RE: Notice of Deficiency Response Submittal

Dear Mr. Gonzalez:

As you know, the Department issued the First Notice of Deficiency (NOD) to CCC's permit modification on January 24, 1996. The purpose of this letter is to formally request that Chemical Conservation Corporation (CCC) submit the required number of responses to that Notice Of Deficiency. Since CCC is presently operating under a construction permit which expired on March 19, 1996, the Department is anxious to have the response submitted and the modification issued.

We appreciate the opportunity CCC has extended for us to review the courtesy response copy submitted on April 9, 1996. Unfortunately, our commitments are prioritized by applications officially submitted and put on the Department's review timeclock. That leaves little time to look over proposed applications or responses. We have been unable to adequately review what you have submitted and ask that you send in the required number of responses so that we may prioritize and distribute them to Tallahassee and EPA for their joint review.

The Department is also requesting CCC to public notice the modification response. Originally, the permit modification was not public noticed on the date it was submitted as required by Florida Statute 403.722(12). The purpose of the public notice is to invite concerned parties in to review the application or ask the Department questions about the facility. A copy of Florida Statute 403.722 is attached which describes the wording for the public notice.
