[Pollution Notice](#)

Reference: Oil Spill

Dear Sirs:

The following is to inform and notify you, that the Peterbilt truck was recently sent to the mechanic for an engine repair.

Last Wednesday, I noticed some oil stains on the floor, as for my surprise, I found out that the truck was leaking oil. As soon as I noticed, the truck was checked and sadly there was a broken hose in the turbo.

Our trucks are permanently well maintained, but this is something that Unfortunately happened.

Our trucks do not have a designated parking space at the yard, usually we park them upon parking availability, on a first come first serve basis; that is why there was oil spilled in three different spots.

As soon as we found out we took care of this matter which is something that it has never happened in the past.

I am kindly sending you this report informing you what really happened, as I am kindly asking for your understanding since it is all taken care off and we are really sorry about this inconvenience.

Our company is very dedicated to accomplish our mission and goals as well as we are compromised to comply with every single regulation required.

If you may need any further information, please feel free to contact us at 954- 213-4645

To respond unexpected visit from FDEP inspectors, this area was clean.

Truly Yours,

David Bautista
