared to their background concentrations will be performed.

Prior to initiating site closure, the following will be done:

i. Contaminated soil and liquids will be manifested off site to a permitted TSD facility.

ii. Tanks, piping and machinery will be either removed and/or decontaminated.

iii. Placement of final cover considering:

a. Functions of the cover.

b. Characteristics of the cover including material, final surface contours, thickness, porosity/permeability, slope, length of run of slope and type of area vegetation.

c. Monitoring of groundwater.

Final Closure:

In the event hazardous wastes are temporarily stored, a revised final plan will be submitted. This plan will be issued during a closure event and will identify the steps necessary to perform partial and/or final closure of the facility. The amended closure plan will include:

1. A description of how each hazardous waste management unit at the facility will be closed.

2. A description of how final closure of the facility will be conducted. The description will identify the maximum extent of operation which will be unclosed during the active life of the facility.

3. A projection of the maximum inventory of hazardous waste stored on site over the active life of the facility; and a detailed description of the methods to be used during partial and final closure including but not limited to procedures for cleaning equipment and removing contaminated soils, methods for sampling and testing surrounding soils, and criteria for determining the extent of contamination necessary to satisfy the closure performing standards.

4. A detailed description of the steps necessary to remove or decontaminate all hazardous waste residues and contaminated material systems components, equipment, structures, and soil during partial and final closure including but not limited to procedures for cleaning equipment and removing contaminated soils, methods for sampling and testing surrounding soils, and criteria for determining the extent of contamination necessary to satisfy the closure performing standards.

5. A detailed description of other activities necessary during the partial or final closure period to insure that all closure activities satisfy the closure performance standards including but not limited to groundwater monitoring, leachate collection, and run-on and run-off control.

6. A schedule for closure of each hazardous waste management unit and for final closure of the facility. The schedule will include the total time required to close each hazardous waste management unit and the time required for intervening closure activities which will allow tracking of the progress of partial and final closure.

Other relevant items such as related to modifications to the closure plan and notifications of closure will be handled in accordance with chapter 40CFR 265.112.

RE: Your Letter of February 7, 2000

Dear Ms. Holmes;

I received the above referenced letter subsequent to my visit with Jeff Smith and John Harris at the DEP offices in West Palm Beach. I indicated then and will reiterate now that although Cliff Berry Inc. had custody of the various loads of hazardous materials for more than 24 hours, for some part of each and every day they were in our custody, they were in transit on a CBI vehicle.

Other than making the above attestation to this fact, I set about gathering the needed historical documentation to show (through means of official records) that the vehicles containing the hazardous materials in question were in fact used. Specifically, since the times in question were several years ago, I used the Dade and Broward county reports for waste pick ups and drop offs, time clock records, job sheets and manifests to show that Cliff Berry Inc. vehicles were in use during the days in question. Further, I also included a print-out from Gator Truck Rental indicating Cliff Berry Inc. had a box truck on rental, something I can assure you we would not do if the CBI vehicles were not already in use.

As a matter of presentation, I will address each of the five manifests your office has questioned and what documentation is presented to show vehicle use during the times in question.

- **Manifest #52101**: picked up 5/21/99, relinquished 5/29/99
  During this entire time, we rented a Gator Box Truck to augment our fleet due to the additional vehicle capacity needed. (Copy of the rental details is attached.) I also found additional invoices for work performed on several of the days in question. Time card summations are attached documenting CBI workers regular and overtime hours during the time in question.

- **Manifest #01637**: picked up 4/16/98, relinquished 4/20/98
  Vehicle usage is documented by our monthly DERM reports for the days in question. Please note, as long as the vehicle in question was used to pick-up or drop-off a regulated material in either Dade or Broward County during the days in question, this method clearly shows vehicle usage. Time card summations are attached documenting CBI workers regular and overtime hours during the time in question. I also included a

P.O. Box 13079 Port Everglades Station Fort Lauderdale, Florida 33316 (954) 763 3390 fax (954) 763 8375

manifest we came across indicating the vehicle was used during this time.

- **Manifest #12898**: picked up 1/28/98, relinquished 1/31/98
  Vehicle usage is documented by our monthly DNRP reports for the days in question. Time card summations are also attached documenting CBI workers regular and overtime hours during the time in question.

- **Manifest #04350**: picked up 3/18/98, relinquished 3/23/98
  Vehicle usage is documented by manifests and job sheets indicating the vehicles were used to do work on the days in question. Time card summations are also attached documenting CBI workers regular and overtime hours during the time in question.

- **Manifest #08956**: picked up 8/28/98, relinquished 9/02/98
  Vehicle usage is documented by manifests and job sheets indicating the vehicles were used to do work on the days in question. Time card summations are also attached documenting CBI workers regular and overtime hours during the time in question.

If there is any additional information we can provide to satisfy your concerns, please do not hesitate to ask.

Thank You,

Larry A. Doyle *CET CHMM*
Executive Vice President

GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national governmental regulations.

If I am a large quantity generator I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment; OR, if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

STATE OF FLORIDA
DEPARTMENT OF ENVIRONMENTAL PROTECTION
ENFORCEMENT TELEPHONE LOG

CASE NAME: Cliff Berry, Inc. - Miami

DATE: March 15, 2000 TIME: 1:30 pm

CONTACT: Mr. Larry Doyle OF: Cliff Berry, Inc.

WAS CALLED. PHONE #: 954/763-3390

DISCUSSION:

I contacted Mr. Doyle to find out the status of the response to the Department's 2/18/00 letter. He stated that CBI was had been trying to locate the documentation and was almost complete. He stated that the response would go out this week. Mr. Doyle also mentioned that CBI just needed to have their SPCC plan signed and sealed and would then send in the application for transfer facility.

RE: Hazardous Waste Manifests

Dear Mr. Doyle:

As discussed in the meeting held January 20, 2000, and per our phone conversation today (February 17, 2000), enclosed, please find copies of manifests the Department has obtained in which the time period between waste pick-up and waste transfer occurred over a weekend. Timeframes are as follows:

1. Shipping Ticket# 08956: picked up 8/28/98 (Friday), relinquished 9/2/98 (Wednesday),

2. Manifest# 04350: picked up 3/18/98 (Wednesday), relinquished 3/23/98 (Monday),

3. Manifest# 12898: picked up 1/28/98 (Wednesday), relinquished 1/31/98 (Saturday),

4. Manifest# 01637: picked up 4/16/98 (Thursday), relinquished 4/20/98 (Monday),

5. Manifest# 52101: picked up 5/21/99 (Friday), relinquished 5/29/99 (Saturday).

Please respond with an explanation as to these timeframes within 15 days of receipt of this letter. If you have any questions please contact me at 561/681-6719. Thank you for your cooperation.

Sincerely,

John Harris

ENFORCEMENT MEETING DOCUMENTATION

Attendees: See meeting attendance list

Location: SED DEP Office **Date:** January 25, 2000 **Time:** 1:30 pm

Subject: Response to December 20, 1999 Warning Letter

Meeting Requested By: Larry Doyle

Meeting Objectives:

To discuss resolution to the possible violations cited in the December 20, 1999 Warning Letter and to provide CBI with the proposed penalty.

Notes: Introductions were made and the meeting attendance list was passed around.

Mr. Doyle addressed the determination issue by stating that CBI did not perform the TCLP analyses and that CBI's waste profiling was performed using CSR Rinker's waste acceptance requirements.

Accountability for waste from the car painting operation was discussed. Mr. Doyle stated that only a deminimus amount of waste was generated, but the waste that is generated is accumulated in a satellite container. Mr. Jeffrey Smith explained the Department's definition of a satellite container.

Transfer facility notification was then addressed. The Department explained what requirements the State holds for transfer facilities and discussed what new State Rules may be implemented. CBI maintained that the trucks did not stay at the facility for more than 24 hours. The Department agreed to forward CBI copies of the manifests and time periods in question and CBI agreed to provide a response explaining truck activity.

The Department explained what transfer facility logs are and that the transfer facility needs to maintain them.

The Department provided CBI with Doug Outlaw's phone number so that CBI can further investigate the future legislation

concerning transfer facilities, should CBI decide to register as a transfer facility.

The Department provided CBI with a copy of the penalty justification. Mr. Cliff Berry questioned the Department's rationale for citing determination. Mr. John Harris explained that it was the Department's understanding that since CBI was utilizing Rinker's pre-burn criteria, samples that tested high for metals were not always TCLPed. Mr. Mark Hoover stated that they were and that CBI would provide the documentation.

****

Follow-up actions/dates:

The Department will send correspondence to CBI with the manifests and timeframes in question. CBI will then provide a response.

****

DEPARTMENT OF ENVIRONMENTAL PROTECTION
CIVIL PENALTY AUTHORIZATION
SOUTHEAST DISTRICT

1. Type of Alleged Violation: Hazardous Waste

2. Investigator: John Harris

3. Violator: Cliff Berry, Inc. - Miami (CBI)

4. Location: 3033 Northwest North River Drive, Miami, Florida

5. Date Submitted:

6. Nature of Alleged Violations:

A compliance evaluation inspection was conducted at CBI on July 28, 1999. CBI is a permitted used oil processor, hazardous waste transporter and hazardous waste generator. The purpose of the inspection was to review CBI's waste management practices and associated records.

CBI is currently under contract with the Department's Bureau of Emergency Response (BER) to respond to emergency response abatements and incidents involving abandoned drums. Three potential hazardous waste violations were noted during the inspection.

7. Penalty Rationale:

CBI failed to notify the Department as being a hazardous waste transfer facility, failed to maintain transfer facility records, and failed to perform proper hazardous waste determinations as discussed in the attached inspection report.

8. Penalty Recommendations:

We recommend that $28,500 in civil penalties be sought against CBI as calculated in the attached Penalty Computation Worksheets.

Inspection Report

FLD058560699
SQG, HW Transporter
Used Oil Transporter
Used Oil Transfer Facility

INTRODUCTION

On July 28, 1999, a hazardous waste and used oil compliance evaluation inspection was conducted at Cliff Berry, Incorporated (CBI) at 3033 Northwest North River Drive, Miami, Florida 33142. CBI has been operating at this location since 1994. This facility employs approximately 20 people and is connected to the city sewer. CBI operates 24 hours per day with three shifts. This facility is under contract with the Department to manage abandoned drums. Facility manager Mr. William Parkes, Jr. and operations manager Mr. Kevin Pelluche hosted the site inspection and record review. Department personnel conducting the inspection were Mr. John Harris and Mr. Jeffrey Smith.

SITE INSPECTION

Mr. Parkes stated that the facility was a used oil processor and transporter, a hazardous waste transporter and transfer facility, and a used oil filter transporter, transfer facility, and marketer. Per Mr. Parkes, used oil filters are crushed and then sent to U.S. Foundry for recycling. Also per Mr. Parkes, oil is shipped to CBI's Fort Lauderdale facility and oily water is shipped to the Miami facility for processing. After processing, the water is discharged to the Publicly Owned Treatment Works (POTW).

CBI has an on-site laboratory which it uses for internal purposes. Outside lab work is done by Precision Environmental Laboratories. At the time of the inspection, CBI tested oily water for TRPH, TSS, metals, phenols, pH, and halogens. The tests conducted were to determine if the waste fell within CBI's treatability standards. The lab uses solvents, including acetone for rinsing glassware, and toluene and xylene for the TRPH analyses. According to the lab technician, the solvents are distilled and the residue discarded in the sink.

In the facility's used oil receiving area, the waste is poured through a screen before processing to filter out any debris. About one to two drums of this debris are generated per week. According to Mr. Parkes, the debris is profiled and bulked with solid waste. Any sludges that are picked up or generated are also profiled while still containerized and again after being bulked. The sludges are then sent to CSR Rinker Materials Corporation (Rinker).

Noted in the receiving area were five drums labeled "Car Wash

Sludge - Lucy's Shell."

CBI's drum storage area is divided into "Hazardous" and "Non-Hazardous" sections. Noted in the "Non-Hazardous" drum storage were the following drums labeled: "MDTA Sludge" and "Home Depot #209."

Also noted on-site was a car painting operation. At the time, CBI was unable to provide the Department with information pertaining to the operation, but stated that Mr. Jackson Serna was the person in charge of the car painting.

RECORD REVIEW

CBI's manifests and Land Disposal Restriction (LDR) documentation appeared to be in order. The Department hand delivered a letter dated July 28, 1999 requesting CBI's Miami facility to respond with information to settle certain unresolved issues from the Department's 8/12/98 inspection. Information requested included manifests, hazardous waste determinations, and drivers' logs. Hazardous waste container inspection logs were noted to be deficient. Also requested was information on the facility's status as being a transfer facility, since CBI has never notified the Department as being a hazardous waste transfer facility. In addition, information on shipments of hazardous waste generated by the Drug Enforcement Agency (DEA) where CBI was the initial transporter was requested (details on DEA waste and related shipments may be found in the inspection report for CBI's Fort Lauderdale facility).

DEPARTMENT FINDINGS

CBI is currently under contract with the Department's Bureau of Emergency Response (BER) to respond to emergency response abatements and incidents involving abandoned drums. Both CBI and BER are considered co-generators of any hazardous waste collected as part of this contract. Due to the possibility of co-generating greater than 1,000 kg of hazardous waste in any given month, the Department recommends that CBI maintain standards required of a Large Quantity Generator (LQG) of hazardous waste.

Hazardous waste generated or collected from the BER contract is not considered as hazardous waste subject to Rule 62-730.171, F.A.C., but generated hazardous waste subject to 40 CFR 262.34(a).

An exit interview was conducted. The Department requested profiles on the screen media, on the five drums labeled "Car Wash Sludge - Lucy's Shell", on the drum labeled "MDTA Sludge", and on the drum labeled "Home Depot #209." The Department also advised CBI to segregate listed wastes generated in the lab and to account for wastes generated from the car painting operation.

On September 28, 1999, the Department held a meeting with CBI, who hand delivered correspondence addressing the Department's July 28, 1999 letter and the exit interview. In the meeting, CBI stated that trucks transporting hazardous waste are brought back to the facility and left overnight or the weekend until they are ready to be transported again. CBI stated that it had not applied for transfer facility status. Information concerning the DEA waste may be found in the inspection report for CBI's Fort Lauderdale facility.

The analytical profiles of the drums the Department had requested were also provided, but TCLP data was not available for samples with potential to fail the TCLP analysis due to elevated levels of metals. CBI explained that the facility had been using Rinker pre-burn standards when determining if waste was hazardous. Per CBI, the TCLP analyses had not been performed because Rinker had not required it.

Additionally, CBI provided evidence of implementation of corrected hazardous waste container inspection logs.

The Department is again requesting accountability for wastes originating from the car painting operation.

Hazardous waste and used oil management rules may have been violated, as noted below ("Summary of Potential Violations"). The Department expects the potential violations to be corrected in an expeditious and safe manner. The Department's Enforcement Section is willing to provide assistance within the Department's capabilities, limitations, time constraints, and workload. In addition, if not already done, the Department suggests that a copy of the hazardous waste regulations (40 CFR 260-268 and 279) be obtained from local public, college, or law libraries or EPA Region IV or US Government Printing Office. Please be advised that the Department does not have copies of 40 CFR 260-268 and 279 to hand out.

Used Oil Transfer Facility

SUMMARY OF POTENTIAL VIOLATIONS

40 CFR 262.11

Hazardous Waste Determination

CBI failed to perform a proper hazardous waste determination by failing to perform TCLP analyses on drum contents, screen material, and paint wastes from the vehicle painting operation.

Chapter 62-730.171, F.A.C.

Transfer Facility Notification

CBI failed to notify the Department as being a hazardous waste transfer facility.

Chapter 62-730.171(e), F.A.C.

Transfer Facility Logs

CBI failed to maintain written logs of when all hazardous waste enters and leaves the facility.

CORRECTIVE ACTIONS

40 CFR 262.11

Hazardous Waste Determination

Effective immediately, CBI should perform proper hazardous waste determinations on all wastes which meet the definition of a solid waste as defined in 40 CFR 261.2.

Chapter 62-730.171, F.A.C.

Transfer Facility Notification

CBI should immediately notify the Department of its hazardous waste transfer facility status or cease operating a hazardous waste transfer facility.

Hazardous Waste Compliance/Enforcement

CLIFF BERRY, INC. - MIAMI
PENALTY JUSTIFICATION

Based upon Guidelines for Characterizing
RCRA Violations dated 4/18/95

1. **Regulation:** 40 CFR 262.11
Hazardous Waste Determination

Violation: Cliff Berry, Inc. (CBI) failed to perform a proper hazardous waste deterimination by failing to perform TCLP analyses on drum contents, screen material, and paint waste from the vehicle painting operation.

Characterization of Violation:

Potential for Harm - Moderate

Using the Potential for Harm Ranking System, the nature of the waste, volume of waste (>25 drums), potential discharge of the waste, and potential receptors (10-100 people) were taken into account in determining this portion of the matrix. The potential for harm was determined to be moderate.

Extent of Deviation - Major

The RCRA penalty calculation guidelines in the DEP enforcement manual indicate that the extent of deviation for a facility's failure to perform a proper determination prior to shipping waste for disposal is major.

Multi-day - N/A

Economic Benefit - Unable to determine.

Adjustments - N/A

2. **Regulation:** Ch. 62-730.171, F.A.C.
Transfer Facility Notification

Violation: CBI failed to notify the Department as being a hazardous waste transfer facility.

Characterization of Violation:

Potential for Harm - Moderate

The RCRA penalty calculation guidelines in the DEP

enforcement manual indicate that the potential for harm for a transfer facility failing to notify the Department of its activities is moderate.

Extent of Deviation - Major

The RCRA penalty calculation guidelines in the DEP enforcement manual indicate that the extent of deviation for a transfer facility failing to notify the Department of its activities is major.

Multi-day - N/A

Economic Benefit - Unable to determine.

Adjustments - N/A

3. **Regulation:** Ch. 62-730.171(e), F.A.C.
Transfer Facility Logs

Violation: CBI failed to maintain written logs of when all hazardous waste enters and leaves the facility.

Characterization of Violation:

Potential for Harm - Moderate

The RCRA penalty calculation guidelines in the DEP enforcement manual indicate that the potential for harm for a transfer facility failing maintain written records of hazardous waste entering and leaving the facility is moderate.

Extent of Deviation - Major

The RCRA penalty calculation guidelines in the DEP enforcement manual indicate that the extent of deviation for a transfer facility failing to maintain written records of hazardous waste entering and leaving the facility is major.

Multi-day - N/A

Economic Benefit - Unable to determine.

Adjustments - N/A

RETURN RECEIPT REQUESTED

WARNING LETTER #WL99-0239HW13SED

Mr. Larry A. Doyle
Cliff Berry, Inc.
3033 Northwest North River Drive
Miami, FL 33142

Miami-Dade County
HW - Cliff Berry, Inc.

RE: Cliff Berry, Inc.; Compliance Evaluation Inspection

Dear Mr. Doyle:

The purpose of this letter is to advise you of possible violations of law for which you may be responsible, and to seek your cooperation in resolving the matter. A hazardous waste and used oil compliance evaluation inspection was conducted at your facility on July 28, 1999. During this inspection, possible violations of Chapter 403, Florida Statutes (F.S.) and Chapter 62-730, Florida Administrative Code (F.A.C.) regarding hazardous waste management were noted. The observations of the Department are in the attached inspection report. Florida Statutes provide that facilities must comply with Title 40 Code of Federal Regulations (CFR) parts 260 through 268, as adopted in Chapter 62-730 F.A.C., and 40 CFR part 279, as adopted in Chapter 62-710, F.A.C.

You are advised that any activity at your facility that may be contributing to violations of the above described statutes and rules should be ceased immediately. Operation of a facility in violation of State statutes or rules may result in liability for damages and restoration, and the judicial imposition of civil penalties up to $50,000 per violation per day pursuant to Section 403.727, F.S.

You are requested to contact Mr. John Harris of this office at (561) 681-6719 within 15 days of the receipt of this Warning Letter to arrange a meeting to discuss the issues. The Department is interested in reviewing any facts you may have that will assist in determining whether any violations have occurred. You may bring anyone with you to the meeting you feel could help resolve this matter.

If, after further investigation, the Department determines that the violations occurred, this matter may be resolved through entry of a Consent Order which will include a compliance schedule and an appropriate penalty. In accordance with the August 12, 1997 Department's "Settlement Guidelines for Civil Penalties" and the RCRA Civil Penalty Policy of 1990, a proposed penalty will be issued under separate cover.

Please be advised that this Warning Letter is part of an agency investigation preliminary to agency action in accordance with Section 120.57(4), F.S. We look forward to your cooperation in completing the investigation and resolution of this matter.

Sincerely,

Melissa L. Meeker 12/17/99

Inspection Report

FLD058560699
SQG, HW Transporter
Used Oil Transporter
Used Oil Transfer Facility

INTRODUCTION

On July 28, 1999, a hazardous waste and used oil compliance evaluation inspection was conducted at Cliff Berry, Incorporated (CBI) at 3033 Northwest North River Drive, Miami, Florida 33142. CBI has been operating at this location since 1994. This facility employs approximately 20 people and is connected to the city sewer. CBI operates 24 hours per day with three shifts. This facility is under contract with the Department to manage abandoned drums. Facility manager Mr. William Parkes, Jr. and operations manager Mr. Kevin Pelluche hosted the site inspection and record review. Department personnel conducting the inspection were Mr. John Harris and Mr. Jeffrey Smith.

SITE INSPECTION

Mr. Parkes stated that the facility was a used oil processor and transporter, a hazardous waste transporter and transfer facility, and a used oil filter transporter, transfer facility, and marketer. Per Mr. Parkes, used oil filters are crushed and then sent to U.S. Foundry for recycling. Also per Mr. Parkes, oil is shipped to CBI's Fort Lauderdale facility and oily water is shipped to the Miami facility for processing. After processing, the water is discharged to the Publicly Owned Treatment Works (POTW).

CBI has an on-site laboratory which it uses for internal purposes. Outside lab work is done by Precision Environmental Laboratories. At the time of the inspection, CBI tested oily water for TRPH, TSS, metals, phenols, pH, and halogens. The tests conducted were to determine if the waste fell within CBI's treatability standards. The lab uses solvents, including acetone for rinsing glassware, and toluene and xylene for the TRPH analyses. According to the lab technician, the solvents are distilled and the residue discarded in the sink.

In the facility's used oil receiving area, the waste is poured through a screen before processing to filter out any debris. About one to two drums of this debris are generated per week. According to Mr. Parkes, the debris is profiled and bulked with solid waste. Any sludges that are picked up or generated are also profiled while still containerized and again after being bulked. The sludges are then sent to CSR Rinker Materials Corporation (Rinker).

Noted in the receiving area were five drums labeled "Car Wash

Sludge - Lucy's Shell."

CBI's drum storage area is divided into "Hazardous" and "Non-Hazardous" sections. Noted in the "Non-Hazardous" drum storage were the following drums labeled: "MDTA Sludge" and "Home Depot #209."

Also noted on-site was a car painting operation. At the time, CBI was unable to provide the Department with information pertaining to the operation, but stated that Mr. Jackson Serna was the person in charge of the car painting.

RECORD REVIEW

CBI's manifests and Land Disposal Restriction (LDR) documentation appeared to be in order. The Department hand delivered a letter dated July 28, 1999 requesting CBI's Miami facility to respond with information to settle certain unresolved issues from the Department's 8/12/98 inspection. Information requested included manifests, hazardous waste determinations, and drivers' logs. Hazardous waste container inspection logs were noted to be deficient. Also requested was information on the facility's status as being a transfer facility, since CBI has never notified the Department as being a hazardous waste transfer facility. In addition, information on shipments of hazardous waste generated by the Drug Enforcement Agency (DEA) where CBI was the initial transporter was requested (details on DEA waste and related shipments may be found in the inspection report for CBI's Fort Lauderdale facility).

DEPARTMENT FINDINGS

CBI is currently under contract with the Department's Bureau of Emergency Response (BER) to respond to emergency response abatements and incidents involving abandoned drums. Both CBI and BER are considered co-generators of any hazardous waste collected as part of this contract. Due to the possibility of co-generating greater than 1,000 kg of hazardous waste in any given month, the Department recommends that CBI maintain standards required of a Large Quantity Generator (LQG) of hazardous waste.

Hazardous waste generated or collected from the BER contract is not considered as hazardous waste subject to Rule 62-730.171, F.A.C., but generated hazardous waste subject to 40 CFR 262.34(a).

An exit interview was conducted. The Department requested profiles on the screen media, on the five drums labeled "Car Wash Sludge - Lucy's Shell", on the drum labeled "MDTA Sludge", and on the drum labeled "Home Depot #209." The Department also advised CBI to segregate listed wastes generated in the lab and to account for wastes generated from the car painting operation.

On September 28, 1999, the Department held a meeting with CBI, who hand delivered correspondence addressing the Department's July 28, 1999 letter and the exit interview. In the meeting, CBI stated that trucks transporting hazardous waste are brought back to the facility and left overnight or the weekend until they are ready to be transported again. CBI stated that it had not applied for transfer facility status. Information concerning the DEA waste may be found in the inspection report for CBI's Fort Lauderdale facility.

The analytical profiles of the drums the Department had requested were also provided, but TCLP data was not available for samples with potential to fail the TCLP analysis due to elevated levels of metals. CBI explained that the facility had been using Rinker pre-burn standards when determining if waste was hazardous. Per CBI, the TCLP analyses had not been performed because Rinker had not required it.

Additionally, CBI provided evidence of implementation of corrected hazardous waste container inspection logs.

The Department is again requesting accountability for wastes originating from the car painting operation.

Hazardous waste and used oil management rules may have been violated, as noted below ("Summary of Potential Violations"). The Department expects the potential violations to be corrected in an expeditious and safe manner. The Department's Enforcement Section is willing to provide assistance within the Department's capabilities, limitations, time constraints, and workload. In addition, if not already done, the Department suggests that a copy of the hazardous waste regulations (40 CFR 260-268 and 279) be obtained from local public, college, or law libraries or EPA Region IV or US Government Printing Office. Please be advised that the Department does not have copies of 40 CFR 260-268 and 279 to hand out.

FLD058560699
SQG, HW Transporter
Used Oil Transporter
Used Oil Transfer Facility

SUMMARY OF POTENTIAL VIOLATIONS

40 CFR 262.11 — Hazardous Waste Determination

CBI failed to perform a proper hazardous waste determination by failing to perform TCLP analyses on drum contents, screen material, and paint wastes from the vehicle painting operation.

Chapter 62-730.171, F.A.C. — Transfer Facility Notification

CBI failed to notify the Department as being a hazardous waste transfer facility.

Chapter 62-730.171(e), F.A.C. — Transfer Facility Logs

CBI failed to maintain written logs of when all hazardous waste enters and leaves the facility.

CORRECTIVE ACTIONS

40 CFR 262.11 — Hazardous Waste Determination

Effective immediately, CBI should perform proper hazardous waste determinations on all wastes which meet the definition of a solid waste as defined in 40 CFR 261.2.

Chapter 62-730.171, F.A.C. — Transfer Facility Notification

CBI should immediately notify the Department of its hazardous waste transfer facility status or cease operating a hazardous waste transfer facility.

DATE: DEC 20 1999

SUBJECT: Civil Penalty Authorization Memo (CPAM)

Enclosed please find a Civil Penalty Authorization Memo for Cliff Berry, Inc. - Miami (CBI). Attached for your review and consideration is a copy of the inspection report. The civil penalty calculated for CBI is $ 28,500.

cc: West Palm Beach, DEP File

DEPARTMENT OF ENVIRONMENTAL PROTECTION
CIVIL PENALTY AUTHORIZATION
SOUTHEAST DISTRICT

1. Type of Alleged Violation: Hazardous Waste

2. Investigator: John Harris

3. Violator: Cliff Berry, Inc. - Miami (CBI)

4. Location: 3033 Northwest North River Drive, Miami, Florida

5. Date Submitted:

6. Nature of Alleged Violations:

A compliance evaluation inspection was conducted at CBI on July 28, 1999. CBI is a permitted used oil processor, hazardous waste transporter and hazardous waste generator. The purpose of the inspection was to review CBI's waste management practices and associated records.

CBI is currently under contract with the Department's Bureau of Emergency Response (BER) to respond to emergency response abatements and incidents involving abandoned drums. Three potential hazardous waste violations were noted during the inspection.

7. Penalty Rationale:

CBI failed to notify the Department as being a hazardous waste transfer facility, failed to maintain transfer facility records, and failed to perform proper hazardous waste determinations as discussed in the attached inspection report.

8. Penalty Recommendations:

We recommend that $28,500 in civil penalties be sought against CBI as calculated in the attached Penalty Computation Worksheets.

Inspection Report

FLD058560699
SQG, HW Transporter
Used Oil Transporter
Used Oil Transfer Facility

INTRODUCTION

On July 28, 1999, a hazardous waste and used oil compliance evaluation inspection was conducted at Cliff Berry, Incorporated (CBI) at 3033 Northwest North River Drive, Miami, Florida 33142. CBI has been operating at this location since 1994. This facility employs approximately 20 people and is connected to the city sewer. CBI operates 24 hours per day with three shifts. This facility is under contract with the Department to manage abandoned drums. Facility manager Mr. William Parkes, Jr. and operations manager Mr. Kevin Pelluche hosted the site inspection and record review. Department personnel conducting the inspection were Mr. John Harris and Mr. Jeffrey Smith.

SITE INSPECTION

Mr. Parkes stated that the facility was a used oil processor and transporter, a hazardous waste transporter and transfer facility, and a used oil filter transporter, transfer facility, and marketer. Per Mr. Parkes, used oil filters are crushed and then sent to U.S. Foundry for recycling. Also per Mr. Parkes, oil is shipped to CBI's Fort Lauderdale facility and oily water is shipped to the Miami facility for processing. After processing, the water is discharged to the Publicly Owned Treatment Works (POTW).

CBI has an on-site laboratory which it uses for internal purposes. Outside lab work is done by Precision Environmental Laboratories. At the time of the inspection, CBI tested oily water for TRPH, TSS, metals, phenols, pH, and halogens. The tests conducted were to determine if the waste fell within CBI's treatability standards. The lab uses solvents, including acetone for rinsing glassware, and toluene and xylene for the TRPH analyses. According to the lab technician, the solvents are distilled and the residue discarded in the sink.

In the facility's used oil receiving area, the waste is poured through a screen before processing to filter out any debris. About one to two drums of this debris are generated per week. According to Mr. Parkes, the debris is profiled and bulked with solid waste. Any sludges that are picked up or generated are also profiled while still containerized and again after being bulked. The sludges are then sent to CSR Rinker Materials Corporation (Rinker).

Noted in the receiving area were five drums labeled "Car Wash

Sludge - Lucy's Shell."

CBI's drum storage area is divided into "Hazardous" and "Non-Hazardous" sections. Noted in the "Non-Hazardous" drum storage were the following drums labeled: "MDTA Sludge" and "Home Depot #209."

Also noted on-site was a car painting operation. At the time, CBI was unable to provide the Department with information pertaining to the operation, but stated that Mr. Jackson Serna was the person in charge of the car painting.

RECORD REVIEW

CBI's manifests and Land Disposal Restriction (LDR) documentation appeared to be in order. The Department hand delivered a letter dated July 28, 1999 requesting CBI's Miami facility to respond with information to settle certain unresolved issues from the Department's 8/12/98 inspection. Information requested included manifests, hazardous waste determinations, and drivers' logs. Hazardous waste container inspection logs were noted to be deficient. Also requested was information on the facility's status as being a transfer facility, since CBI has never notified the Department as being a hazardous waste transfer facility. In addition, information on shipments of hazardous waste generated by the Drug Enforcement Agency (DEA) where CBI was the initial transporter was requested (details on DEA waste and related shipments may be found in the inspection report for CBI's Fort Lauderdale facility).

DEPARTMENT FINDINGS

CBI is currently under contract with the Department's Bureau of Emergency Response (BER) to respond to emergency response abatements and incidents involving abandoned drums. Both CBI and BER are considered co-generators of any hazardous waste collected as part of this contract. Due to the possibility of co-generating greater than 1,000 kg of hazardous waste in any given month, the Department recommends that CBI maintain standards required of a Large Quantity Generator (LQG) of hazardous waste.

Hazardous waste generated or collected from the BER contract is not considered as hazardous waste subject to Rule 62-730.171, F.A.C., but generated hazardous waste subject to 40 CFR 262.34(a).

An exit interview was conducted. The Department requested profiles on the screen media, on the five drums labeled "Car Wash Sludge - Lucy's Shell", on the drum labeled "MDTA Sludge", and on the drum labeled "Home Depot #209." The Department also advised CBI to segregate listed wastes generated in the lab and to account for wastes generated from the car painting operation.

On September 28, 1999, the Department held a meeting with CBI, who hand delivered correspondence addressing the Department's July 28, 1999 letter and the exit interview. In the meeting, CBI stated that trucks transporting hazardous waste are brought back to the facility and left overnight or the weekend until they are ready to be transported again. CBI stated that it had not applied for transfer facility status. Information concerning the DEA waste may be found in the inspection report for CBI's Fort Lauderdale facility.

The analytical profiles of the drums the Department had requested were also provided, but TCLP data was not available for samples with potential to fail the TCLP analysis due to elevated levels of metals. CBI explained that the facility had been using Rinker pre-burn standards when determining if waste was hazardous. Per CBI, the TCLP analyses had not been performed because Rinker had not required it.

Additionally, CBI provided evidence of implementation of corrected hazardous waste container inspection logs.

The Department is again requesting accountability for wastes originating from the car painting operation.

Hazardous waste and used oil management rules may have been violated, as noted below ("Summary of Potential Violations"). The Department expects the potential violations to be corrected in an expeditious and safe manner. The Department's Enforcement Section is willing to provide assistance within the Department's capabilities, limitations, time constraints, and workload. In addition, if not already done, the Department suggests that a copy of the hazardous waste regulations (40 CFR 260-268 and 279) be obtained from local public, college, or law libraries or EPA Region IV or US Government Printing Office. Please be advised that the Department does not have copies of 40 CFR 260-268 and 279 to hand out.

Hazardous Waste Compliance/Enforcement

CLIFF BERRY, INC. - MIAMI
PENALTY JUSTIFICATION

Based upon Guidelines for Characterizing
RCRA Violations dated 4/18/95

1. **Regulation:** 40 CFR 262.11
Hazardous Waste Determination

Violation: Cliff Berry, Inc. (CBI) failed to perform a proper hazardous waste deterimination by failing to perform TCLP analyses on drum contents, screen material, and paint waste from the vehicle painting operation.

Characterization of Violation:

Potential for Harm - Moderate

Using the Potential for Harm Ranking System, the nature of the waste, volume of waste (>25 drums), potential discharge of the waste, and potential receptors (10-100 people) were taken into account in determining this portion of the matrix. The potential for harm was determined to be moderate.

Extent of Deviation - Major

The RCRA penalty calculation guidelines in the DEP enforcement manual indicate that the extent of deviation for a facility's failure to perform a proper determination prior to shipping waste for disposal is major.

Multi-day - N/A

Economic Benefit - Unable to determine.

Adjustments - N/A

2. **Regulation:** Ch. 62-730.171, F.A.C.
Transfer Facility Notification

Violation: CBI failed to notify the Department as being a hazardous waste transfer facility.

Characterization of Violation:

Potential for Harm - Moderate

The RCRA penalty calculation guidelines in the DEP

enforcement manual indicate that the potential for harm for a transfer facility failing to notify the Department of its activities is moderate.

Extent of Deviation - Major

The RCRA penalty calculation guidelines in the DEP enforcement manual indicate that the extent of deviation for a transfer facility failing to notify the Department of its activities is major.

Multi-day - N/A

Economic Benefit - Unable to determine.

Adjustments - N/A

3. **Regulation:** Ch. 62-730.171(e), F.A.C.
Transfer Facility Logs

Violation: CBI failed to maintain written logs of when all hazardous waste enters and leaves the facility.

Characterization of Violation:

Potential for Harm - Moderate

The RCRA penalty calculation guidelines in the DEP enforcement manual indicate that the potential for harm for a transfer facility failing maintain written records of hazardous waste entering and leaving the facility is moderate.

Extent of Deviation - Major

The RCRA penalty calculation guidelines in the DEP enforcement manual indicate that the extent of deviation for a transfer facility failing to maintain written records of hazardous waste entering and leaving the facility is major.

Multi-day - N/A

Economic Benefit - Unable to determine.

Adjustments - N/A

Penalty Computation Worksheet

Department Staff Responsible for the Penalty Computations:

John Harris James H. Bussey Tiffany Holmes

Date: December 3, 1999

PART I - Class A Penalty Determinations*

Alleged Violation Type	Potential for Harm	Extent of Dev.	Matrix Amount	Multi-day	Economic Benefit	Total
1. 40 CFR 262.11 Hazardous Waste Determination	Moderate	Major	$ 9,500	N/A	N/A	$ 9,500
2. Ch. 62-730.171, F.A.C. Notification	Moderate	Major	$ 9,500	N/A	N/A	$ 9,500
3. Ch. 62-730.171 (e), F.A.C. Facility Logs	Moderate	Major	$ 9,500	N/A	N/A	$ 9,500

Total Penalties for all Violations: $ 28,500

* All penalty calculations are based on the Florida Department of Environmental Protection Hazardous Waste Regulation Section's *Guidelines for Characterizing RCRA Violations* revised as of 4/18/95 and *Guidelines for Characterizing Used Oil Violations* revised as of 8/96. Certain violations require Potential for Harm Ranking System characterization and have been utilized where applicable. See Part III for each violation for which an adjustment or multi-day penalty is determined. The attached civil penalty worksheets are formulated and tendered only in the context of settlement negotiations in order to attempt to reach a cooperative settlement.

November 19, 1999

Mr. Jeffrey A. Smith
Environmental Manager
Department of Environmental Protection
Southeast District
P.O. Box 15425
West Palm Beach, FL 33416

RECEIVED
NOV 24 1999
DEPT OF ENV PROTECTION
WEST PALM BEACH

Dear Mr. Smith:

This letter is in response to your letter dated November 1, 1999. The following information is in response to your questions. Manifest number 12540 provided for disposal to CSR Rinker was dated 08/25/99 in line 16. This is the date the material was vacuumed into a 3200-gallon vacuum box. As shown is section 18 and 20 of manifest number 12540 the vacuum box did not leave Cliff Berry, Inc. property until 08/30/99. This date corresponds to the date the laboratory results were received at Cliff Berry, Inc. from U.S. Biosystems. In response to your second question Cliff Berry, Inc. has three receiving pans in Miami: North, Middle/Center, and South. Attached is a copy of the analytical results with necessary TCLP results from the removal of material from these pans. The analytical was pulled from the vacuum box after the cleaning of these pans. Finally, in reference to MDTA analysis, it appears a second sample was pulled for the TCLP procedures. This is actually a common occurrence due to sample depletion in the lab from the original analytical parameters.

It is the understanding of Cliff Berry, Inc. the attached information brings to a close all questions raised by Florida D.E.P. with respect to Cliff Berry, Inc.'s operations and facilities. Please contact Larry Doyle, Executive Vice President, or myself if you have any further questions pertaining to your July 1999 or August 1998 inspections.

Thank you,

Mark T. Hoover, CHMM
Hazardous Materials Coordinator

Mr. Mark Hoover
Cliff Berry, Inc.
3033 Northwest North River Drive
Miami, FL 33142

Miami-Dade County
HW-Cliff Berry, Inc.

RE: Response dated October 13, 1999 to September 28, 1999 meeting.

Dear Mr. Hoover:

The Department has reviewed your response dated October 13, 1999 to the September 28, 1999 meeting and offers the following comments:

1. In the data supplied for the Fort Lauderdale facility's receiving pan media, it was noted that the date it was sampled was 8/26/99, yet line 17 of the waste's manifest (manifest #12540) is dated 8/25/99. Please explain how this waste stream was determined to be non-hazardous prior to being profiled. Please provide any previous data and manifests for this waste stream for 1997, 1998, and 1999.

2. In the data supplied for the Miami facility's receiving pan media, it was noted that the samples were labeled "north", "south", and "middle." Please explain the relationship of the three samples to the pan media. Also, the manifest you provided (manifest #08737) indicates that the waste was shipped as non-hazardous. The chain of custody indicates that the samples were only analyzed for Rinker's pre-burn treatment standards, which do not require TCLP analysis. 40 CFR 261.24 states that TCLP shall be used in a proper hazardous waste determination. If no TCLP analyses were performed, please explain how the non-hazardous status of the waste was determined.

3. In the data supplied for a sample labeled "Bus Trenches", it was noted that the date sampled was 8/4/99. Attached to this was TCLP data for a sample labeled "MDTA", which was noted as being

Mr. Jeffrey A. Smith
Environmental Manager
Department of Environmental Protection
Southeast District
P.O. Box 15425
West Palm Beach, FL 33416

Dear Mr. Smith:

This letter is in response to Cliff Berry, Inc.'s visit to your office on September 30, 1999. The first attachment is in response to your request for waste determination on the screening material at Cliff Berry, Inc.'s facilities. Attached are copies of current waste determinations and disposal manifests. This material is called "receiving pan media" and consists of the screened material and the pan filtrate directly under the screens. Additionally you requested appropriate waste determination with TCLP results for Metro-Dade Transit Authority (MDTA). Waste determination is attached.

It is the understanding of Cliff Berry, Inc. the attached information brings to a close all questions raised by Florida D.E.P. with respect to Cliff Berry, Inc.'s operations and facilities. Please contact Larry Doyle, Executive Vice President, or myself if you have any further questions pertaining to your July 1999 or August 1998 inspections.

Thank you,

Mark T. Hoover, CHMM
Hazardous Materials Coordinator

223-6934

GENERAL TERMS AND CONDITIONS OF SALE

1. CSR Rinker Materials, Aggregate Division (Seller) agrees to load as quickly as conditions permit, but shall not be liable for any loss, damage, or delay, occasioned by strikes, labor difficulties, fires, accidents, breakdowns, storm, war, delays of carrier, or by any other cause beyond Seller's control.
2. The Seller does not guarantee Rail or Truck rate.
3. The Seller shall not be responsible for any damages incurred after the aggregate has been loaded at the quarry.
4. Any exception or claim by the Purchaser shall be deemed waived unless made in writing within seventy-two (72) hours from the time of loading. The Seller shall be given full opportunity to investigate any exception or claim, but in no event shall the Seller's liability exceed the purchase price of the material against which the claim is made. The weights of the Seller will be the absolute billing quantities unless otherwise agreed in writing between Seller and Customer.
5. Any taxes that are, or may be levied by any political body on the materials quoted herein, or on the purchase or sale thereof, or on incidental transportation charges when the same are paid or are required to be paid or collected by the Seller, shall be added to the prices quoted herein.
6. If the purchaser fails to comply with the terms of payment stated on the face hereof, the Seller reserves the right to cancel any unfilled portion of any contracts or order and the Purchaser shall remain liable for all unpaid accounts.
7. If invoice is not paid when due, interest will accrue at the rate of 12% per annum. If after due dates the account is placed in the hands of any attorney or collection agency for collection of all or part of amount of invoice or invoices, the customer shall be liable for all costs of collection including a reasonable attorney's fee (for trial and/or appeal) or collection charge in an amount not less than 12% of the balance due.
8. The Trucker has the responsibility of inspecting the load before leaving CSR's Site.

CAUTION!

Aggregate products are naturally occurring materials (limestone/dolomite, granite (basalt), sand, or gravel). May contain more than 0.1% crystalline silica.

NERATOR CERTIFICATION

CSR Rinker

Dear _____:

Thank you for contacting CSR Rinker Environmental Services regarding proper disposition of petroleum contaminated materials generated at the above referenced site. Federal laws and regulations require that you, as the generator of a waste material, make a determination of whether the waste material is a hazardous waste. CSR Rinker Environmental Services is not authorized to accept shipments of hazardous waste.

Laboratory analysis received by CSR Rinker Environmental for the petroleum contaminated materials generated at the above referenced site indicates the presence of the following constituents in the concentration indicated:

Constituent	Analytical Result

Please provide the following clarification regarding the petroleum contaminated material:

1. Describe the process/activity which generated the petroleum contaminated material.

2. Identify by brand or product name any solvent or cleaning agents used in the process or activity generating the petroleum contaminated materials.

3. Identify any other wastes or materials that have been mixed with or added to the petroleum contaminated material.

4. Please execute the following Generator's Waste Declaration:

To the best of my knowledge, the referenced petroleum contaminated materials presented to CSR Rinker Environmental Services for recycling contains no toxic or hazardous constituents that could cause the waste material to be classified as a characteristic or listed hazardous waste. Based upon my knowledge of the source of the materials and the processes or activities involved in generating the materials, I hereby certify that the materials are not a hazardous waste.

ENFORCEMENT MEETING DOCUMENTATION

Attendees: See meeting attendance list

Location: SED DEP Office **Date:** September 28, 1999 **Time:** 1:00 pm

Subject: Response to 7/28/99 exit interview and 7/28/99 letter

Meeting Requested By: Clifford Berry, II

Meeting Objectives:

To review the response provided by CBI and to determine what, if any, further action needs to be taken by CBI.

Notes: Introductions were made and the meeting attendance list was passed around.

The exit interview to the 7/28/99 compliance evaluation inspection was addressed first. The Department mentioned the fact that data from the "screen material" had not been furnished. CBI agreed to provide the data.

When asked as to the origin of the drums marked "Lucy's Shell", Mr. Mark Hoover replied that it was sludge water sucked from a storm drain from the edge of the property.

CBI also stated that they have eliminated the TRPH test and therefore will no longer use xylene.

The 7/28/99 letter was addressed next and the letter's issues were responded to by the following:

Issue #1: Mr. Larry Doyle responded by stating that the wrong date was written by Mr. Hoover and, in fact, Mr. Hoover had not even been employed by CBI until 1996.

Issue #2: The data requested was provided.

Issue #3: Mr. Doyle responded that the drums could not be tracked due to a computer system crash. In response to why the samples had not been run for TCLP, Mr. Doyle and Mr. Hoover stated that CBI only runs totals as required by Rinker and

doesn't run TCLP in all cases, including some samples that are high in total metals.

Issue #4: Mr. Hoover stated that trucks transporting hazardous waste sometimes park overnight at their facility during the weekends and that CBI is not a hazardous waste transfer facility.

Issue #5: Copies of driver's logs were provided.

Issue #6: Copies of CBI's revised hazardous waste container inspection logs were provided.

Issue #7: CBI stated that they will provide the data requested pertaining to the "screen material."

Issue #8: CBI stated that they were contracted by Ferguson Harbour, Inc. (FHI) and that CBI was the first transporter only. CBI stated that FHI had told them to use the shipping ticket instead of the hazardous waste manifest and to ship the waste as waste from a conditionally exempt generator. Mr. Jeff Smith asked if CBI had anything in writing to that effect. Mr. Doyle said he would try to find something.

Issue #9: CBI stated that either process knowledge from the generator is used in determining if waste is hazardous, or the waste is sampled prior to transport. Mr. Smith informed CBI that should hazardous waste be accidentally transported, not to transport it back, but to call the DEP.

Issue #10: CBI stated that since TRPH is the only test involving hazardous waste, they are doing away with that test. A copy of the methods CBI uses was provided.

****

Follow-up actions/dates:

CBI will provide a written response to the Department by 10/15/99 addressing the FHI contract and the data for the screening material.

****

Hand Delivered 9/27/1999

RE: CBI Compliance Inspection on 7/28/99

Dear Mr. Smith;

This letter is in response to your recent visit to Cliff Berry Inc.'s Miami Facility along with your letter dated July 28, 1999 that you hand carried and presented to Bill Parkes, our representative on site that day. I will address your questions in the order that you presented them and attach any supporting materials to this letter in the form of numbered attachments.

In your first series of questions posed on your Hazardous Waste Inspection Exit Interview form, you requested profiles on pan sludge. Several copies of our pan sludge profiles are attached as attachment #1. (Note: this same information answers your question #7 in your letter dated July 26, 1999.) You requested a profile of the 5 drums labeled "car wash sludge - Lucy's Shell". It is attached as attachment #2. You asked for the profile of our "roll-off sludge". It is attached as attachment #3. You asked for the profile on the MDTA sludge. It is attached as attachment #4. Finally, you asked for the profile for the Home Depot #209 drum. It is attached as attachment #5.

With respect to your direction to store any listed wastes we accumulate from the lab area. Based upon your comments during the site survey, we have changed our anayltical process so that we do not generate any listed wastes as a result of the lab testing we do. Specifically, our lab technician now performs the following tests:

Jar Test	no waste
TSS	no waste
PH	use electrode
Lead	use electrode
Cadmium	use electrode
Barium	Spectrophotometer
Chromium	Spectrophotometer
Silver	Spectrophotometer
Zinc	Spectrophotometer

We no longer will do TRPH in house. When it is done, we will send a sample to Precision, VOC or Rinker (all State Certified Labs) to do the test.

I believe the above addresses the questions your team raised during the out-briefing subsequent to your site visit on 7/28/99. Although you did not request it, I have attached as attachment #6 a copy of the testing protocols used by our lab technician when doing the above referenced tests. Please note, all the above tests are detailed except for lead cadmium and pH, which are analyzed utilizing an electrode meter.

I am also in receipt of your hand delivered letter addressed to me dated 7/28/99. I will address the questions you raised in that letter in the order you asked them.

#1 You asked that the date discrepancy on manifest document number 01133 be explained. I spoke with Mark Hoover, our Hazardous Waste Coordinator, and asked him to explain the discrepancy. He stated he signed the document on February 18, 1998 not on February 18, 1995.

P.O. Box 13079 Port Everglades Station Fort Lauderdale, Florida 33316 (954) 763 3390 fax (954) 763 8375

It was a clerical error on his part. In actuality, he didn't begin employment with CBI until September 1996.

#2 You asked for the determinations, manifests and other receipts for disposal for all the hazardous wastes generated for the past three years as a result of the FDEP Abandoned Drum Contract. I have attached the requested manifests as attachment #7.

#3 In question number three (3), you requested several specific pieces of information. The first two requests are going to be hard to come up with. Specifically, at the time of the initial site visit, we tracked drums (referred to in your question) using our computer tracking system (Wixel). This was explained to Mr. Peluso at the time of the initial site visit in 1998. Subsequent to that site visit, our DOS-based Wixel computer system we utilized to track wastes by drum number failed. Since the software developer no longer supports Wixel in DOS, we were forced to reinitialized our system using the same software, but in Windows format. In doing so, we lost our ability to track old drums recorded in the old DOS program numbering system using our new Windows based system. The numbers simply don't crossover.

As indicated on site and in my letter to Mr. Peluso, these were non-hazardous drums having conflicting labeling from the generator. We did not hear from DEP with respect to these drums for nearly a year. In the interim, they were processed and properly disposed of as non-hazardous last year. Unfortunately, for us to go back and get the information you requested, we could only do so if we had the name of the customer and date of service. Using this info, we would then do a file by file paper search until we came across the specific drums we were looking for. Based upon the foregoing, I'm requesting relief from your request to provide the specific documentation for the two drums of non-hazardous oily water/sludge in question.

The third portion of your request was for a TLCP analysis for Barium and Lead for two 55-gallon drums of sludge that came from Metro Dade. We do not have this info. The reason we don't is our waste determination was based on disposal of the material as petroleum contaminated sludge at Rinker Materials. TCLP testing is not required if the material meets Rinker's acceptance criteria. Rinker requires total metals for Barium and Lead to be under 4940ppm and 108ppm respectively, therefore the additional TCLP determination is not necessary. Attached is a complete copy of Rinker's acceptance criteria labeled attachment #8.

#4 I must take exception to the reference in question number four that we discussed that CBI was a hazardous waste transfer facility. I was at that site survey and can attest that CBI being a hazardous waste transfer facility was not addressed. I do recall Mr. Peluso asking about several drums positioned inside our DEP holding area. At the time I indicated to Mr. Peluso that CBI co-generated the wastes under the Florida State Abandoned Drum Contract, (representative copy attached as attachment #9). As such, we acknowledge that we are a large quantity generator due to the volumes we may handle under this contract. As you are well aware having been at our facility, we have an excellent space that could easily accommodate a 10-day permit. But to date, we have not applied for this status. Had any of the drums mentioned in your letter in question #4 been addressed during the site visit, I would have responded in like fashion in my letter dated August 26, 1998. As per my discussion in the previous section, going back and finding the documentation (by drum) for non-hazardous drums using our computer is really complicated due to the change in Wixel operating systems.

With respect to our participation in the Florida Abandoned Drum Contract. In our region, this contract is administered by Mr. Terry Edwards (or his staff) who are FL DEP emergency response personnel located here in Ft Lauderdale. Since we assume co-generation status for the waste under the contract, Mr. Edwards or his staff, review all our paperwork and authorize any determinations before any waste is disposed of under the Florida Abandoned Drum Contract.

I am concerned that based upon your comments in your letter, you or other District personnel may feel Cliff Berry Inc. has not met its responsibilities while participating under the Florida Abandoned Drum Contract. I can assure you that we have made every effort to comply with the contract's parameters and have maintained an open dialog with the local FL DEP emergency responders to assure this remains the case. However, if you have any concerns, I want to get them resolved to your satisfaction. I'd be glad to set up a meeting up with your office, Mr. Edwards office and CBI to resolve and concerns you may have with respect to how CBI performs under the Florida Abandon Drum Contract and our practice of co-generating wastes recovered under this contract with Florida DEP.

#5 Copies of drivers logs we have on file are attached as attachment #10

#6 Based upon the discussions at the on site visit, our weekly log was updated to include the number of containers we have on site. A copy of the new log is provided as attachment #11.

#7 You requested determinations and disposal documentation for the sludge we accumulate as a result of our pre-treatment of industrial waste water at our plant. Attached as attachment #1 are the analyticals and receipts for disposal (incineration) at Rinker's facility.

#8 The issue you raise in question number eight of your letter was addressed by Cliff Berry Inc. last summer. This came to light when Florida DEP questioned US DEA with respect to the transportation and/or disposal of chemicals recovered in drug busts within Florida State boundaries. Cliff Berry Inc. was involved as a subcontractor to Ferguson Harbour, Inc. of Hendersonville, TN. Under the contract, Cliff Berry, Inc. responded to emergency response requests from the U.S. Drug Enforcement Administration. At issue was the instructions CBI received from Ferguson Harbour Inc., our employer, to manifest all materials as conditionally exempt (CESQG) on an EMI, shipping ticket. Please note; it was our understanding that this was written in Ferguson Harbour's contract with the federal government. When the issue was raised, CBI contacted Ferguson Harbour and indicated we would no longer accommodate their shipping requests unless we manifested the chemicals asrequested by FL DEP (on a HazWaste Manifest) and sent them to City Environmental in Tampa for disposal. Subsequently, all of CBI's responses under this contract were handled this way. I have attached copies of paperwork from recent responses under this contract for your review as attachment #12.

With respect to your specific request in question number eight, our office contacted Ferguson Harbour Inc. and requested additional information in support of how the chemicals picked up and disposed of at the beginning of the contract were handled. Ferguson Harbour, Inc.'s response and supporting documentation is attached as attachment #13. If additional information, other than attached, is desired I would be pleased to set up a conference call between, Cliff Berry, Inc., U.S. D.E.A., Ferguson Harbour, Inc., and FL DEP in order to resolve this issue to your satisfaction.

#9 Cliff Berry, Inc. only accepts non-hazardous materials for disposal into the Miami facility. All material is determined to be non-hazardous prior to being stored at CBI-Miami. This is done by chemical analysis or by profile stating generator knowledge of the waste stream. As an added precaution for Cliff Berry, Inc. and our clients an additional analysis is run on all material that has been bulked/composited from it's original container. In the unlikely event a material is received at CBI-Miami, is tested and determined to be a hazardous waste it is immediately returned to the generator. At this time appropriate waste material profiles for facility approvals are generated and Cliff Berry, Inc. brokers the waste to a hazardous waste, part B permitted, TSD.

#10 I believe the information you requested in this question was already addressed in the response to a question asked on the exit interview and presented as attachment #6.

If there is any additional information we can provide to satisfy your concerns, please do not hesitate to ask.

Thank You,

Larry A. Doyle *CET CHMM*
Executive Vice President

HAZARDOUS WASTE INSPECTION EXIT INTERVIEW

FACILITY: Cliff Berry, Inc. DATE: 7/28/99 TIME: 1:15pm

INTERVIEW PARTICIPANTS: Jeffrey Smith, John Harris - DEP
William Parkes, Jim Dotchin - CBI

This exit interview is the Department's attempt to advise you early in the process of possible violations of Florida Administrative Code Chapter 17-730, which adopts 40 CFR Parts 260-266 by reference. It is possible that the list of violations noted (checked) is incomplete. After a complete internal file review by the Department an inspection report will be finalized. In most cases, the violations noted by the inspector will not change in the final report, therefore, you are advised to immediately begin correcting these deficiencies noted below.

Please also be aware that the Department has signed an enforcement agreement with the U.S. Environmental Protection Agency which calls for the assessment and collection of monetary penalties when violations, such as these, are noted. While your quick response in correcting the violations may not reduce the calculated penalties, continued non-compliance may result in greater penalty liability.

The following violations have been tentatively identified:

___ 1. Hazardous Waste Determination [262.11].
___ 2. Notification as a generator [262.12].
___ 3. Manifest Deficiencies [262 Subpart B].

HW-Cliff Berry, Inc.

RE: Compliance Evaluation Inspection; Hazardous Waste

Dear Mr. Doyle:

The Hazardous Waste Section is in receipt of your letter dated August 26, 1998, responding to concerns brought up during the compliance evaluation inspection conducted on August 12, 1999. In seeking resolution on several issues, the following comments are provided:

1. In your response to the Department's request to provide all hazardous waste manifests for the year, one of the manifests provided, manifest document number 01133, lists the date of shipment as February 18, 1995. This date corresponds to the date when it's accompanying Land Disposal Restriction (LDR) was signed. However, the manifest lists the date of transport and final disposal as February 18, 1998 and February 20, 1998, respectively. Please explain this discrepancy.

2. In your response to the Department's request to provide hazardous waste determinations for all hazardous waste received in the last year, you stated that all Cliff Berry, Inc.'s (CBI) hazardous waste is generated from the FDEP Abandoned Drum Contract. Please list all emergency response wastes picked up by CBI for the past three years and associated determinations and manifests or other receipts for disposal.

3. The Department requested that CBI provide determinations on several containers noted during the inspection. In your response, you stated that one such container labeled "Flammable - paint related waste material" was mislabeled and was actually

non-hazardous oily water. Please provide documentation for determination and when it was received. Also provide this information for drum #98-1600. Finally, the analysis included for two 55-gallon drums labeled "Metro-Dade Sludge" should have included a TCLP analysis for barium and lead in order to make a proper determination. Please provide this data.

4. During the inspection, the Department became aware that CBI - Miami is a hazardous waste transfer facility. According to Department records, CBI has never notified as being a hazardous waste transfer facility. Pursuant to Rule 62-730.171, F.A.C., please provide the Department with copies of CBI's contingency plan, personnel training records, and hazardous waste transfer facility logs for the past three years. Also provide documentation for the following containers noted during the inspection: one 55-gallon drum labeled "August 8, 1998 - emergency response", one 55-gallon drum labeled "July 6, 1998 - emergency response", one 55-gallon drum labeled "acetone, DERM determination, June 25, 1998" and three 55-gallon drums of paint related waste from Kem Import/Export arriving at CBI August 4, 1998, accumulated June 25, 1998.

5. Please provide copies of drivers logs for the past three years.

6. Pursuant to Rule 62-730.160(6), F.A.C., please provide copies of hazardous waste container inspection logs.

7. Please provide determinations CBI has made on sludges and screen material generated from on-site activities. Also provide documentation as to the disposal of these wastes.

8. CBI transported hazardous waste for the Drug Enforcement Agency (DEA) on the following dates without a utilizing a Uniform Hazardous Waste Manifest or an Environmental Protection Agency (EPA) identification number:

- 11/6/98, document number 00010,
- 11/5/98, document number 09907, 09908, 09909,
- 10/15/98, document numbers 09897, 09898, 09899,
- 9/29/98, document number 09892,
- 9/9/98, document number 08955,
- 9/9/98, document number 08950,
- 9/1/98, document number 08953,
- 8/28/98, document number 08356,
- 3/1/98, document number 04350,
- 3/98, document number 04227,
- 1/28/98, document number 12898.

Please explain why these wastes were shipped without proper

documentation and EPA ID numbers and please provide associated LDR documentation for each referenced manifest.

9. A letter to the Department dated July 7, 1999, states that solid waste received is first analyzed while still in the drum and then again as a composite sample after it has been bulked. Please explain procedures that take place in the event that analytical data from a drum determines it to be hazardous waste.

10. Please describe in detail analytical testing performed on-site, including waste streams and volumes generated.

Please respond within 14 days of receipt of this letter. If you have any questions, please contact Mr. John Harris of this office at 561/681-6719. Thank you for your cooperation.

Sincerely,

Jeffrey A. Smith
Environmental Manager
Hazardous Waste Compliance/Enforcement Section

FYI. I received notification from Federal DOT that they have taken administrative action against Cliff Berry as a result of my complaint regarding the mismanagement of the DEA drug bust waste.

If DOT found them in violation, I am sure we can too.

Q for CBI:

1. HW transfer waste: Supporting docs for any HW over 10 days. We need copy of their HW transfer facility logs for past 3 years to see what went over 10 days. Drums noted during CEI that need docs: 8/8/98 from emerg response, 7/6/98 from emerg response, Drum from Key Import arrvied at CBI 6/4/98 and accum date 6/25/98, 6/15/98 DERM drum (acetone?).

2. Descibe analytical testing performed on-site and waste streams and volumes generated. (Potassium cyanide, halogenated oil, chloroform and lead, silver and chrome from "lab wastes", tetrachloro (D039, D008 on manifests provided), sodium hypochlorite (D002 on manifest provided), paint related wastes. ONLY 4 manifests to account their wastes for an entire year? Remember that these manifests account for HW they pick up for DEP and DERM. Related to #5 below.

3. Determination on sludges and screen material generated by CBI.

4. Describe recordkeeping for non-HW on-site. We may want to sample some containers to verify non-hw.

5. List of all emerg. response wastes picked up by CBI for past 3 years (that they became the generator of) and assoc. determinations and manifest or other receipts for disposal. See Comment #2 on CBI's 8/26/98 letter.

6. See Comment #6 of CBI's 8/26/98 letter. provide documentation for determination of flammable drum and when received in #1, provide documentation for determination and when received by CBI for Drum 98-1600 in #3, TCLP metals (barium and lead) on sludge in #4.

7. Copies of HW container inspection logs (62-730.160(6))

Lets get together with everyone involved with CEI and go over to see what we may have already looked at.

I read the package from Gil about CBI and DEA, after reading it I would prefer to address this issue under separate cover for now, but we can combine into one CO later if possible. I need to figure out

what's going on and do some research for citations. I don't want to slow resolution of this CEI down due to issues concerning the DEA stuff.

DEPT OF ENV PROTECTION
WEST PALM BEACH

Mr. Vincent Peluso
Engineer III
Dept. of Environmental Protection
400 N. Congress Avenue
PO Box 15425
West Palm Beach, FL 33416

Dear Sir:

This letter is in response to your recent visit to our Miami Facility at 3033 NW North River Dr., Miami, FL. It was a pleasure to showcase our facility and have the opportunity to discuss current regulatory initiatives. We are proud of our facility and the personnel who work hard maintaining it.

During our discussions, you had several questions that I have researched and collected the supporting documentation you were looking for. As I recall, the focus of your questions dealt with the documentation we had on site vs. at our FT Lauderdale corporate office. Based upon your suggestions, I have instituted a change in our procedures which ensures the Hazardous Waste Coordinator not only maintains a copy of the manifests at the corporate office but a duplicate set will be maintained at the facility as well. However, in order for us to assure accurate reporting of all waste streams handled by Cliff Berry Inc., we will continue to coordinate and report all hazardous material (and waste) transactions using our computer system located here at the corporate offices.

As I stated earlier, during your visit, you had several comments where you requested additional information and or documentation. As a matter of clarity, I have addressed your comments in the order you gave them.

COMMENT 1: You requested a copy of our hazardous waste manifests for the year.
A copy of all Cliff Berry, Inc.'s hazardous waste manifests and corresponding land disposal restriction notifications have been attached. (Attachment 1)

COMMENT 2: You requested a hazardous waste determination for all the hazardous wastes we received in the past year.
All Cliff Berry, Inc.'s hazardous waste is generated from the FLDEP Abandoned Drum Contract, as noted by case number on the attached manifests, except for two situations. Cliff Berry, Inc. generates paint related material and halogenated waste oil that is disposed of periodically as generated.

COMMENT 3: During your tour, your team noticed nine drums (located within the containment area we have for the used oil filter crusher) had lost their labels and directed us to label them and provide pictures of the drums labeled.
Our facility personnel verified all the used oil filter drums on site have been labeled "Used Oil Filters". See Attachment 2.

COMMENT 4: During your tour, your team suggested we realign the used oil filter drums (containing used oil filters to be crushed) that were staged within the containment area for processing.
Our facility personnel have realigned the drums creating row's in the used oil filter processing area allowing for the inspection of drums.

COMMENT 5: A question was raised with respect to the wastes in the satellite accumulation area.
A copy of the hazardous waste manifest for the disposal of accumulated laboratory waste is attached. (Attachment 3) Additional copies of the hazardous waste profiles for these materials have been attached. (Attachment 4)

P.O. Box 13079 Port Everglades Station Fort Lauderdale, Florida 33316 (954) 763 3390 fax (954) 763 8375

COMMENT 6: During our debrief session, you requested we provide the waste determinations for several containers you noted during the facility tour.

1) Flammable - paint related waste material: This drum was brought in as an abandoned drum for Dade County Dept. of Environmental Protection. It was characterized on site as non-hazardous oily water. The drum had original labels on it, which were inadvertently left on and not relabeled as non-hazardous as they should have been. The material will be screened by CBI's lab and processed as oily water.
2) Seven 5gal buckets (no label): The seven 5gallon containers contained used oil and were not labeled correctly. A halogen check was performed on this material verifying it contained less than 1,000 PPM and processed as used oil.
3) Drum #98-1600 labeled as flammable: This 55-gal drum was brought in as an abandoned drum for Dade County Dept. of Environmental Protection. It was characterized on site as non-hazardous solidified tar. The drum had original labels on it, which were inadvertently left on and not relabeled as non-hazardous as they should have been. The material will be disposed of at an appropriated disposal facility.
4) Two 55-gal drums labeled Metro Date Sludge: Two non-hazardous oil water separator sludge drums were brought into CBI's facility on 8/11/98. The morning of 8/12/98 the drums were found to be bulging. In the process of venting the drums before over-packing DEP discovered the drums in the middle of our over-packing process. Due to the severity of the bulging the drums were allowed to vent for a several hour period prior to over-packing. Analysis is attached. (Attachment 5)
5) Eight 5 gal buckets labeled parts washer: The eight 5 gallon containers from Publix contain parts washer sludge. Publix does not use chlorinated solvent. Analysis is attached. (Attachment 6)

I appreciate your insight and experience with respect to our drum management practices and would appreciate any recommendations you might have in the future. Please feel free to call or stop by if you have any further questions.

Thank you,

Larry A. Doyle CET, CHMM
Executive vice-president

City Environmental Services, Inc. of Florida (CESF)

Land Disposal Restriction (LDR) Notification Form

Generator Cliff Berry Inc. US EPA ID # FLD058560699 Manifest Doc. # 01711

1 Manifest page # and line item	2 EPA Hazardous waste code	3a WW	3b NWW	4 Subcategory (if applicable)	5 F001-F005 Constituents (if applicable)	6 UHC; Underlying Hazardous Constituents (if applicable)	7 LDR Certification (one per line)
1a.	D039		X				2
	D035		X				2

This list of waste codes continues ☐ Yes ☐ No

Waste on following line item(s) is subject to "California List" restrictions of 40 CFR 268.32 for the following characteristic(s):

California List Characteristics	Manifest Line Item(s)
Hazardous wastes >= 50 ppm PCBs	
Hazardous wastes with HOCs >= 1000 ppm (40 CFR 268, appendix III)	
Liquid hazardous wastes with nickel concentrations > 134 mg/L	
Liquid hazardous wastes with thallium concentrations > 130 mg/L	

LDR Certifications (Please list only one for each of the above line entries)

1. This waste complies with the treatment standards specified in 40 CFR 268, Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d).
2. This waste does not meet the treatment standards specified in 40 CFR 268, Subpart D, or exceeds the applicable treatment standards set forth in CFR 268.32 or RCRA section 3004(d). Waste must be treated to the appropriate standards.
3. This waste has been treated in accordance with 40 CFR 268.40 to remove the hazardous characteristic. The above listed underlying hazardous constituents are likely present in the waste, and must be treated to the applicable standards set forth in 40 CFR 268.40 prior to land disposal.
4. This waste is lab pack waste for incineration, and qualifies for alternative treatment as described in 40 CFR 268.42(c). Codes not eligible for alternate treatment are as follows: D009, F019, K003, K004, K005, K006, K062, K071, K100, K106, P010, P011, P012, P076, P074, U134, and U151
5. This waste qualifies for exemption from land disposal restriction (please attach explanation which includes the date exemption was granted.)
6. This waste is not restricted under 40 CFR 268

I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d). I believe that the information I submitted is true, accurate, and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

City Environmental Services, Inc. of Florida (CESF)

Land Disposal Restriction (LDR) Notification Form

Generator: Cliff Berry US EPA ID # FLD053560699 Manifest Doc. # 0-1682

1 Manifest page # and line item	2 EPA Hazardous waste code	3a WW	3b NWW	4 Subcategory (if applicable)	5 F001-F005 Constituents (if applicable)	6 UHC; Underlying Hazardous Constituents (if applicable)	7 LDR Certification (one per line)
11a	D002		X	Non CWA			2

This list of waste codes continues Yes ____ No X

Waste on following line item(s) is subject to "California List" restrictions of 40 CFR 268.32 for the following characteristic(s):

California List Characteristics	Manifest Line Item(s)
Liquid hazardous wastes >= 50 ppm PCBs	
Hazardous wastes with HOCs >= 1000 ppm (40 CFR 268, appendix III)	
Liquid hazardous wastes with nickel concentrations > 134 mg/L	
Liquid hazardous wastes with thallium concentrations > 130 mg/L	

LDR Certifications (Please list only one for each of the above line entries)

1. This waste complies with the treatment standards specified in 40 CFR 268, Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d).
2. This waste does not meet the treatment standards specified in 40 CFR 268, Subpart D, or exceeds the applicable treatment standards set forth in CFR 268.32 or RCRA section 3004(d). Waste must be treated to the appropriate standards.
3. This waste has been treated in accordance with 40 CFR 268.40 to remove the hazardous characteristic. The above listed underlying hazardous constituents are likely present in the waste, and must be treated to the applicable standards set forth in 40 CFR 268.40 prior to land disposal.
4. This waste is lab pack waste for incineration, and qualifies for alternative treatment as described in 40 CFR 268.42(c). Codes not eligible for alternate treatment are as follows: D009, F019, K003, K004, K005, K006, K062, K071, K100, K106, P010, P011, P012, P078, P078, U134, and U151
5. This waste qualifies for exemption from land disposal restriction (please attach explanation which includes the date exemption was granted.)
6. This waste is not restricted under 40 CFR 268

I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d). I believe that the information I submitted is true, accurate, and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

*Regulated Hazardous Constituents, not the Underlying Hazardous Constituents (UHC's), must be identified for waste streams which carry the EPA Waste Codes, F001-F005, F039 and for California List wastes (40CFR268.32). UHC's must be identified for D001 (if Not Treated by CMBST or RORGS), D002, D012-D043 (if treated in Non-CWA, Non-CWA equivalent or Non-SDWA facilities). Wastewater forms of D012-D017 do not require that UHC's be identified.
List the constituents on the corresponding line or include a marked copy of the Universal Treatment Standards Sheet for each affected WMDS.

Special Conditions:

A. Waste Requiring No Further Treatment
B. Lab Pack Waste Qualifying for Alternative Treatment under 40 CFR 268.42(c)
C. Hazardous Waste Debris subject to standard treatment requirements, 40 CFR 268.40
D. Hazardous Waste Debris subject to alternative standards in 40 CFR 268.45 (List Contaminants)
E. Waste Qualifying for Exemption and not subject to Land Disposal Restriction (Explain)
F. Waste already treated to remove a hazardous characteristic which requires additional treatment for underlying hazardous constituents (List constituents)
G. For Chemical Manufacturers, Petroleum Refineries, Coke By-Product Facilities and RCRA TSDFs handling wastes subject to 40 CFR 61 subpart FF ONLY: This waste is a "Controlled Benzene Waste" which is subject to the notification requirements of 40 CFR 61 subpart FF.

Waste analysis is attached where available, otherwise, the information contained herein is based upon my thorough knowledge of the waste(s).
I hereby certify that I believe that the information I submitted is true, accurate and complete.

Signature [signature] Title CHEMIST Date 2/16/98

Waste Streams Identified by Special Condition A: I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40CFR 268.32 or RCRA section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

Waste Streams Identified by Special Condition B: I certify under penalty of law that I personally have examined and am familiar with the waste and that the lab pack contains only wastes which have not been excluded under appendix IV to 40 CFR 268. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

Waste Streams Identified by Special Condition F: I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

FORM A

Customer Notification And Certification

Generator Name/Location: Cliff Berry, Inc.

EPA I.D. Number: FLD058560699

Waste Profile or ARF Designation: _____

Manifest Number: _____

EPA Waste Number(s): _____

Waste Analysis Available? Yes (attached) _____ No _____ On file at receiving facility X

Unrestricted Waste Notification *(Category 1)*

Mark the statement below if you generate a waste that is not a land disposal restricted waste (the waste has no applicable treatment standards).

☐ *I notify that I am familiar with the waste through analysis and testing or through knowledge of the waste to support this notification that the waste is not restricted as specified in 40 CFR 268, Subpart D or any applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d).*

Restricted Waste / Debris Notification *(Category 2)*

Mark statement (2a) below if you generate a waste that is restricted from land disposal (the waste has applicable treatment standards). NOTE-1: A waste may pass one or more standards and require treatment or be varianced for others. In this case, all applicable categories must be checked. NOTE-2: D001, D002, and D0012 - D043 wastes must be evaluated for underlying constituents found in 40 CFR 268.48 (Table UTS), that are reasonably expected to be present. A list of these constituents must be included on FORM B, or attached to and accompany this notification with each waste shipment. Mark statement (2b) if you generate a debris waste that will be treated to the alternate debris standards located in 40 CFR 268.45.

☒ **(2a) Restricted Waste Notification**
I notify that I am familiar with the waste through analysis and testing or through knowledge of the waste to support this notification that the waste is subject to the treatment standards specified in 40 CFR 268 Subpart D. The waste (a) must be treated to the appropriate regulatory treatment standard, by the appropriate regulatory treatment method; (b) qualifies for a variance as described in Category 3 below; or (c) meets some or all of the standards as described in Category 4 below.

☐ **(2b) Alternate Debris Treatment Notification:** **This hazardous debris is subject to the alternate treatment standards of 40 CFR 268.45.**
The waste contains the following contaminants subject to treatment (check all that apply):

_____ 268.45(b)(1) - Toxicity characteristic debris;
_____ 268.45(b)(2) - Debris contaminated with listed waste;
_____ 268.45(b)(3) - Cyanide reactive debris.

Restricted Waste Variance Notification *(Category 3)*

Mark the statement below and list the applicable variance date on Form B, if you generate a waste which does not require treatment prior to land disposal because of a variance (including a case-by-case extension under 40 CFR 268.5, a nationwide variance under 40 CFR 268 Subpart C, a no migration petition under 40 CFR 268.6, or other applicable variance).

☐ *I notify pursuant to 40 CFR 268.7(a)(3) that I am familiar with the waste through analysis and testing or through knowledge of the waste to support this notification that this waste is subject to a national capacity variance under 40 CFR 268 Subpart C, or a case-by-case extension under 40 CFR 268.5, or an exemption under 40 CFR 268.6.*

Restricted Waste Certification (Treatment Standards Met) *(Category 4)*

Mark the certification statement below if you generate a waste that is restricted from land disposal (the waste has applicable treatment standards), and the waste meets the standards as generated. Note: All applicable constituent standards must be accounted for. A waste may pass one or more standards and require treatment or be variance for other constituents. In this case, all applicable categories must be checked.

☐ *I certify under penalty of law that I personally have examined and are familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA 3004(d). I believe that the information I submitted is true, accurate, and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.*

CONSTITUENTS IN SOLVENT, CALIFORNIA LIST AND CHARACTERISTIC WASTES.

F001 - F005 spent solvents

Legend #	Constituent Name
1	Acetone
2	Benzene
3	n-Butyl alcohol
* 4	Carbon disulfide
5	Carbon tetrachloride
6	Chlorobenzene
7	Cresol (m- and p-isomers)
8	o-Cresol
* 9	Cyclohexanone
10	1,2-Dichlorobenzene
11	Ethyl Acetate
12	Ethyl Benzene
13	Ethyl Ether
14	Isobutyl alcohol
* 15	Methanol
16	Methylene Chloride
17	Methyl Ethyl Ketone
18	Methyl isobutyl ketone
19	Nitrobenzene
20	Pyridine
21	Tetrachloroethylene
22	Toluene
23	1,1,1-Trichloroethane
24	1,1,2-Trichloroethane
25	Trichlorothylene
26	1,1,2-Trichloro-1,2,2-trifluoroethane
27	Trichloromonofluoro-methane
28	Xylenes (total)

Legends 29-31 RESERVED

** If these constituents are present alone or in any combination of the three, then non waste water forms of these constituents must be treated to TCLP levels as indicated in 268.40.*

Technology-Based standards For F005 when the constituent is the only listed F001 - F005 solvent

Legend #	Constituent Name
32	2-Ethoxyethanol
33	2-Nitropropane

Legends 34-43 RESERVED

CALIFORNIA LIST WASTES

Legend #	Constituent Name
44	Nickel
45	Thallium
46	Cyanide (Liquid)
47	Liquid Polychlorinated Biphenyls (PCB's)
48	Halogenated Organic compounds (HOC's)

APPROVAL LETTER

DEAR Mark

DATE 4/20/98

PLEASE BE ADVISED THAT YOUR RECENT SUBMISSION FOR THERMAL TREATMENT OF NON-HAZARDOUS PETROLEUM CONTAMINATED MATERIAL HAS BEEN APPROVED FOR RECEIPT BY RINKER ENVIRONMENTAL SERVICES.

THIS APPROVAL APPLIES TO THE FOLLOWING PROJECT:

SITE: Publix Super Markets VOLUME 10R
777 SW 12th
Deerfield Bch

IS BLENDING REQUIRED? NO / YES ____

METAL____ RATIO____ TO____ METAL____ RATIO____ TO____

METAL____ RATIO____ TO____ METAL____ RATIO____ TO____

TO FACILITATE THE ACCURATE AND EFFICIENT HANDLING OF THIS PROJECT, ALL MANIFESTS AND RELATED SHIPPING PAPERS MUST STATE THE "SITE" INFORMATION AS PROVIDED ABOVE.

ALL APPROVED MATERIAL MUST BE SCHEDULED FOR DELIVERY TO RINKER. FAILURE TO SCHEDULE LOADS COULD RESULT IN REJECTION.

TO PREVENT OFF-LOADING DELAYS AND/OR REFUSAL OF MATERIAL, A COPY OF THIS APPROVAL LETTER MUST ACCOMPANY EACH SHIPMENT.

THANK YOU FOR ALLOWING RINKER ENVIRONMENTAL SERVICES TO BE OF ASSISTANCE TO YOU. IF YOU HAVE ANY QUESTIONS, PLEASE LET US KNOW.

SINCERELY,

RINKER ENVIRONMENTAL SERVICES

HAZARDOUS WASTE INSPECTION EXIT INTERVIEW

FACILITY: Cliff Berry, Inc. DATE: 8/12/98 TIME: 12:30 PM

INTERVIEW PARTICIPANTS: Larry A. Doyle, Amy Myers - CBI V. PELUSO & FDEP J. BUSSEY G. SUPERVILLE

This exit interview is the Department's attempt to advise you early in the process of possible violations of Florida Administrative Code Chapter 17-730, which adopts 40 CFR Parts 260-266 by reference. It is possible that the list of violations noted (checked) is incomplete. After a complete internal file review by the Department an inspection report will be finalized. In most cases, the violations noted by the inspector will not change in the final report, therefore, you are advised to immediately begin correcting these deficiencies noted below.

Please also be aware that the Department has signed an enforcement agreement with the U.S. Environmental Protection Agency which calls for the assessment and collection of monetary penalties when violations, such as these, are noted. While your quick response in correcting the violations may not reduce the calculated penalties, continued non-compliance may result in greater penalty liability.

The following violations have been tentatively identified:

___ 1. Hazardous Waste Determination [262.11].
___ 2. Notification as a generator [262.12].
___ 3. Manifest Deficiencies [262 Subpart B].
___ 4. Recordkeeping [test results, manifest, biennial report].
___ 5. Personnel Training [265.16; 262.34(d)].
___ 6. Contingency Plan [265 Subpart D; 262.34(d)(5)].
___ 7. Preparedness and prevention [265 Subpart C; 262.34(d)(4)].
✓ 8. Container Requirements [265 Subpart I; 262.34(d)(2)].
___ 9. Tank requirements [265 Subpart J].
✓ 10. Exceeding accumulation storage time [262.34(a); 262.34(d)].
___ 11. Accumulation start date & labels on containers [262.34(a)(2)&(3)].
___ 12. Accumulating >1000 kg without meeting SQG standards [261.5].
___ 13. Not ensuring delivery of HW to a proper TSD facility [261.5].
___ 14. Notification as a TSD facility [264.11].
___ 15. Treatment, storage or disposal without a permit [F.A.C. 17-730].
___ 16. Ground water monitoring [265 Subpart F].
___ 17. Security Requirements [265.14].
___ 18. Storing HW less than 50 feet from the property line [265.176].
___ 19. "No Smoking" signs, ignitable/reactive requirements [265.17].
___ 20. Closure/Post-closure [265 Subpart G].
___ 21. Financial Responsibility [264 Subpart H].
___ 22. Failure to comply with the provisions of a Department Issued Permit or with the provisions of the Consent Order.
___ 23. Other _____

COMMENTS: 1. Please provide hazardous manifests (for July) and list of waste pick up by Cliff Berry 15 days of this exit interview. 2. Please provide waste

Jeffrey Smith for CDI
RECEIPT ACKNOWLEDGED BY

Vincent Palmer
INVESTIGATOR

USED OIL PROCESSOR CHECKLIST

Facility Name: Cliff Berry, Inc. Date: 8-12-98

Facility Representative: Larry Doyle Facility ID : FLD 058 560 699

Inspector: Pelusa, Bussey, Superville Registration # H013 - 308165

40 CFR 279 Subpart F -- Processor Standards

1. Is the facility exempt under any of the following? (279.50(a)) Y____ N✓

   Transporter or burner processing incidental to normal course of operations? Y____ N✓

   Processors who also generate, transport, market, dispose or burn used oil must comply with the applicable Subparts of Part 279.

2. Does the processor have an EPA ID Number? (279.51(a)) Y✓ N____

3. Is the processor Registered? (62-710.500(1)(b)) Y✓ N____

4. Does the processor have a general permit? 62-710.800(1)) Y____ N____ N/A Specific Permit

5. For new facilities, was the notification of intent to use the general permit submitted 30 days prior to beginning operation? For existing facilities, was " the notification for renewal submitted 30 days prior to expiration of the general permit?(62-710.800(2)) Y____ N____ N/A

Oil Filter Processing Standards-- 62-710.850 F.A.C.

1. Does the facility process used oil filters by removing oil, draining, crushing or element separation? Describe in narrative. Generators who process their own filters are not regulated provided the filters are not disposed of in a landfill but are managed by a registered processor. Y✓ N____

   Is the facility a registered used oil filter processor? (62-710.850) Y✓ N____

2. Are the filters stored in above ground containers which are: (62-710.850(6))

   In good condition? Y✓ N____

   Closed or otherwise protected from weather? Y✓ N____

   Labeled "Used Oil Filters"? Y____ N✓ *

   Stored on an oil impervious surface? Y✓ N____

3. Are records maintained on DEP Form 62-710.900(2) or equivalent that include: (62-710.850(5)(a)) 8 tons/shipment

   Destination or end use of the processed filters? US Foundries Y____ N____

   Name and street address of each destination or end user? 4/14/98 Y____ N____
   8351 NW 93 St. Medley

   Are copies kept at the facility's street address for 3 years? (62-710.850(5)(b)) Y____ N____

4. Is an Annual Report submitted by March 1 for the previous calendar year summarizing the above records? (62-710.850(5)(c)) Y____ N____

Facility : Cliff Berry, Inc.
Date: _____

Oil Management Standards - 279.54

1. Is used oil stored only in tanks or containers? (Circle applicable units) Y ✓ N ____

2. If the facility has tanks, do they comply with 62-761 and 62.762 F. A. C. rules? Y ____ N ____
   (Applicable to USTs over 110 g and ASTs over 550 gallons. Describe in narrative, including number and size of tanks, noting registration numbers if applicable, and compliance status.)

   * need current placard

   Is secondary containment consisting of a floor and dike which are impervious to oil provided for ASTs ? Applies to all ASTs regardless of size per 279.54(d & e) Y ✓ N ____

3. Are containers and tanks in good condition and not leaking? (279.54(b)) Y ✓ N ____
   * see narrative

4. Are containers provided with secondary containment consisting of walls and floor at a minimum? (279.54(c)) Y ✓ N ____

   Is the containment system impervious to oil so as to prevent migration? Y ✓ N ____

5. Are ASTs, UST tank fill lines and containers labeled "used oil? (279.54(f)) Y ✓ N ____

6. Does the facility stop operations and clean up releases of used oil, repairing or replacing any leaking units as applicable? (279.54(g)) Y ✓ N ____

General Facility Standards - 279.52

1. Is the facility maintained and operated to prevent a fire, explosion or planned or unplanned release of used oil to the air, soil, or water which could threaten human health or the environment? (279.52(a)(1)) Y ✓ N ____

2. Does the facility have an internal communication or alarm system capable of giving immediate emergency instruction to facility personnel?(279.52(a)) Y ✓ N ____

3. Is there a telephone, alarm, 2-way radio or other device at the scene of operations immediately available and capable of summoning assistance from local fire departments? (279.52(a)(2)(ii)) Y ____ N ____
   PA System + phones

   Is there immediate access to this equipment by all personnel who are engaged in pouring, mixing, spreading or otherwise handled, either directly or by voice or visual contact with another employee? (279.52(a)(4)) Y ✓ N ____

4. Describe fire control equipment. Is it adequate? (279.52(a)(2)(iii)) Y ✓ N ____
   Fire Sprinklers + Alarm

5. Is spill control and decontamination equipment present? (279.52(a)(2)(iii)) Y ✓ N ____
   oil dry, pads, etc.

6. If sprinklers, water hoses or foam producing equipment is part of the facility fire control equipment, is water available at adequate volume and pressure? (279.52(a)(2)(iii)) Y ✓ N ____

7. Is the emergency equipment inspected and tested periodically? Y ____ N ____
   Frequency? _____

Facility : Cliff Berry
Date:

8. Is there adequate aisle space to allow unobstructed movement of facility personnel and emergency equipment to any area of the facility where needed? (279.52(a)(5i)) Y ✓ N____ * see narrative

9. Has the facility made emergency response arrangements with the following: (279.52(a)(6))

Fire Department:_____ Y ✓ N____
Police:_____ Y ✓ N____
Hospital:_____ Y ✓ N____
Emergency Response Contractor:_____ Y ✓ N____

10. If not, has the facility attempted to do so and is the refusal documented? Y____ N____ N/A

Contingency Plans and Emergency Response -- 279.52(b)

1. Does the facility have a contingency plan? Y ✓ N____

2. Is it at the facility and easily available? Y ✓ N____

3. Does the plan include:

Fire Response Procedure: (compare to 279.52(b)(6)) N/A____ Y ✓ N____
Spill Response Procedures: " N/A____ Y ✓ N____
Explosion Response Procedures: " N/A____ Y ✓ N____
Instructions for handling contaminated materials & residues Y ✓ N____
A description of arrangements with local authorities: N/A____ Y ✓ N____
Emergency Coordinators: (Name) Bill Parkes Y ✓ N____
Addresses and telephone numbers of Emergency Coordinators: Y ✓ N____
Emergency equipment list: Y ✓ N____
Specifications and capabilities of emergency equipment: Y ✓ N____
Locations of emergency equipment: Y ✓ N____
An evacuation plan and routes: Y ✓ N____
Evacuation/alarm signals: Y ✓ N____
External reporting procedures: Y ✓ N____
Internal recordkeeping requirements: Y ✓ N____

4. Is the plan up to date, with no changes to the list of emergency equipment, list of emergency coordinators, applicable regulations or contingency plan failures since the last revision? (279.52(b)(4)) Y ✓ N____ * minor changes needed

5. Has the plan been distributed to the local police, fire department, ERT and hospital? Circle omitted authorities. (279.52(b)(3)) Y ✓ N____

6. Is the emergency coordinator authorized to commit funds for incident response? Y ✓ N____

7. Has the processor noted in the operating record any incidents requiring implementation of the contingency plan? (279.52(b)(6)(ix)) Y____ N ✓

9. Were written reports made within 15 days to the DEP? (279.52(b)(6)(ix)) Y____ N____ N/A

Facility : _____

Date: _____

Rebuttable Presumption and Analysis Plan -- 279.53, 279.55

1. Does the processor have a written analysis plan to determine whether used oil stored at the facility has a total halogen content above or below 1,000 ppm and whether the facility's used oil fuel meets the used oil specification? (279.55)(a)) Y ✓ N ____

2. Is the 1,000 ppm halogen determination made by testing? Y ✓ N ____

   If so, does the analysis plan cover: (279.55(a)(2))

   Sampling methods? Y ____ N ____

   Frequency of sampling? Y ____ N ____

   Analytical Methods? Y ____ N ____

   Is the 1,000 ppm halogen determination made by process knowledge? Y ____ N ____

   If so, is the type of information that will be used to determine the halogen content stated in the analysis plan? (279.55(a)(3)) Y ____ N ____

3. Have any analyses showed exceedances of the 1,000 ppm level? Y ____ N ✓

   If so, was the oil managed as hazardous waste? Y ✓ N ____

   If not, was the oil exempt? Describe basis for presumption rebuttal in narrative. (ex. analysis, refrigerant oil, etc.) N/A ____ Y ____ N ✓

4. Is the used oil fuel specification determination made by testing?

   If so, does the analysis plan cover: (279.55(b)(2)) not kept here

   Sampling methods? Y ✓ N ____

   Whether the oil will be tested before or after processing? Y ✓ N ____

   Frequency of sampling? Y ✓ N ____

   Analytical Methods? Y ✓ N ____

   Is the used oil fuel specification determination made by process knowledge? Y ____ N ✓

   If so, is the type of information that will be used to determine the halogen content stated in the analysis plan? (279.55(b)(3)) Y ____ N ____

5. Are all oil processing residues managed as used oil, reclaimed, or used as asphalt manufacture feedstock? (279.59) N/A ____ Y ✓ N ____

   If not, has the processor conducted a hazardous waste determination? (279.10(e)) N/A ____ Y ____ N ____

6. Are test records or copies of records providing basis for determinations kept for 3 years? Y ✓ N ____

Facility : Cliff Berry
Date:

Recordkeeping and Reporting -- 279.57, 62-710.510-520 F.A.C.

1. Do used oil acceptance records include: (279.56(a))

Name & address of the generator or off site source of the used oil?	Y ✓	N
EPA ID # of oil provider (if applicable)?	Y ✓	N
Name & Address of the transporter delivering the oil to the facility?	Y ✓	N
EPA ID # of the transporter delivering the oil	Y ✓	N
Quantity of oil shipped?	Y ✓	N
Type of oil received (62-710.510(1)(c))	Y	N
Date of shipment?	Y ✓	N

2. Do used oil delivery records include: (279.56(b), also check marketer requirements)

Name & Address of receiving facility? (burner, processor or disposal site)	Y ✓	N
EPA ID # of receiving facility?	Y ✓	N
Name & Address of transporter delivering the oil?	Y ✓	N
EPA ID # of transporter?	Y ✓	N
Quantity of oil delivered?	Y ✓	N
End Use of the oil? (62-710.510(1)(e))	Y ✓	N
Date of delivery?	Y ✓	N

3. Does the facility keep records on DEP Form 62-710.900(2) or equivalent? (62-710.501(1)) Y ✓ N

4. Does the facility submit an annual report by March 1 summarizing the on site records for the previous calendar year? (62-710.520) Y ✓ N

   If not, is the facility an electric utility processing only self generated used oil for recycling, which is exempt from state registration and reporting requirements? (62-710.530)? Y N ✓

5. Does the transporter keep copies of the record and reports for three years at the street address of the facility? (62-710.510(2)) Y ✓ N

Closure -- 62-710.800(3) F.A.C. and 279.54(h)

1. Has the facility submitted a written closure plan? (62-710.800(3)(a)) Y ✓ N

2. Does the plan include procedures for removing containers of oil and residues? Part of Permit Req. Y N

   Cleaning and decontaminating tanks and ancillary equipment? Y N

   Removing contaminated soils? Y N

   Eliminating the need for further maintenance? Y N

If the facility operated tank systems, and not all contaminated soils can be practicably removed, the owner or operator must close the facility as a hazardous waste landfill.

USED OIL TRANSPORTER CHECKLIST

Facility Name: Cliff Berry, Inc. Date: 8-12-98

Facility Representative: _____ Facility ID #: _____

Inspector: Peluso, Bussey, Superville Registration #: _____

40 CFR 279 Subpart E -- Transporter Standards

1. Is the facility exempt under any of the following? (279.40(a)) Y____ N____

   On site transport?

   Generator transporting < 55 g /time to a collection center?

   Transporter of < 55 g /time from generator to aggregation point owned by same generator ?

2. If the transporter also transports hazardous waste in the same trucks as are used to transport used oil, are the vehicles emptied per 261.7 after HW shipments? (If not, the used oil must be managed as hazardous) Y____ N✓

3. Does the transporter process used oil incidental to transport? (279.41) Y____ N✓

   Are any residues managed as used oil, reclaimed, or used as asphalt manufacture feedstock? N/A✓ Y____ N____

   If not, has the transporter conducted a hazardous waste determination? (279.10(e)) N/A✓ Y____ N____

4. Has the facility notified of used oil activities? Check EPA form 8700-12 Y✓ N____

5. Does the transporter only deliver used oil to other transporters, oil processors, off specification used oil burners with EPA ID Numbers, or to on-specification oil burners? (279.43(a)) Y____ N✓

6. Does the transporter comply with DOT requirements? (279.43(b)) Y✓ N____

7. If any oil is discharged during transport, does the transporter: (279.43(c))

   Notify National Response Center and State Warning Point and Coast Guard per 33 CFR 153.203, as applicable? Y✓ N____

   Report to DOT in writing per 49 CFR 171.16? Y✓ N____

   Clean up any discharges until the discharge poses no threat? Y✓ N____

8. Does the facility also transport used oil filters? Y✓ N____

   If so, are the filters stored in above ground containers which are: (62-710.850(6))

   In good condition? Y✓ N____

   Closed or otherwise protected from weather? Y✓ N____

   Labeled "Used Oil Filters"? 29 drums were not labeled as "Used Oil Filters". Y____ N✓

   Stored on an oil impervious surface? Y✓ N____

DRAFT Rev. 9-28-95

Facility: Cliff Berry
Date: 8-12-98

Transporter Recordkeeping - 279.46

1. Do used oil acceptance records include: (279.46(a))

Name & Address of facility providing the oil for transport?	Y ✓	N
EPA ID # of oil provider (if applicable)?	Y ✓	N
Quantity of oil shipped?	Y ✓	N
Date of shipment?	Y ✓	N
Signature of oil provider, dated upon receipt?	Y ✓	N

2. Do used oil delivery records include: (279.46(b))

Name & Address of receiving facility or transporter?	Y ✓	N
EPA ID # of receiving facility or transporter?	Y ✓	N
Quantity of oil delivere?	Y ✓	N
Date of delivery?	Y ✓	N
Signature of oil receiver, dated upon receipt?	Y ✓	N

3. Do the above records also include state required information on the type of oil and destination or end use? (62-710.510(1)(c & e)) Y ✓ N

4. Does the facility keep records on DEP Form 62-710.900(2) or equivalent? (62-710.501(1)) Y ✓ N

5. Does the facility submit an annual report by March 1 summarizing the on site records for the previous calendar year? (62-710.520) Y ✓ N

   If not, is the facility an electric utility transporting only self generated used oil for recycling, which is exempt from state registration and reporting requirements? (62-710.530)? Y N

7. Does the transporter keep copies of the record and reports for three years at the street address of the facility? (62-710.510(2)) Y ✓ N

Transporter Certification (62-710 F.A.C.)

1. Is the transporter certified? (local governments, and < 55g/time transporters are exempt) (62-710.600) Y ✓ N

2. Does the facility maintain training records? (62-710.600(2)(c)) Y ✓ N

3. Does the facility maintain insurance or financial assurance of $100,000 combined single limit? (62-710.600(2)(d)) Y ✓ N

4. Is the facility registration form and ID number displayed? (62-710.500) Y ✓ N

Facility: Liff Berry
Date: 8-12-98

Transfer Facility Standards - 279.45

1 Does the transporter store used oil at any transportation related facility (including parking lots) for more than 24 hours and not longer than 35 days during the normal course of transport? Transfer facilities storing used oil more than 35 days must comply with 279 Subpart F N/A ✓ Y____ N____

Is the transfer facility registered per 62-710.500(1)(a) F. A. C.? Y____ N____

2. Does the transporter determine whether used oil stored at a transfer facility has a total halogen content above or below 1,000 ppm? Y ✓ N____

Is this done by testing? Switch / Onsite. Yes, once sets to limit laboratory tests all drop offs. Y ✓ N____

Is this done by process knowledge? Describe basis in narrative. Y____ N ✓

Are test records or copies of records providing basis for determination kept for 3 years? Y ✓ N____

3. Have any analyses showed exceedances of the 1,000 ppm level? Y ✓ N____

If so, was the oil managed as hazardous waste? Y____ N ✓

If not, was the oil exempt? Describe in narrative. N/A____ Y ✓ N____
Yes, salt water / segmented at facility

4. Is used oil stored only in tanks or containers? (Circle applicable units) Y ✓ N____

5. If the facility has tanks, do they comply with 62-761 and 62.762 F. A. C rules? (Describe in narrative, including number and size of tanks, noting registration numbers if applicable, and compliance status.) Y ✓ N____

Is secondary containment provided and adequate? Y ✓ N____

6. Are containers, and tank trailers in good condition and not leaking? Y ✓ N____

7. Are containers provided with secondary containment consisting of walls and floor at a minimum? Y ✓ N____

Is the containment system impervious to oil so as to prevent migration? Y ✓ N____

8. Are ASTs, UST tank fill lines and containers labeled "used oil? Y____ N____

9. Are used oil filters stored more than 10 days?

If so, is the facility a registered used oil filter transfer facility? (62-710.850) N/A____ Y ✓ N____

10. Does the facility stop operations and clean up releases of used oil, repairing or replacing any leaking units as applicable? Y ✓ N____

USED OIL GENERATOR CHECKLIST

Facility Name: Cliff Berry Inc. Date: 8-12-98

Facility Representative: Amy Myers, Larry Doyle Facility ID #:

SIC Codes: Inspector: Peluso, Bussey, Superville

40 CFR 279 Subpart C -- Generator Standards

1. Describe the facility's used oil streams: "Processor" & Marketer

WASTE DESCRIPTION	ON/Off Specification	Testing or Process Knowledge	Generation Rate	Disposal Facility and EPA ID	Generator
** Sludge containing petroleum oil, soil & water		Testing	1200 gal.	CBI FLD 058560699	International Air Leases
* ~~Anthracite Clay~~ Oily Water		Testing	100 gal	CBI FLD 058560699	Derm
** Used oil Filters		Testing	500 lbs	same	Dollar Rent A CAR
* Used oil is generated from the oil filter crushing operation.					

2. Does the generator mix hazardous waste with the used oil?(279.10) Y____ N✓

3. If so, is the facility a CESQG? Y____ N✓

4. If not, Is the oil mixed with a characteristic hazardous waste? Y____ N✓
(describe waste)

   If so, does the facility document that the resultant mixture does not exhibit any characteristic of hazardous waste? Y____ N____

   Or, if the hazardous waste is only D001, that the resultant mixture is not ignitable? Y____ N____

   If the facility is not a CESQG, and oil is mixed with a listed hazardous waste, it must be managed as a hazardous waste.

5. Does the facility generate other materials contaminated with used oil? Y____ N✓

   If so, are the materials burned for energy recovery as used oil? Y____ N____

   or, Does the facility have records documenting the residuals are not hazardous waste? Y____ N____

6. Does the generator claim that the used oil meets the specification in 279.11? Y✓ N____

If so, and the oil is to be burned for energy recovery, the generator is a marketer subject to 40 CFR 279 Subpart H

Facility: Cliff Berry, Inc
Date: 8-12-98

Subpart C

1. Does the facility store used oil only in tanks, containers or permitted hazardous waste storage units? Y ✓ N ____

   Are containers/tanks in good condition? (279.22(b)(1)) Most are Y ____ N ✓ * 2 drums were bulging

   Are containers/tanks leaking? (279.22(b)(2)) Y ____ N ✓

   Are containers/tanks storing used oil marked with the words "Used Oil", Including fill pipes used to fill underground tanks? (279.22(c)) Y ✓ N ____

2. Are used oil filters stored in above ground containers which are: (62-710.850(6))

   In good condition? Y ✓ N ____

   Closed or otherwise protected from weather? Y ✓ N ____ * Some drums were not labeled.

   Labeled "Used Oil Filters"? Y ____ N ✓

   Stored on an oil impervious surface? Y ✓ N ____

3. Have any releases to the environment occurred, other than a leak from a UST? Y ____ N ✓

   If so, did the facility stop the release, contain the oil, clean up the release and manage the contaminated material properly and repair or replace the leaking units prior to returning them to service? (279.22(d)) Y ____ N ____

4. Does the generator burn on site in a space heater? (279.23) Y ____ N ✓

   If so, does he burn only DIY oil or oil generated on site? Y ____ N ____

   Does the heater have a capacity of no more than 0.5 million BTU/hr? Y ____ N ____

   Are combustion gasses vented to the atmosphere? Y ____ N ____

5. Does the generator only use transporters who have received EPA Identification numbers? Perma-Fix (incoming) # FLD980808773 AMC FLD 000000Kde M&M – (incoming) # 000124 Non received this year

   Name and number 95% Cliff Berry (out) EPA id # 000831156

6. If not, does the generator self-transport only used oil generated on site or DIY oil to used oil collection centers or aggregation point owned by the generator? Y N/A N ____

   Name and location of center: ____

   Location of generator aggregation point ____

   If so, is this only in vehicles owned by the facility or facility employees? Y ____ N ____

   Is no more than 55 gallons transported at one time? Y ____ N ____

7. Alternatively, does the generator have a tolling arrangement with a used oil reclaimer? Y ____ N ✓

   Is a copy of the contract kept on site specifying

   type and frequency of shipments? Y ____ N ____

   that the transport vehicle is owned by the processor? Y ____ N ____

   that the reclaimed oil will be returned to the generator? Y ____ N ____

Is your RETURN ADDRESS completed on the reverse side?

SENDER:

- Complete items 1 and/or 2 for additional services.
- Complete items 3, 4a, and 4b.
- Print your name and address on the reverse of this form so that we can return this card to you.
- Attach this form to the front of the mailpiece, or on the back if space does not permit.
- Write *"Return Receipt Requested"* on the mailpiece below the article number.
- The Return Receipt will show to whom the article was delivered and the date delivered.

I also wish to receive the following services (for an extra fee):

1. ☐ Addressee's Address
