Department of Environmental Protection
BY SOUTHWEST DISTRICT

Attn: Mr. Jim Dregne:

Ref: Recent FWES RCRA Inspection
EPA ID# FLR 000 013 888

Dear Mr. Dregne:

Florida Waste Environmental Services (FWES) has issued the attached letters to customers requesting additional information (i.e. analytical data) documenting generator determination for waste stream characterization. FWES is also reorganizing file system to collect missing data. Disposal Facility Waste Profiles were completed for each individual waste stream with analytical or MSDS's but were submitted to the disposal facility by the truck driver. Only the manifests were returned, creating a data gap in FWES files with only FWES Profile sheet. This mode of operation will be immediately corrected and missing data obtained. A *Used Oil Processing Permit* was submitted to FDEP office on January 13, 1997 with procedures of operation, waste analyses plans, tracking plans and other controls to improve operations at FWES.

In addition FWES has halted solid waste bulking operations until the meeting with the Solid Waste Section indicates the proper course of action. FWES is still operating under the conditions of a Used Oil Transfer Facility, which is the core business.

Other management and ownership changes are underway to improve FWES operations especially in the record-keeping area. FWES is at cross roads to revamp operations and construct a new facility or get out of the business.

Please contact me if you require additional information at (813) -246-4711. I have been contracted by FWES to be the acting Environmental Affairs Director to improve operations and expedite permitting issues.

Sincerely,

Thomas A. Brislin
Environmental Engineer

RE: Waste Acceptance Requirements
Chambers Okeechobee Landfill

Dear Mr. Brislin:

As per your request during our conversation earlier today, this letter is intended to clarify the requirements which mus be met in order to obtain approval for the disposal of wastes generated by your facility at the Chambers Okeechobee Landfill.

All Special Waste accepted at the Okeechobee Landfill must receive prior approval in accordance with the site's Special Waste Quality Assurance Plan which is incorporated into the site's Operating Permit. This plan requires that each individual waste stream be profiled, reviewed and approved prior to disposal. The Okeechobee Landfill receives waste from a number of waste consolidation facilities such as Florida Waste Environmental. Many of these facilities bulk numerous waste streams together into one profiled waste stream for landfill disposal.

The Okeechobee Landfill accepts bulked waste for disposal if all conditions of the site's Special waste Quality Assurance Plan have been met. This includes receiving a comprehensive description of the processes of generating the various wastes within the waste stream as well as certification and documentation that none of the wastes making up the bulk waste stream were individually a characteristic hazardous waste. The above described steps are taken to ensure that no dilution of a characteristically hazardous waste occurs as a result of the bulking.

In no instance will the Okeechobee Landfill grant a blanket approval to any waste bulking facility for disposal of their waste at the landfill. As stated above, the landfill's permit requires that each individual waste stream be reviewed and approved. For this reason bulked waste streams are approved on a batch basis with the batch size defined by the generating facility's operating restrictions.

In addition to Special Wastes the Okeechobee Landfill accepts asbestos containing wastes for disposal. The delivery of asbestos containing wastes must comply with all the requirements of the National Emissions Standards for Hazardous Air Pollutants (NESHAP) regulations. These materials can be delivered in the same load as other wastes as long as the asbestos containing waste can be managed in accordance with the NESHAP regulations. If mixing of the asbestos containing wastes with other wastes in the same load would preclude compliance with the

NESHAP regulations the asbestos containing waste must be delivered separately from other wastes.

I hope this letter clarifies the Okeechobee Landfills waste acceptance criteria as they apply to your operations. If you have any further questions or require additional information, please contact me at (404) 799-2950.

Sincerely,

Michael S. Dae

STATE OF FLORIDA
DEPARTMENT OF HEALTH AND REHABILITATIVE SERVICES

RECEIVED
SEP 22 1995
ENVIRONMENTAL HEALTH

INTEROFFICE MEMORANDUM

DATE: September 20, 1995

TO: Jordan Lewis, R.S., M.P.H.
Environmental Administrator
HRS Hillsborough County Public Health Unit

FROM: Dale Holcomb, M.P.H.
Environmental Specialist III
Onsite Sewage Program Tel. 272-6200

SUBJECT: Pumping and Disposal of Grease

This office has no objection to mixing grease interceptor pumpings with saw dust and disposing of it at a sanitary landfill. The Department of Environmental Protection which regulates the landfill will need to approve of the proposed activity. The mixing activity, if done off the landfill site would be subject to regulation by this department or by DEP depending on the quantity of grease "treated" and the type of sewage treatment and disposal system from which the grease was removed.

I have never seen this done in practice and would like the opportunity to see the results should this come to pass.

Considering waste haulers decanting the liquid back into the grease interceptor after the extraction of the grease component, there is no objection to this activity in concept. Some considerations to address before you decide to allow a particular process would be:

- Is the returned liquid sufficiently "grease-free" to consider the interceptor adequately and effectively "cleaned"?
- Is the returned liquid free of process additives which might affect system operation or pollute groundwater?
- Is the grease remaining in the returned liquid in such a form that it may pass into the treatment and disposal system?
- Is the separated grease free of process additives which could render it hazardous, toxic, or otherwise unsuitable for further treatment and disposal by ordinary means?

- Is the entire process reasonably nuisance free and sanitary?

Again, there is no objection to the concept of separating the liquid from the grease and returning the liquid to the interceptor. Of course, this opinion only affects grease from interceptors serving onsite sewage treatment and disposal systems. Grease from DEP-regulated systems should be handled in accordance with that agency's requirements.

Thank you for bringing these two innovative approaches to my attention. Please call me at suncom 278-4070 if you have any further questions.

septage shall be transported to an approved treatment facility in such a manner as to preclude leakage, spillage or the creation of a sanitary nuisance.

(6) Treated septage and sludges shall be transported to the disposal site in such a manner so as to preclude leakage, spillage or the creation of a sanitary nuisance.

(7) The food establishment sludge and contents from onsite waste disposal systems shall be disposed of at a site approved by the HRS county public health unit and by an approved disposal method. Untreated domestic septage or food establishment sludges shall not be applied to the land. Portable toilet wastes and the contents from holding tanks are not considered to be septage. Disposal of these liquid wastes shall be in compliance with provisions found in 10D-6.051(3)(e) and 10D-6.051(5)(e) and 10D-6.052(7). Criteria for approved stabilization methods and the subsequent land application of domestic septage or other domestic onsite wastewater sludges shall be in accordance with the following criteria for land application and disposal of domestic septage.

(a) Discharge of domestic septage into permitted domestic wastewater treatment facilities shall be subject to the requirements of Chapter 17-600, F.A.C.

(b) Land application of domestic septage and sludges shall be permitted provided such septage and sludges have been properly treated by an approved septage-stabilization process, including lime stabilization, and an application using HRS-H Form 4012 has been completed as part of the permitting process. Prior to discharge of septage or food establishment sludge into a stabilization tank, the septage or sludge shall be screened in a pretreatment tank or chamber which contains a final screening method using bar screens having a maximum gap of 1/2 inch or rock screens or other similar mesh material having a maximum 3/4 inch opening. Material retained in the screening process shall be limed, containerized, and disposed of at an approved solid waste disposal facility. Septage or sludge shall pass from the pretreatment tank or chamber to the stabilization tank. Lime stabilization of septage shall be in accordance with processes and designs described in Chapter 6, EPA 625/1-79-011, Process Design Manual for Sludge Treatment and Disposal, hereby incorporated by reference. Facilities approved for septage treatment under this rule shall not receive and treat more than 20,000 gallons of septage or combined septage, grease interceptor, portable toilet or other receptacle waste associated with an onsite sewage treatment and disposal system on any one day and shall not exceed a monthly average of 10,000 gallons of septage or septage and combined domestic waste per day. Stabilization by lime shall raise the pH of the septage to a level of 12 for a minimum of two hours or to a level of at least 12.5 for a minimum of 30 minutes to be deemed sufficient. The pH of the stabilized septage shall be maintained at a level of at least 11 until actual land application, but shall not be landspread until the pH of the stabilized septage has fallen below 12.5. To check the pH of the stabilized septage, a sampling port having an internal diameter of no less than 1/2 inch and no more than 3/4 inch and located no more than 60 inches above the ground surface shall be used to allow sampling of waste tank contents. Lime purchase receipts shall be kept at the place of business for a minimum of 6 months.

1. Use on playgrounds, parks, golf courses, lawns, hospital grounds, or other unrestricted public access areas where frequent human contact is likely to occur is prohibited.

2. Application is limited to sod farms, pasture lands, forests, highway shoulders and medians, plant nursery use, land reclamation projects and soils used for growing human food chain crops. Application methods shall be conducted in a manner which will disperse the treated septage uniformly over the land application site.

a. Pasture vegetation on which stabilized septage or sludge has been applied shall not be cut for hay or silage nor grazed for a period of 30 days from the last application.

b. No human food chain crops except hay, silage, or orchard crops shall be harvested from a land application area for a period of 60 days following the last application of septage or sludges.

c. Domestic septage or sludge shall not be used for the growing or cultivation of tobacco, root crops, leafy vegetables, or vegetables to be eaten raw. Vegetables and fruits which come in contact with the ground surface shall not be grown on land used for septage application for a period of 18 months after the last application of septage or sludge.

d. When applied to unvegetated soils, stabilized domestic septage or sludge shall be incorporated into the soil within 48 hours of application.

(c) No land application of stabilized septage or food service sludge may occur until:

1. The site has been inspected and approved by department personnel.

2. The site evaluation fee has been submitted.

3. An agricultural use plan has been completed for the proposed application site.

Waste Hauler Discharge Permit

Cover Page

Permit No. 2014

In accordance with the provisions of Section 26-122 of the City of Tampa Code:

Company Name Florida Waste Environmental Services, Inc.

Address 5218 St. Paul Street

Telephone Number 246-4711

Name of Applicant Sharon Summers

Is hereby authorized to discharge hauled wastewater at the City of Tampa wastewater treatment plant located at 2700 Maritime Blvd., Tampa, FL 33605 in accordance with the conditions set forth in this permit. Compliance with this permit does not relieve the permittee of its obligation to comply with any or all applicable pretreatment regulations, standards or requirements under local, State, and Federal laws, including any such regulations, standards, requirements, or laws that may become effective during the term of this permit.

Noncompliance with any term or condition of this permit shall constitute a violation of the City of Tampa sewer use ordinance.

This permit shall become effective on April 1, 1996
and shall expire at midnight on March 31, 1998

If the permittee wishes to continue to discharge after the expiration date of this permit, an application must be filed for a renewal permit a minimum of 90 days prior to the expiration date.

Director Date 4/1/96

Dear Customer:

Florida Waste Environmental Service currently disposes of your waste stream. A waste profile is on file at our office, with the appropriate manifests.

In accordance with the Florida Department of Environmental Protection, a determination of waste characterization for this material is required at least annually, and must be kept in both our and your files.

The generator, which is you, is required to document that the waste is non-hazardous. This requires either Material Safety Data Sheet (MSDS), sampling/analytical or process knowledge.

Please provide us with your most recent analytical data, MSDS, or processor knowledge for this waste stream. We will appreciate your prompt response, within seven working days.

Florida Waste Environmental Service intends to maintain compliance with all State and Federal laws.

If you have any questions, please contact our environmental manager.

Attn: Mr. Tom Brislin, Environmental Engineer

RE: Generating Waste Determination of Premium Sunbright Aluminum Roof Coating.
(Product Code 6290 GA)

Gardner Asphalt Corporation has manufactured Premium Sunbright Aluminum Roof Coating for past ten (10) years. Based on process knowledge indicates that Premium Sunbright ARC major components are Emulsified Asphalt, Aluminum Flake Paste, Water, Inorganic Filler and Cellulose Fiber. Aluminum Flake Paste establishes Premium Sunbright ARC to be Gray to Silver appearance.

The Coalescing process in Premium Sunbright ARC causes the Aluminum Flakes to float to the surface (a.k.a. Leafing phenomenon) which enhance the bright silver coating when dried.

If I can be of further assistance, please call me or Jim Hunter at (813)248-2101.

Sincerely,
Gardner Asphalt Corporation

Michael L. Yap
Technical Director

PRODUCT DATA SHEET

ALUMINUMS

gardner ASPHALT CORPORATION

ASBESTOS FREE PRODUCT

PREMIUM SUNBRIGHT ALUMINUM ROOF COATING

DESCRIPTION: ***Gardner Sunbrite Aluminum Roof Coating*** is a technologically advanced, high quality reflective coating that provides a tough layer of protection over the roofs surface. Sunbrite's brilliant aluminum finish reflects the sun's rays to help lower interior temperatures and preserve the roofs surface. This premium coating can be applied over virtually any type of roof surface including built-up, asphalt shingles, asphalt, tar, metal roofs and more. Built-in rust inhibitors protect from corrosion. This product is easy to mix and apply.

PREPARATION: All surfaces must have proper drainage, be clean, dry, and free of surface rust and any loose material before coating. Repair cracks and leaks with ***Gardner Wet/Dry Roof Cement*** prior to coating. MIXING MAY BE REQUIRED TO ENSURE PRODUCT UNIFORMITY. DO NOT HEAT OR THIN DO NOT APPLY IF RAIN IS EXPECTED WITHIN 24 HOURS.

FOR BEST RESULTS: Apply when surface temperatures are between 50°F and 100°F. Best applied on a warm, clear and sunny day with low humidity. NOTE: All surfaces to be coated must have proper drainage. Ponding water and poor drainage may discolor coating and/or cause adhesion failure.

APPLICATION: Sunbrite can be rolled, brushed, or sprayed over Smooth and Mineral Surfaced Rolled Roofing, Emulsion Roofs, Metal and Corrugated Metal Roofs, Parapet Walls, Flashings, Storage Tanks, Exposed Piping and Duct Work, Stucco Walls and Modified Bitumen Single Ply Roofs. Due to irregular and different types of surfaces, coverage rates may vary. Apply in 2 coats with the second coat applied perpendicular to the first. Allow a minimum of 4 hours drying before second coat is applied. **COVERAGE RATES:** Rolled Roofing 1-1 1/2 gal. per 100 sq. ft. Smooth Surface Emulsion 1-2 gal. per 100 sq. ft. Metal Surfaces 1 1/2 - 2 gal per 100 sq. ft. SBS 1 Ply System 1 1/2 - 2 gal per 100 sq. ft.

NOTE: This is a water based product. DO NOT APPLY IF RAIN OR HEAVY DEW IS IMMINENT (AT LEAST 24 HOURS). KEEP FROM FREEZING. DO NOT STORE AT TEMPERATURES BELOW 50°F. Store in cool place. Sealed product should not be stored in areas where temperature will exceed 90°F.

CLEAN-UP: When wet with soap and water. If dried, clean tools with kerosene or mineral spirit.

REGULATORY/ENVIRONMENTAL CHARACTERISTICS:

Volatile Organic Compound	5 g/l max. (0.4lbs./gal)
HMIS Rating	H-1, F0, R-1 , PP-X
RCRA Hazardous Substances	None
SARA Title III listing:	
Sec. 302 Extremely Hazardous Substances	no
CERCLA Hazardous Substances	no
Sec. 313 Toxic Chemicals	no

COMPLIANCE: California products meet Los Angeles County A.P.C.D. RULE 66 (Rule #102).

WATER	
ASPHALT	C.A.S.# 8052-42-4
CELLULOSE FIBER	C.A.S.#65996-61-4
STODDARD SOLVENT	C.A.S.# 8052-41-3

ALUMINUM FLAKE	C.A.S.# 7429-90-5

WARRANTY AND DISCLAIMER:
For limited warranty and disclaimer information, contact the Gardner corporate office at 1-800-237-1155.

TYPICAL PHYSICAL CHARACTERISTICS:

Weight Per Gallon, lbs.	8.9-9.1
Residue by Evaporation, %	29 Min.
Combustible Solvents	N/A
Consistency	Brush, Spray, Roller
Cure Time (at recommended coverages)	4-8 hrs. to set, 24-48 hrs. to full cure depending on weather.
Application Temperatures	50°F - 120°F
Flammability (Flash point, °F solvent)	N/A
Clean up Tools	Soap and water when wet Mineral Spirits when cured

Approx. Shipping Weights: (Note all approximate weights include containers)	
1 gallon (3.8L)	9.5 lbs
(6) 1 gallon container/case	58 lbs
5 gallons (18.9 L)	48 lbs.
55 drum (208.2L)	535 lbs

DANGER:
HARMFUL OR FATAL IF SWALLOWED
Keep Out of Reach of Children
VOC/VOS - 5 G/L MAX. (0.4 LBS./GAL.)

PRECAUTIONS: protective clothing and eye wear should be used during application of these products. When transporting this product, ensure that lid is tight and pail secure and upright. Do not allow pail to tumble as this may cause lid to loosen and leakage to occur. Do not store at temperatures below 60°F or above 100 °F. This manufacturer also disclaims liability for flat surface application where poor drainage or moisture may prevail. Do not reuse empty containers.
In Case Of:
EYE CONTACT: Flush with water seek medical attention immediately.
SKIN CONTACT: Wash thoroughly with soap and water.
INGESTED: DO NOT INDUCE VOMITING, seek medical attention immediately. Irregular or stopped breathing - administer oxygen, give artificial respiration. Avoid prolonged breathing of vapor or spray mist. (NIOSH/MSHA TC 23C OR equivalent).

CALIF. PROP. 65 • CHEMICAL WARNING
(CALIFORNIA HEALTH AND SAFETY CODE #25249.5 ET SEQ) Detectable amounts of some chemicals known to the State of California to cause cancer, birth defects or other reproductive harm may be found in various Gardner Asphalt Corporation (Gardner) petroleum based products and their vapors. Read and follow label directions and information given on Material Safety Data Sheets and use care when handling or using all petroleum products.

MATERIAL SAFETY DATA SHEET

Gardner Asphalt Corporation P.O. Box 5449 Tampa, FL 33675

A. IDENTIFICATION AND EMERGENCY INFORMATION

Product Name: Premium Sunbrite Aluminum Coating

Product Code: 6290

Chemical Name: N/A

CAS Number: N/A A Complex Mixture

Product Appearance and Odor: A moderately thick, silver colored mastic liquid with a petroleum like odor.

Emergency Telephone Number: CHEMTREC 1-800-424-9300

B. COMPONENTS AND HAZARD INFORMATION

Components	CAS No.	ACGIH TLV	Approximate Concentration
Petroleum Asphalt	8052-42-4	5.0mg/m(3) (fume)	Less than 20%
Inorganic Filler	1332-58-7	10mg/m(3)*	Less than 10%
Cellulose Fiber	9004-34-6	10mg/m(3)*	Less than 5%
Aluminum Paste	Mixture	100 ppm	Less than 15%
Water	7732-18-5	Not Hazardous	Greater than 55%

* As respirable fraction of dust.

Hazardous Materials Identification System: (HMIS)

Health	Flammability	Reactivity	Basis
1	1	1	Recommended By Gardner Asphalt

C. PRIMARY ROUTES OF ENTRY AND EMERGENCY & FIRST AID PROCEDURE

Eye Contact: If eye contact should occur it may cause severe irritation, redness, tearing and blurred vision. Flush with large amounts of water for at least 15 minutes. Get medical attention.

Skin If skin contact should occur, remove contaminated clothing/shoes, wipe excess from skin. Wash affected areas with mild soap and water. If irritation develops and persists, seek medical attention. Do not reuse clothing/shoes until thoroughly laundered.

Inhalation Remove from exposure. If breathing is difficult, administer oxygen. If breathing has stopped, administer artificial respiration. Keep person warm and quiet. Seek medical attention immediately.

Ingestion: Do Not Ingest. Should ingestion occur, DO NOT INDUCE VOMITING - transport to hospital immediately. Get medical attention.

212 Flash Point (Minimum):
~~105~~ degrees F. via TCC (Petroleum Solvent)

Autoignition Temperature (Dry Film):
Not Established

National Fire Protection Association (NFPA) - Hazard Identification

Health	Flammability	Reactivity	Basis
0	1	0	Recommended By Gardner Asphalt

Handling Precaution Keep all containers tightly closed and in a properly ventilated area, away from sources of heat, flame or strong oxidizers.

MFR.

February 12, 1998

per phone conversation with Michael Yap, Technical Director. Flash of 105° F is a mistake. Flash is 212. 105°F is Flash of paste. MSDS will be corrected.

Flammable or Explosive Limits: (Approximate percent by volume in air)

Lower (LEL) Not Applicable

Upper (UEL) Not Applicable

Extinguishing Media and Fire Fighting Procedures:

Firemen should wear self-contained breathing apparatus to protect against inhalation of combustion products. Water fog may be used to keep fire exposed containers cool. If containers are exposed to excessive heat, there is a possibility of pressure build-up which may result in a rupture of the container. Use dry chemical or water fog as extinguishing media. Do NOT use Halogenated extinguishing agents.

Decomposition Products under Fire Conditions:

Pyrolysis products of aromatic hydrocarbons. Aluminum fire may react with water, producing hydrogen. Hydrogen gas is flammable and explosive. For further information, see NFPA-651, Standard for the Manufacture of Aluminum and Magnesium Powder. Hazardous decomposition products include: carbon

Empty Container Warning:

Dispose of in an environmentally safe manner and in accordance with governmental regulations. "Empty" containers retain residue (liquid and/or vapor) and can be dangerous. DO NOT PRESSURIZE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, OR OTHER SOURCES OF IGNITION, THEY MAY EXPLODE AND CAUSE INJURY OR DEATH. Do not attempt to clean since residue is difficult to remove. For work on tanks, refer to OSHA regulation ANSI Z49.1 and other governmental and industrial references pertaining to cleaning, repairing, welding or other contemplated operations.

E. HEALTH AND HAZARD INFORMATION

Variability Amoung Individuals:

Health studies have shown that individual sensitivities vary from person to person. As a precaution, exposure to vapors, liquids, mists, or fumes should be minimized.

Effects of Overexposure:

(Signs and symptoms of exposure) Breathing asphalt aerosol or asphalt smoke for protracted periods of time has produced damage to the lungs of mice. Among the changes observed were: bronchitis, pneumonitis and abscess formation.

Nature of Hazard and Toxicity Information:

In 1994, the International Agency for Research on Cancer (IARC) reconfirmed its earlier assessment that studies of workers exposed to asphalt provide inadequate evidence of carcinogenicity. IARC has previously classified asphalt as a Group 3 substance, not classifiable as to its carcinogenicity to humans.

Pre-exsisting Medical Conditions Which May be Aggravated by Exposure:

Persons with history of disease in the liver, skin, eye, respiratory system, blood forming organs or with bleeding abnormalities or exposure to material harmful to these systems are at greater risk than normal risk of developing adverse health effects when working with this product.

F. PHYSICAL DATA

The following are approximate or typical values and should not be used for precise design purposes

Boiling Range :
Greater than 212 degrees F.

Vapor Pressure :
Less than 1mm/Hg @ 25 deg.. C

Specific Gravity :
Approx. 1.0-1.3

Vapor Density :
Heavier than air

Molecular Weight :
N/A A Complex Mixture.

Percent Volatile by Volume:
greater than 50%

pH :
Approx. 6.0-7.0

Evaporation Rate @ 1 ATM & 25 deg C (77 deg F)
Slower than ether

Pour Congealing or Melting Point
Pours above 40 deg.. F. (DO NOT FREEZE)

Solubility in Water @ 77 deg. F.
Partially Miscible

Viscosity:
Approximately 5000-10,000 cps @ 77 deg. F.

G. REACTIVITY

This product is stable under normal conditions. Hazardous polymerization will not occur. Avoid heat, smoking, open flame, strong oxidizers, other sources of ignition, some acids, halogenated hydrocarbons and oxidizers. Avoid contact with, may cause hydrogen gas to be released.

H REGULATORY / ENVIRONMENTAL INFORMATION

Steps to be taken in case material is released or spilled:

Large Spills: Evacuate all unnecessary personnel from affected area. Do not re-enter affected area without proper protective equipment (Section I). Ventilate area of spill. Remove all sources of ignition and allow any hot surfaces in area to cool. Collect in most safe manner for disposal or reclamation in sealed containers. Use non sparking metal tools and natural bristle broom.

SARA Title III Section 313 - Toxic Chemicals

This product does not contain toxic chemicals of Section 313 of Title III of Superfund Amendments and Reauthorization Act of (SARA) and 40 CFR Part 372.

SARA Title III Section 311 - Hazard Catregories

Not Established

SARA Title III Section 302(a) - Extremely Hazardous Substances

This product does not contain Extremely Hazardous Substances of Section 302(a).

CERCLA - Comprehensive Environmental Response, Compensation, and Liability Act Section 102 Hazardous Substances, 42 U.S.C. 9602

Petroleum and petroleum fractions are excluded from the list of CERCLA hazardous substances by Section 101(14) of CERCLA.

EPA Hazard Classification Code:

Acute	Chronic	Fire	Pressure	Reactive	Not Applicable
					XXX

I. PROTECTION AND PRECAUTION

Ventilation:

Ventilation should be adequate. Maintain vapor and/or particulate levels below the applicable exposure limits for asphalt fumes.

Respiratory Protection:

Use NIOSH/MSHA approved respirator when TLV is exceeded.

Protective Gloves:

Use protective chemical resistant gloves such as neoprene or nitrile-butadiene rubber gloves.

Eye Protection:

Safety glasses or splash goggles should be used. CONTACT LENSES SHOULD NOT BE WORN WHEN WORKING WITH THIS MATERIAL.

Other Protective Equipment:

Employees who have prolonged or repeated exposure should wear gloves and clothing that is impervious to asphalt.

Work Practices:

Keep containers closed when not in use. DO NOT STORE NEAR HEAT, SPARKS, FLAME OR STRONG OXIDANTS.

Personal Hygiene:

Employees who handle this material should cleanse hands thoroughly before eating and smoking. Minimize breathing vapors or mist. Remove contaminated clothing, launder or dry clean before reuse. Remove contaminated shoes and thoroughly clean and dry before use.

J. TRANSPORTATION INFORMATION

Transportation Incident Info:

For further information relative to spills resulting from transportation incidents, refer to latest Department of Transportation Guidebook for Hazardous Materials Incidents, DOT P 5800.3.

DOT Identification Number:

Not Established

The information and recommendations contained herein are to the best of Gardner Asphalt's knowledge and belief, accurate and reliable as of the date issued. Gardner Asphalt does not warrant or guarantee their accuracy or reliability, and Gardner Asphalt shall not be liable for any loss or damage arising out of the use thereof.

This information and recommendations are offered for the users consideration and examination, and it is the user's responsibility to satisfy itself that they are suitable and complete for its particular use.

The environmental information included in Section H hereof as well as the Hazardous Materials Identification System (HMIS) and National Fire Protection Association (NFPA) ratings have been included by Gardner Asphalt Corporation in order to provide additional health and hazard classification information. The ratings are based upon the criteria supplied by the developers of these ratings systems, together with Gardner Asphalt's interpretation of the available data.

Lovett Enterprises

Special For Pinellas County Drum Purchasers

Does your company purchase drums for Industrial and Hazardous waste? If so please allow me to introduce a valuable alternative to lower your company's costs. Lovett Enterprises, based in Largo Florida now offers local companies fast professional service in the supply of certified reconditioned poly and metal 55 gallon drums. All drums are guaranteed and of the highest quality.

Pricing Examples

Quantity Ordered	Price (55 gallon drums)
1 - 5	$ 25.00 per drum
6 - 10	$ 22.00 per drum
11 - 20	$ 18.00 per drum
21 or Greater	Call for Special Pricing

* **Free delivery to Local area business.**
* **Next day delivery available.**
* **Various sizes of drums available.**

We also offer legal, safe cost effective alternatives for disposal of hazardous and industrial waste materials. Please do not hesitate to contact me for any additional information. Thank you for considering Lovett Enterprises for your drum purchases.

Sincerely,

Lucky Lovett
President

Instructions for Completing the Used Oil and Used Oil Filter Record Keeping Form

DEP Form #62-710.900(2)
Form Title Used Oil and Used Oil Fi Record Keeping Form
Effective Date June 8, 1995

Use this form to comply with the Used Oil Management Rule, Chapter 62-710.510, F.A.C.

COLUMN A. USED OIL/FILTER SOURCE

Print the information requested of each site where used oil, oily waste, and used oil filters (optional) are collected or te name and registration number of the transporter from whom such material is received. List only one source per line. If you are sending such materials off-site, then print the name of your business in this space.

COLUMN B. DATE

Fill in the date used oil (filters are optional) is collected from the source or shipped to a destination.

COLUMN C. (OPTIONAL) NUMBER OF FILTERS

Determine the number of filters handled by either direct count, or by using the following conversion table:

One 55-gallon drum of **crushed** filters = approximately **400** used oil filters
One 55 gallon drum of **uncrsushed** filters = approximately **250** used oil filters

COLUMN D. GALLONS OF USED OIL

Enter the total number of gallons recieved from each used oil source or shipped to a destination in Column C.

COLUMN E. USED OIL TYPE CODE

Determin the type of used oi for each used oil source by refering to the type code list at the bottom of this page. enter the used oil type code letter for each source in column A. If the used oil from a single source is of more than one type, use a separate line for each type, if it has not been mixed prior to collection.

COLUMN F. USED OIL END USE CODE

Determint the end use of each used oil quantity recorded by refering to the end use code list at the bottom of this page.

COLUMN G. DESTINATION OF THE USED OIL/FILTERS

Print the required information from each site where used oil and/or used oil filters are delivered. If the used oil, oily wastes or filters are stored, processed or end-used at your facility, then print your company name here.

BOX H (at bottom of page). TOTAL GALLONS RECEIVED OR SHIPPED

For each page, addd the figures in column C and D. Indicate the total for the page in these boxes.

TYPE CODE

A - Automotive: Includes spent engine oil from cars, trucks, trains, boats, planes, farm equipment and other off-road automotive engines as well as such related automotive lubricants as transmission fluids, brake fluids and gear lubricants.

I - Industrial: Includes spent oils from industrial operations such as compressor turbine and bearing oils, hydraulic oils, metalworking oils, gear oils, electrical oils, refrigeration oils, tank bottoms, and also includes industrial proces oils, and oil from ships.

M - Mixed: means a mixture of automotive and industrial oils. This term should be used only when it is impossible to determine the type of oil when the source is considered.

END USE CODE

N - Not an end use. Shipment transferred to another facility.

O - Marketed as an on-specification used oil fuel.

F - Marketed as an off-specificaton used oil fuel.

B - Burned as an off-specification used oil fuel.

I - Marketed for an industrial process (includes processing into asphalt, use in phosphate beneficiation, processing lube base stocks by re-refininf and use as a form or chain oil).

D - Disposed of (includes bottom sediments, water, other oily wastes and oils taken to a disposal site or disposed of on-site.

Any questions concerning this form may be referred to the Used Oil Coordinator, Hazardous Waste Management Section, MS 4555, Bureau of Solid & Hazardous Waste, Department of Environmental Protection 2600 Blair Stone Road, Tallahassee, FL 32399-2400, phone (904) 488-0300

Form Title Application for Registration Used Oil and Used Oil Filter Handlers
Effective Date June 8, 1995

Department of Environmental Protection
Twin Towers Office Bldg. 2600 Blair Stone Road Tallahassee, Florida 32399-2400

Application for Registration Used Oil and Used Oil Filter Handlers*

(*Handlers are any persons subject to the registration requirements of Rule 62-710.500 and 62-710.850,4, F.A.C. [see item 4b below])

For registration period July 1, 1997 through June 30, 1998

Please print or Type Form

1. Business Name Florida Waste Environmental Serv. FEID No. 59-2333317
   DBA (Doing Business As) Same Telephone No. (813) 246-4711
   Business Mailing Address: 5218 Saint Paul Street
   City: Tampa State: FL Zip Code: 33619
   Site Address: SAME
   City: State: Zip Code:
   Latitude/Longitude: __:__:__ / __:__:__, or Section__Township__Range__
   (This information may be found on property deeds or determined from a Florida DOT County Road Map)

2. Facility Owner Name: Allyn Summers Telephone No. (813) 246-4711
   Address 5218 Saint Paul Street
   City: Tampa State: FL Zip Code: 33619

3. Facility Operator's Name (if different from owner)
   Operator's Name: Allyn Summers Telephone No. (813) 246-4711

4. Make $100.00 fee check or money order payable to Florida Department of Environmental Protection

   4a. Registration Status: ____New _X_ Renewal EPA ID No. FLR 000013888

   4b. Check boxes which apply to your used oil/used oil filter activity(ies).

   Used Oil: ☒Transporter ☒Transfer Facility ☒Marketer ☐Processor ☐Burner of off-spec used oil

   Used Oil Filter: ☒Transporter ☒Transfer Facility ☐Processor ☐End User

5. Certification

   5a. General Certification to be signed by all Registrants:
   To the best of my knowledge and belief I certify the information provided in this application is true, accurate and correct.

Sharon Summers	Sharon Summers	2-21-97
Name of Authorized Person (Print or Type)	Signature of Authorized person	Date

   5b. Specific Certification to be signed by all Used Oil Transporters
   (Except those exempted by Rule 62-710.600(1), F.A.C.)
   I certify as a Used Oil Transporter that the training program and financial responsibility required under Section 62-710.600, F.A.C., is in place, current and being adhered to. If any modifications have been made to the originally approved training program, they are explained in the attachments to this registration form. Evidence of financial responsibility is demonstrated by the attached Used Oil Transporter Certificate of Liability Insurance, DEP form 62-710.900(4).

Certificate of Liability Insurance
Used Oil Transporters

Please Print or Type Form

1. CNA Insurance Co. (the insurer), CNA Plaza, Chicago, IL
(Name of the insurer) (Address of the insurer)

hereby certifies that it has issued liability insurance covering bodily injury and property damage for sudden accidental occurrences to Florida Waste Environmental Service (the "insured") 5218 Saint Paul St., Tampa, FL 33619
(Name of the insured) (Address of the insured)

whose EPA ID number is FLR000013898 in connection with the insured's obligation to demonstrate financial responsibility under Florida Administrative Code Rule 62-710.800(2)(d).

This insurance is primary and the company shall be liable for amounts up to $1,000,000 less a deductible or retension of $ 0 for each accident exclusive of legal defense costs. If a deductible or retension applies, its amount may not exceed 10% of the equity of the insured. The coverage is provided under policy number 5219, issued on 12-16-96 (Date). The expiration date of said policy is 12-16-97 (Date) or the annual renewal date is 12-16-97 (Date).

This insurance is excess and the company shall not be liable for amounts in excess of $_____ for each accident in excess of the underlying limit of $_____ for each accident, exclusive of legal defense costs. The coverage is provided under policy number _____ issued on _____ (Date). The expiration date of said policy is _____ (Date) or the annual renewal date is _____ (Date).

2. The insurer further certifies the following with respect to the insurance described in Paragraph 1:

a. Bankruptcy or insolvency of the insured shall not relieve the insurer of its obligations under the policy.
b. The insurer is liable for the payment of amounts within any deductible applicable to the policy, with a right of reimbursement by the insured for any such payment made by the insurer.
c. Whenever requested by the Secretary (or designee) of the Florida Department of Environmental Protection (FDEP), the insurer agrees to furnish to the Department a signed duplicate original of the policy and all endorsements.
d. Cancelation of the insurance, whether by the insurer or the insured or by any other termination of the insurance (e.g. expiration, non-renewal), will be effective only upon written notice and only after the expiration of thirty-five (35) days after a copy of such written notice is received by the Secretary of the FDEP as evidence by certified mail return receipt.
e. The insurer shall not be liable for the payment of any judgment or judgments against the insured for claims resulting from accidents which occur after the termination of the insurance described herein, but such termination shall not affect the liability of the insurer for the payment of any such judgments resulting from accidents which occur during the time the policy is in effect.

I hereby certify that the insurer is licensed to transact the business of insurance, or eligible to provide insurance as an excess or surplus lines insurer, in one or more States including Florida.

RE: Waste Acceptance Requirements
Chambers Okeechobee Landfill

Dear Mr. Brislin:

As per your request during our conversation earlier today, this letter is intended to clarify the requirements which mus be met in order to obtain approval for the disposal of wastes generated by your facility at the Chambers Okeechobee Landfill.

All Special Waste accepted at the Okeechobee Landfill must receive prior approval in accordance with the site's Special Waste Quality Assurance Plan which is incorporated into the site's Operating Permit. This plan requires that each individual waste stream be profiled, reviewed and approved prior to disposal. The Okeechobee Landfill receives waste from a number of waste consolidation facilities such as Florida Waste Environmental. Many of these facilities bulk numerous waste streams together into one profiled waste stream for landfill disposal.

The Okeechobee Landfill accepts bulked waste for disposal if all conditions of the site's Special waste Quality Assurance Plan have been met. This includes receiving a comprehensive description of the processes of generating the various wastes within the waste stream as well as certification and documentation that none of the wastes making up the bulk waste stream were individually a characteristic hazardous waste. The above described steps are taken to ensure that no dilution of a characteristically hazardous waste occurs as a result of the bulking.

In no instance will the Okeechobee Landfill grant a blanket approval to any waste bulking facility for disposal of their waste at the landfill. As stated above, the landfill's permit requires that each individual waste stream be reviewed and approved. For this reason bulked waste streams are approved on a batch basis with the batch size defined by the generating facility's operating restrictions.

In addition to Special Wastes the Okeechobee Landfill accepts asbestos containing wastes for disposal. The delivery of asbestos containing wastes must comply with all the requirements of the National Emissions Standards for Hazardous Air Pollutants (NESHAP) regulations. These materials can be delivered in the same load as other wastes as long as the asbestos containing waste can be managed in accordance with the NESHAP regulations. If mixing of the asbestos containing wastes with other wastes in the same load would preclude compliance with the

NESHAP regulations the asbestos containing waste must be delivered separately from other wastes.

I hope this letter clarifies the Okeechobee Landfills waste acceptance criteria as they apply to your operations. If you have any further questions or require additional information, please contact me at (404) 799-2950.

Sincerely,

Michael S. Dae
Environmental Compliance Manager

HEALTH 1 REACTIVITY 0
SPECIAL

EMERGENCY TELEPHONE NUMBER: 813/535-1411

SECTION ONE - PRODUCT DESCRIPTION

NAME: INTERIOR FLAT ACRYLIC PAINT

CHEMICAL DESCRIPTION: Pigmented Acrylic Latex Paint
FORMULA: # 800

SECTION TWO - HAZARDOUS INGREDIENTS:

CHEMICAL:	Percent	CAS No.	TVL	Permissible Exposure Level	Carcinogen Y/N	
Ethylene Glycol	2%	107-21-1	50 ppm	50ppm	not est.	
1-Methyl-3,5,7-Triaza-1-Azoniatricyclodene Chloride	.10%	76902.90-4	not est.	not est.	not est.	
3-Iodo-2-Propynyl Butyl Carbonate	.10%	55406-53-6	not est.	not est.	not est.	

SECTION THREE - PHYSICAL DATA

APPEARANCE: White, ODOR: Nondescript , BOILING POINT: 100°C/212°F, VAPOR PRESSURE: (mm of Hg.): 17 @20°C/68°F, VAPOR DENSITY (Air=1): >1, SPECIFIC GRAVITY (Water = 1): 1.40, % VOLATILE BY WEIGHT: 50.19, SOLUBILITY IN WATER: Dilutable, EVAPORATION RATE (Water = 1): >1

SECTION FOUR - FIRE AND EXPLOSION DATA

FLASH POINT (°F / °C) (Closed Cup): Non Combustible
FLAMMABLE LIMIT: - LEL N/A
- UEL N/A
EXTINGUISHER MEDIA: N/A
SPECIAL FIRE FIGHTING PROCEDURES: N/A
UNUSUAL FIRE AND EXPLOSION HAZARDS: Polymer film will burn. Material can splatter above 100°C/212°F.

SECTION FIVE - HEALTH HAZARD DATA

Threshold limit value:
Effects of Overexposure:
Inhalation: Vapor or mist can cause headache, nausea, irritation of the nose, throat and lungs.
Skin Contact: Irritating upon repeated and prolonged contact.
Eye Contact: Slightly irritating.
Emergency & First Aid Procedures:
Inhalation: Move subject to fresh air.
Eyes/skin contact: Flush eyes with large amounts of water for at least 15 minutes - see a physician if irritation persists. Wash affected skin area with soap and water.

SECTION SIX - PHYSICAL HAZARDS (REACTIVITY DATA)

STABILITY: [X] Stable [ ] Unstable

CONDITIONS TO AVOID IF UNSTABLE: N/A
INCOMPATIBILITY WITH OTHER MATERIALS: N/A
HAZARDOUS DECOMPOSITION PRODUCTS: N/A
HAZARDOUS POLYMERIZATION: Will not occur.
CONDITIONS TO AVOID UNCONTROLLED POLYMERIZATION: N/A

SECTION SEVEN - STORAGE, HANDLING, SPILL AND DISPOSAL PROCEDURES

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE: Keep from freezing - product stability may be affected. Storage Temp. Hi.60°C/140°F Lo.1°C/34°F. Under normal conditions the risk of exposure to residual monomer is negligible. Monomer vapors can be generated, however when product is heated or cured. NOTE: Do not inhale spray from product; use respirator if engineering controls are not adequate to maintain mist vapor or dust concentrations of acrylic polymer at less than 10mg/m3.

STEPS TO FOLLOW IF MATERIAL IS SPILLED OR RELEASED: Keep spectators away. Floor may be slippery; use care to avoid falling. Dike and contain spill with material (e.g. sand, earth) Transfer liquid to containers for recovery or disposal-solid diking material to separate containers for disposal. Keep spills and cleaning runoff out of municipal sewers and open bodies of water.

WASTE DISPOSAL METHODS: Coagulate the emulsion by the stepwise addition of alum and lime. Remove clear supernatant liquid and flush to a chemical sewer. Landfill or incinerate the solids and the contaminated diking material according to local, state and federal regulations.

SECTION EIGHT - PERSONAL PROTECTION INFORMATION

Respiratory Protection (Specify Type): Wear respirator (NSHA/NIOSH) suitable for concentration and types of contaminants.
Ventilation: Local [x] Other
Mechanical [x]
PROTECTIVE GLOVES: Impervious - Rubber, neoprene.

EYE PROTECTION: Chemical splash goggles (ANSI Z-87.1)

OTHER PROTECTIVE EQUIPMENT:

SECTION NINE - SPECIAL PRECAUTIONS

OTHER PRECAUTIONS:
None

EXTINGUISHING MEDIA: FOAM CO2 DRY CHEMICAL WATER FOG

UNUSUAL FIRE AND EXPLOSION HAZARDS:
Closed containers may burst if exposed to extreme heat or fire.
Toxic gases may form when product burns.

SPECIAL FIREFIGHTING PROCEDURES:
Cool exposed containers with water. Use self-contained breathing apparatus.

SECTION V - HEALTH HAZARD DATA

EFFECTS OF OVEREXPOSURE - ACUTE:
Inhalation - Irritation of the respiratory tract.
Skin and Eye Contact - Primary irritation.
Ingestion of large amounts could cause serious injury.

EFFECTS OF OVEREXPOSURE - CHRONIC:
Crystalline silica has been classified as probably carcinogenic for humans (2A) by IARC.

MEDICAL CONDITIONS PRONE TO AGGRAVATION BY EXPOSURE:
None expected when used in accordance with Safe Handling and Use Information (Section VIII).

PRIMARY ROUTE(S) OF ENTRY: DERMAL INHALATION INGESTION

EMERGENCY AND FIRST AID PROCEDURES:
Inhalation - Remove to fresh air. Get medical help for any breathing difficulty.
Eye Contact - Flush thoroughly with water. Call physician.
Skin Contact - Wash with soap and water.
Ingestion - Drink 1 or 2 glasses of water to dilute. Do NOT induce vomiting. Call physician.

SECTION VI - REACTIVITY DATA

STABILITY: STABLE HAZARDOUS POLYMERIZATION WILL NOT OCCUR

HAZARDOUS DECOMPOSITION PRODUCTS: Burning may produce carbon dioxide and carbon monoxide.

CONDITIONS TO AVOID: Elevated temperatures

INCOMPATIBILITY (MATERIALS TO AVOID): None reasonably foreseeable.

SECTION VII - SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:
Flush with water. Absorb with sawdust or rags.

WASTE DISPOSAL METHOD:
Conventional procedures in compliance with local, state and federal regulations.
Do not incinerate sealed containers.

SECTION VIII - SAFE HANDLING AND USE INFORMATION

RESPIRATORY PROTECTION:
Use NIOSH approved respirator specified for protection against paint spray mist and sanding dust in restricted or confined areas.

VENTILATION:
Adequate to maintain working atmosphere below T.L.V. and L.E.L. (See Sect. II for ingredient data and concentrations). Mechanical exhaust may be required in confined areas.

PROTECTIVE GLOVES: Waterproof during repeated contact.

EYE PROTECTION: Splash goggles or safety glasses with side shields.

OTHER PROTECTIVE EQUIPMENT: Clothing adequate to protect skin.

HYGIENIC PRACTICES:
Remove and wash clothing before reuse. Wash hands before eating, smoking or using the washroom.

SECTION IX - SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE:
Do not throw or drop containers.

OTHER PRECAUTIONS:
Avoid contact with eyes and prolonged contact with skin or breathing of spray mist or sanding dust.
Close container after each use. Keep out of reach of children. Do not take internally.

RE: Waste Application and Waste Agreement

Account Instructions for the Waste Application & Agreement

Sandy (1)

1. Waste application or profile: FAX

   a. The signed profile should be faxed to Mike Dae 404-799-2941. The analytical data also needs to be faxed with the waste application or profile.

   b. Once the application or profile has been approved, you will receive an approval number that must go on the manifest.

2. Special Waste Disposal Agreement: FAX to (2)

   a. The agreement needs to be signed and faxed to Susan Williams 941-467-5301. The original will be mailed for your signature.

3. Phone numbers for assistance:

   a. Mike Dae 404-799-2950

   b. Susan Williams 941-357-0111

   c. Bill Gresham 813-622-2731

4-28-97 11:05 AM

Chambers appreciates your business and have a great day!!

Thank you Susan

STATE OF FLORIDA
DEPARTMENT OF HEALTH AND REHABILITATIVE SERVICES

RECEIVED
SEP 22 1995
ENVIRONMENTAL HEALTH

INTEROFFICE MEMORANDUM

DATE: September 20, 1995

TO: Jordan Lewis, R.S., M.P.H.
Environmental Administrator
HRS Hillsborough County Public Health Unit

FROM: Dale Holcomb, M.P.H.
Environmental Specialist III
Onsite Sewage Program Tel. 272-6200

SUBJECT: Pumping and Disposal of Grease

This office has no objection to mixing grease interceptor pumpings with saw dust and disposing of it at a sanitary landfill. The Department of Environmental Protection which regulates the landfill will need to approve of the proposed activity. The mixing activity, if done off the landfill site would be subject to regulation by this department or by DEP depending on the quantity of grease "treated" and the type of sewage treatment and disposal system from which the grease was removed.

I have never seen this done in practice and would like the opportunity to see the results should this come to pass.

Considering waste haulers decanting the liquid back into the grease interceptor after the extraction of the grease component, there is no objection to this activity in concept. Some considerations to address before you decide to allow a particular process would be:

- Is the returned liquid sufficiently "grease-free" to consider the interceptor adequately and effectively "cleaned"?
- Is the returned liquid free of process additives which might affect system operation or pollute groundwater?
- Is the grease remaining in the returned liquid in such a form that it may pass into the treatment and disposal system?
- Is the separated grease free of process additives which could render it hazardous, toxic, or otherwise unsuitable for further treatment and disposal by ordinary means?

- Is the entire process reasonably nuisance free and sanitary?

Again, there is no objection to the concept of separating the liquid from the grease and returning the liquid to the interceptor. Of course, this opinion only affects grease from interceptors serving onsite sewage treatment and disposal systems. Grease from DEP-regulated systems should be handled in accordance with that agency's requirements.

Thank you for bringing these two innovative approaches to my attention. Please call me at suncom 278-4070 if you have any further questions.
