Self-Reporting - Transfer Waste Held Beyond 10 Days

Dear Mr. Dregne:

On 16 February 1999 I informed the Department that the above referenced Service Center held transfer waste beyond the 10-day limit. As explained in our telephone conversation Safety-Kleen held some transfer wastes for 11 days. The waste was scheduled to be transported from the Service Center on 15 February 1999, however due to the 15th being a holiday the transporter did not arrive at the facility until the morning of the 16th of February. This resulted in one(1) 55-gallon drum of waste petroleum distillates and eighteen(18) five gallon containers of silver recovery cartridges exceeding the ten day limit by one day.

Safety-Kleen has reviewed the ten day limit for transfer wastes with all parties involved. We intend to make this an isolated incident.

If you have any questions concerning this incident please call me (813) 626-0052. Thank-you for your understanding in this matter.

Sincerely,

Richard R. Morris
Environmental, Health & Safety Manager
