HAZARDOUS WASTE
PERMITTING

Dear Mr. Walczynski:

Safety-Kleen Corporation - Orange Park
FLD 980 847 214
Clay County - Hazardous Waste
Construction Permit #HC 10-128082

This letter acknowledges receipt of your letter dated January 5, 1988, to modify the existing Operation Permit to include the waste paint storage unit.

In accordance with the Department's regulations and policy for a newly constructed unit, you must submit an application for an operation permit along with an application fee of \$500. Enclosed is an application for your convenience. You must complete Part I of the application and also submit original certifications. For the detailed site specific information required in Part II of the permit application, you may want to reference your previous submittals for the existing construction permit and operation permit.

In addition to submitting an operation permit application, you must show compliance with specific conditions 38 and 41 of the above referenced permit. Specific condition 38 requires a professional engineer's inspection and certification of secondary containment. Specific condition 41 requires as-built certification by a professional engineer.

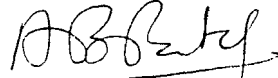

Moreover, the Warning Notice #NE-W-10-4555 sent to you on December 4, 1987, must be resolved before a permit can be issued. In accordance with Rule 17-4.070(6), F.A.C., the Department cannot issue a permit to a facility which is not in full compliance with the law and Department rules, regulations and standards.

Letter to Mr. Stanley Walczynski
January 21, 1988
Page two

After receiving the above required information, the Department will modify your permit to include the paint storage unit if the application is determined complete and adequate.

If you have any questions regarding this letter, please contact this office.

Sincerely,

Ashwin B. Patel
Hazardous Waste Supervisor
